File-Handling Apps and Utilities There are several apps and utilities available that help you manage content and files: The 3ds Max Asset Library is a standalone app that allows you to quickly access 3D content on your local computer and network in a single view, making all content instantly searchable. You can download the app from the Autodesk App store. The Bitmap / Photometric Path Editor utility lets you view bitmap paths or remove them from the scene file. Autodesk 3ds Max 2021 Lighting and Shading Book Serdar Hakan DÜZGÖREN, Types of Lights 3ds Max provides two types

of lights: photometric and standard. All types are displayed in viewports as light objects. They share many of the same parameters, including shadow generators. Photometric Lights Photometric lights use photometric (light energy) values that enable you to more accurately define lights as they would be in the real world. You can set their distribution, intensity, color temperature, and other characteristics of real-world lights. You can also import specific photometric files available from lighting manufacturers to design lighting based on commercially available lights. Standard Lights Standard lights are computer-based objects that simulate lights such as household or office lamps, the light instruments used in stage and film work, and the sun itself. Different kinds of light objects cast light in different ways, simulating different kinds of light sources. Unlike photometric lights, Standard lights do not have physically-based intensity values.
