Ghostbuster's Daughter Violet Ramis Stiel,2018-06-05 From the daughter of comedy legend Harold Ramis (and featuring a Foreword by Seth Rogen) comes a hilarious and heartwarming account of his life, work, and legacy. Most of us know Harold Ramis as the writer, director, and actor who brought warmth and humor to the big screen in classics like *Animal House*, *Caddyshack*, *Ghostbusters*, *National Lampoon's Vacation*, and *Groundhog Day*. To his daughter, Violet, he was best known as an amazing father, confidant, and friend. In *Ghostbuster's Daughter*, Violet reflects on the life and legacy of her father, providing readers with an extraordinarily candid and insightful look into the man who helped shape modern American comedy. Funny, endearing, and vulnerable, *Ghostbuster's Daughter* takes readers into the private life of the American comedy icon, from his humble roots in Chicago and ascension into Hollywood stardom to his personal philosophies on life, love, and filmmaking. While the book offers a comprehensive history of her father's career, *Ghostbuster's Daughter* also provides a profound homage to their special father-daughter relationship. Violet weaves anecdotes about her father's unique and devoted parenting style among stories of her own unconventional upbringing, creating a vivid and dynamic portrait of the man behind the movies. A distinctly offbeat memoir as well as a charming family story for the ages, *Ghostbuster's Daughter* is an intimate look at one of America's preeminent comedy filmmakers.

Waste Eiko Maruko Siniawer,2018-10-15 In *Waste*, Eiko Maruko Siniawer innovatively explores the many ways in which the Japanese have thought about waste—in terms of time, stuff, money, possessions, and resources—from the immediate aftermath of World War II to the present. She shows how questions about waste were deeply embedded in the decisions of everyday life, reflecting the priorities and aspirations of the historical moment, and revealing people's ever-changing concerns and hopes. Over the course of the long postwar, Japanese society understood waste variously as backward and retrogressive, an impediment to progress, a pervasive outgrowth of mass consumption, incontrovertible proof of societal excess, the embodiment of resources squandered, and a hazard to the environment. Siniawer also shows how an encouragement of waste consciousness served as a civilizing and modernizing imperative, a moral good, an instrument for advancement, a path to self-satisfaction, an environmental commitment, an expression of identity, and more. From the late 1950s onward, a defining element of Japan's postwar experience emerged: the tension between the desire for the privileges of middle-class lifestyles made possible by affluence and dissatisfaction with the logics, costs, and consequences of that very prosperity. This tension complicated the persistent search for what might be called well-being, a good life, or a life well lived. *Waste* is an elegant history of how people lived—how they made sense of, gave meaning to, and found value in the acts of the everyday.

How We Treat the Sick Michael Mandelstam,2011 The author shows beyond question that neglectful care is a systemic blight, rather than mere local blemish, within our health services. He analyses the causes and factors involved, reveals the widespread denial and lack of accountability from those responsible, and spells out implications of this failure to care for the vulnerable with humanity.

Semiconductor Materials for Solar Photovoltaic Cells M. Parans Paranthaman,Winnie Wong-Ng,Raghu N. Bhattacharya,2015-09-16 This book reviews the current status of semiconductor materials for conversion of sunlight to electricity, and highlights advances in both basic science and manufacturing. Photovoltaic (PV) solar electric technology will be a significant contributor to world energy supplies when reliable, efficient PV power products are manufactured in large volumes at low cost. Expert chapters cover the full range of semiconductor materials for solar-to-electricity conversion, from crystalline silicon and amorphous silicon to cadmium telluride, copper indium gallium sulfide selenides, dye sensitized solar cells, organic solar cells, and environmentally friendly copper zinc tin sulfide selenides. This book will aid materials scientists and engineers in identifying research priorities to fulfill energy needs, and will also enable researchers to understand novel semiconductor materials that are emerging in the solar market. This integrated approach also gives science and engineering students a sense of the excitement and relevance of materials science in the development of novel semiconductor materials. · Provides a comprehensive introduction to solar PV cell materials · Reviews current and future status of solar cells with respect to cost and efficiency · Covers the full range of solar cell materials, from silicon and thin films to dye sensitized and organic solar cells · Offers an in-depth account of the semiconductor material strategies and directions for further research · Features detailed tables on the world leaders in efficiency demonstrations · Edited by scientists with experience in both research and industry

