Oedipus Borealis Lois Bragg, 2004 After examining characters widely disparate from the saga skalds, the model holds: only in the narratives having a Christian purpose do we find the link among disability, deformity, sexual aberrance, wisdom, craft, and power broken. With the would-be Icelandic saint, Gudmund the Good, disability is no longer the mark of a great man, but now appears in its modern interpretation: a character-building setback that the hero must overcome.--BOOK JACKET.

Parchment, Printing, and Hypermedia Ronald Deibert, 2000-01-15 Interweaving media theory and historical analysis, this book explores the effect new digital-telecommunication technologies, which Deibert calls hypermedia, will have on the distribution of political power in the next century. Deibert tracks the transf

National Oil Companies and Value Creation Silvana Tordo, 2011-07-13 National Oil Companies (NOCs) directly or indirectly control the majority of oil and gas reserves. As such, they are of great consequence to their country's economy, to importing countries' energy security, and to the stability of oil and gas markets. The paper analyzes the available evidence on the objectives, governance and performance of 20 NOCs from both net importing and net exporting countries, and draws conclusions about the design of policies and measures that are more likely to lead to social value creation. NOCs differ from private companies on a number of very important variables, including the level of competition in the market in which they operate, their business profile along the sector value chain, and their degree of commercial orientation and internationalization. Most share some core characteristics: they are usually tied to the 'national purpose' and serve political and economic goals other than maximizing the firm's profits. This paper introduces a conceptual model to analyze value creation by NOCs that takes into consideration their complex objective function. Our analysis aims to answer the following questions: Are certain corporate governance arrangements more suited than others to promote value creation? Is good geology a pre-condition for NOC value creation? Are there benefits from exposing the NOC to competition from private oil companies? Does the development of forward and backward linkages hamper NOC value creation?

Fiscal Systems for Hydrocarbons Silvana Tordo, 2007-01-01 Although host governments and investors may share one common objective - the desire for projects to generate high levels off revenue - their other goals are not entirely aligned. Host governments aim to maximize rent for their country over time, while achieving other development and socioeconomic objectives. Investors aim to ensure that the return on investment is consistent with the risk associated with the project, and with their corporations' strategic objectives. To reconcile these often conflicting objectives, more and more countries rely on transparent institutional arrangements and flexible, neutral fiscal regimes. This paper examines the key elements of the legal and fiscal frameworks utilized in the petroleum sector and aims to outline desirable features that should be considered in the design of fiscal policy with the objective of optimizing the host government's benefits, taking into account the effect this would have on the private sector's investment.

Ultimate Security Norman Myers, 1994 I do not see how anyone can claim to be informed about what is probably humanity's single most important problem without having read *Ultimate Security*. -Robert Heilbroner, New School of Social Research. In a provocative description of the new concept of environmental security, which he helped establish, the author offers much evidence that environmental factors-from deforestation and desertification to global warming and ozone depletion-will loom larger in world affairs. His book is chockablock with recent portents ... and [predictions of] loss of stability or out-and-out conflict over natural resource related issues. -Publishers Weekl. Myers, a widely published professional conservationist, brings together seven regional case studies and five global case studies to support his thesis that 'environmental problems will likely become predominant causes of conflict in the decades ahead.' Writing for the general public, Myers draws upon his field work in over 80 countries as well as his work with the World Commission on Environment and Development. ... [He] marshals compelling data about the environmental threat and sounds the alarm that political leadership is failing to respond. An interesting, lively book. -Library Journal

Nuking Mecca Doc Cleirech, 2007-12-21 September 11, 2001: Two engineers lose loved ones in the World Trade Center and travel together down a road of unthinkable revenge and mass murder. Exploiting gaps in international nuclear safeguards, they design and build a backyard atomic bomb. Taking advantage of loopholes in international shipping regulations, they smuggle their bomb into Saudi Arabia and detonate it, murdering a million innocent people in the City of Mecca. Meticulously researched, this work of fiction outlines the science and engineering of the simplest of nuclear weapons and underscores why nuclear proliferation is an issue of fundamental importance not just for the West, but for the whole world.

Great Feuds in Science Hal Hellman, 1999-09 The dramatic stories of ten historic feuds: How they altered the course of discovery-and shaped the modern world Hall Hellman tells the lively stories of ten of the most outrageous and intriguing disputes from the seventeenth to the twentieth centuries. Bringing the cataclysmic clash of ideas and personalities to colorful life, Hellman explores both the science and the spirit of the times. Along the way, he reveals that scientific feuds are fueled not only by the purest of intellectual disagreements, but also by intransigence, ambition, jealousy, politics, faith, and the irresistible human urge to be right. Unusual insight into the development of science . . . I was excited by this book and enthusiastically recommend it to general as well as scientific audiences. -American Scientist Hellman has assembled a series of entertaining tales. . . . many fine examples of heady invective without parallel in our time. -Nature An entertaining and informative account of the unusual personalities and sometimes bitter rivalries of some of the world's greatest scientific minds. -Publishers Weekly A fascinating new book which details some of the most famous disputes of the ages. -Courier Mail Dry science history turns into entertaining reading without sacrificing historical accuracy. -The Christchurch Press *Great Feuds in Science* is wonderful history, as the reader learns how scientists had to fight with religious leaders and other scientists to get their work recognized, accepted, and even get the credit for it! -Bookviews

Between Dog & Wolf Sasha Sokolov, 2016-12-06 This “intricate and rewarding” novel by the renowned author of *A School for Fools* is “a Russian Finnegan’s Wake” finally available in English translation (Vanity Fair). One of contemporary Russia’s greatest novelists, Sasha Sokolov is celebrated for his experimental, verbally playful prose. Written in 1980, his novel *Between Dog and Wolf* has long been considered impossible to translate because of its complex puns, rhymes, and neologisms. But in this acclaimed translation, Alexander Boguslawski has achieved “a masterful feat...remarkably faithful to the subtleties of Sokolov’s language” (Olga Matich, University of California, Berkeley). Alternating between the voices of an old, one-legged knife-sharpener, a game warden who writes poetry, and Sokolov himself, this language-driven novel unfolds a story of life on the upper Volga River, in which time, characters, and death all prove unstable. The one constant is the Russian landscape, where the Volga is a more-crossable River Styx, especially when it freezes in winter.

International Investment Agreements United Nations Conference on Trade and Development, 2004 This is part of a three-set volume bringing together the series of papers published by UNCTAD on key issues in international investment agreements. The Series seeks to help developing countries to participate as effectively as possible in international investment rule making at the bilateral, regional, plurilateral and multilateral levels. Addressed to Government officials, corporate executives, representatives of non-governmental organizations, officials of international agencies and researchers, the Series provides a balanced analysis of issues that may arise in discussions about, and negotiations of, international investment agreements.