Monash's Masterpiece Peter FitzSimons,2018-04-24 The Battle of Le Hamel on 4 July 1918 was an Allied triumph, and strategically very important in the closing stages of WWI. A largely Australian force, commanded by the brilliant Sir John Monash, fought what has been described as the first modern battle - where infantry, tanks, artillery and planes operated together as a coordinated force. Monash planned every detail meticulously, with nothing left to chance. Integrated use of tanks, planes, infantry, wireless (and even carrier pigeons!) was the basis, and it went on from there, down to the details: everyone used the same maps, with updated versions delivered by motorbike despatch riders to senior commanders, including Monash. Each infantry battalion was allocated to a tank group, and they advanced together. Supplies and ammunition were dropped as needed from planes. The losses were relatively few. In the words of Monash: 'A perfected modern battle plan is like nothing so much as a score for an orchestral composition, where the various arms and units are the instruments, and the tasks they perform are their respective musical phrases.' Monash planned for the battle to last for 90 minutes - in the end it went for 93. What happened in those minutes changed for the rest of the war the way the British fought battles, and the tactics and strategies used by the Allies. Peter FitzSimons brings this Allied triumph to life, and tells this magnificent story as it should be told.

The Participants Hans-Christian Jasch,Christoph Kreutzmüller,2017-10-01 On 20 January 1942, fifteen senior German government officials attended a short meeting in Berlin to discuss the deportation and murder of the Jews of Nazi-occupied Europe. Despite lasting less than two hours, the Wannsee Conference is today understood as a signal episode in the history of the Holocaust, exemplifying the labor division and bureaucratization that made the “Final Solution” possible. Yet while the conference itself has been exhaustively researched, many of its attendees remain relatively obscure. Combining accessible prose with scholarly rigor, *The Participants* presents fascinating profiles of the all-too-human men who implemented some of the most inhuman acts in history.

German Jews in the Era of the “Final Solution” Otto Dov Kulka,2019-12-02 These essays, written in the course of half a century of research and thought on German and Jewish history, deal with the uniqueness of a phenomenon in its historical and philosophical context. Applying the classical empirical tools to this unprecedented historical chapter, Kulka strives to incorporate it into the continuum of Jewish and universal history. At the same time he endeavors to fathom

the meaning of the ideologically motivated mass murder and incalculable suffering. The author presents a multifaceted, integrative history, encompassing the German society, its attitudes toward the Jews and toward the anti-Jewish policy of the Nazi regime; as well as the Jewish society, its self-perception and its leadership.

International Relations and the Arctic: Understanding Policy and Governance Robert W. Murray, Anita Dey Nuttall, 2014-06-26 Increased global interest in the Arctic poses challenges to contemporary international relations and many questions surround exactly why and how Arctic countries are asserting their influence and claims over their northern reaches and why and how non-Arctic states are turning their attention to the region. Despite the inescapable reality in the growth of interest in the Arctic, relatively little analysis on the international relations aspects of such interest has been done. Traditionally, international relations studies are focused on particular aspects of Arctic relations, but to date there has been no comprehensive effort to explain the region as a whole. Literature on Arctic politics is mostly dedicated to issues such as development, the environment and climate change, or indigenous populations. International relations, traditionally interested in national and international security, has been mostly silent in its engagement with Arctic politics. Essential concepts such as security, sovereignty, institutions, and norms are all key aspects of what is transpiring in the Arctic, and deserve to be explained in order to better comprehend exactly why the Arctic is of such interest. The sheer number of states and organizations currently involved in Arctic international relations make the region a prime case study for scholars, policymakers and interested observers. In this first systematic study of Arctic international relations, Robert W. Murray and Anita Dey Nuttall have brought together a group of the world's leading experts in Arctic affairs to demonstrate the multifaceted and essential nature of circumpolar politics. This book is core reading for political scientists, historians, anthropologists, geographers and any other observer interested in the politics of the Arctic region.

Forced Marriage and 'Honour' Killings in Britain Christina Julios, 2016-03-09 This book explores the contemporary phenomenon of forced marriage and 'honour' killings in Britain. Set against a background of increasing 'honour'-based violence within the country's South Asian and Muslim Diasporas, the book

traces the development of the 'honour' question over the past two decades. It accordingly witnesses unprecedented changes in public awareness and government policy including ground-breaking 'honour'-specific legislation and the criminalisation of forced marriage. All of which makes Britain an important context for the study of this now indigenous and self-perpetuating social problem. In considering the scale of the challenge and its underlying causes, attention is paid to the intersections of gendered power structures that disadvantage female members of 'honour' cultures as well as feminist theories that seek to explain them. The book features five key case-studies of 'honour' killings and draws from a wide range of narratives including those of 'honour' violence survivors, grassroots service providers and legislators. Such myriad of perspectives reveals the complexity of the 'honour' issue and the deep ideological divisions that characterise it. With the UK's multiculturalist discourse unable to reconcile protecting patriarchal minority cultures with safeguarding gender equality and human rights, the book raises fundamental questions about the country's future direction. Following a long trend of state-sponsored integrationist policies, the government's response to the 'honour' question points decisively in the direction of a post-multicultural British nation.

Would Trotsky Wear a Bluetooth? Paul R. Josephson, 2009-12-09 After visiting Russia in 1921, the journalist Lincoln Steffens famously declared, I have seen the future, and it works. Steffens referred to the social experiment of technological utopianism he found in the Soviet Union, where subway cars and farm tractors would carry the worker and peasant -- figuratively and literally -- into the twentieth century. Believing that socialism and technology together created a brave new world, Boleslaw Bierut of Poland and Kim Il Sung of North Korea -- and other leaders -- joined Russia's Vladimir Lenin and Leon Trotsky in embracing big technology with a verve and conviction that rivaled the western world's. Paul R. Josephson here explores these utopian visions of technology -- and their unanticipated human and environmental costs. He examines the role of technology in communist plans and policies and the interplay between ideology and technological development. He shows that while technology was a symbol of regime legitimacy and an engine of progress, the changes it spurred were not unequivocally positive. Instead of achieving a worker's paradise, socialist technologies exposed the proletariat to dangerous machinery and deadly pollution; rather than freeing women from exploitation in family and labor, they paradoxically created for them the dual -- and exhausting -- burdens of mother and worker. The future did not work. The fall of the Soviet Union in 1991 marked the end of communism's self-proclaimed glorious quest to reach and surpass the West. Josephson's intriguing study of how technology both helped and hindered this effort asks new and important questions about the crucial issues inextricably linked with the development and diffusion of technology in any sociopolitical system.

The Warrior Women of Television Dawn Heineken, 2003 *The Warrior Women of Television* examines contemporary representations of the female action hero in three series: *La Femme Nikita*, *Aeon Flux*, and *Buffy the Vampire Slayer*. Detailed readings focus on the ways the structure and content of each series work to create specific understandings of the body that are in contrast to those of male-centered action texts. Arguing that television texts mediate larger cultural concerns, this book considers the feminist implications of the series and uses insights from critical writings on contemporary culture and the body to discuss the ways the female hero functions as a potent contemporary cultural symbol.

Whisper Stories and Other Poems Sri Harsha Peesapati, 2018-07-16 Proposal From the year 2017, I've started writing poetry, in Hindi and English. In 2013, I tried learning songwriting from Course Era, where I failed, because, the assignment included English songs. In September 2017, wrote my first songs (Huff Dada and Dring Dring). Using the random words I've created these pieces. Later, in October and November, I've started singing my own lyrics. These lyrics are nothing but my agony and love towards them, whom I adore, love and admire. Especially the present happening with one whom I'm in friends. There is no particular motto or agenda. As I'm fond of songs, and a decade of poetry, helped me create lyrics. Slowly, with time, I'm adding small content of tunes and music as well! Further, as I'm posting videos on YouTube, I'm doing the same for my songs by creating a channel. My sincere request is, if selected, I want my Hindi songs to be heard in presence of one translator by the audience. ---Artist statement. A particular trans, I sense in my mind and body, when I sing or write my lyrics. I'm unsure whether it's god gift (Saraswati) or my pure love towards the girls whom I loved and the songs I've heard, which move me. I'm happy that I've come to a stage where I'm singing my own lyrics. And it's been heard by audience. Honored to receive this opportunity. Regards. Pvpd Sri Harsha
