Boeing 747: A History Martin W. Bowman, 2014-06-10 A comprehensive history of the aircraft that transformed commercial aviation. Includes photos. A presence in our skies for over half a century, the iconic Boeing 747 has transported hundreds of thousands of passengers across the world. From its introduction with Pan American Airlines in 1970, it has persevered as one of the forerunners of commercial flight. Often labeled the "Queen of the Skies," this is an aircraft revered by passengers and aircrew alike. The first wide-body airliner ever produced, it has set new standards in air travel and opened up the air routes of the world to vast numbers of people who might otherwise have been unable to afford international air travel. This book focuses not only on the 747, but also its many variants, including the YAL-1A, which Boeing developed for the US Air Force, and the Evergreen 747 Supertanker, a 747-200, modified as an aerial application for fire-fighting. Across its types, the 747 carries around half the world's air freight. Accordingly, freight variants feature here too, including the 747-8. The sheer size of the workload carried out by this craft is astounding. From the glamorous 1970s, an era of rapid expansion that saw an unprecedented boom in the tourist trade, to the various environmental and economical imperatives that impact upon modern flight, this work shows how the Boeing 747 has been developed in accordance with the changing demands of the ages.

Flight Of The Titans Kenny Kemp,2013-07-31 The gripping story of the biggest trade war in aviation history. In October 2007, the colossal Airbus A380, the largest commercial jet in history, will take to the skies. This gigantic double-decker is the first real competitor to Boeing's iconic 747 Jumbo Jet. Meanwhile, Boeing has thrown its weight behind the smaller 787 Dreamliner, an aircraft whose emphasis is on fuel economy and reduced emissions. The future of commercial air travel is in the balance, and the outcome is difficult to predict.

The Wetlands Handbook, 2 Volume Set Edward Maltby,Tom Barker,2009-07-23 Forty-two chapters by international experts from a wide range of disciplines make The Wetlands Handbook the essential tool for those seeking comprehensive understanding of the subject. A departure from more traditional treatises, this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy. Introductory chapters address the scope

and significance of wetlands globally for communities, culture and biodiversity. Subsequent sections deal with processes underpinning wetland functioning, how wetlands work, their uses and values for humans and nature, their sensitivity to external impacts, and how they may be restored. The text is illustrated by numerous examples, emphasising functional and holistic approaches to wetland management, including case studies on the wise use and rehabilitation of wetlands in farmed, urban, industrial and other damaged environments, highlighting the long-term benefits of multiple use. The Wetlands Handbook will provide an invaluable reference for researchers, managers, policy-makers and students of wetland sciences.

Building Sustainable Competitive Advantage Dharendra Kumar, 2016-03-03 In Building Sustainable Competitive Advantage Dharendra Kumar shows how the Enterprise Excellence (EE) philosophy is a holistic approach for leading an enterprise to total excellence. It does this by focussing on achieving sustainable significant growth in revenue and profitability, reducing the business cycle time, strategically managing the enterprise risk and focusing on the needs of the customer. There may be various organizations within an enterprise but they must all focus on meeting or exceeding customer needs. Therefore, EE is an integrated approach affecting every employee, every functional area and strategy within the organization. Enterprise risk must be identified, assessed and prioritized; developing a growth strategy proposal which leadership has to execute in order to achieve goals. As business

leaders spearhead the efforts, they must minimize, monitor and control the probability and/or impact of unfortunate events and maximize the realization of opportunities. The achievements in Enterprise Excellence can range from greater cost efficiencies, improved market perceptions, fundamental changes to markets, to new product and service offerings. There may also be significant upgrades in skills, technology, and business strategies. The scope of Enterprise Excellence can also range from operations activities, to business functions, to overall organization and to the enterprise as a whole. Building Sustainable Competitive Advantage is a comprehensive reference book for practising professionals, teaching faculty, and students alike.

Professional Practice in Artificial Intelligence John Debenham, 2006-10-11
The Second Symposium on Professional Practice in AI 2006 is a conference within the IFIP World Computer Congress 2006, Santiago, Chile. The Symposium is organised by the IFIP Technical Committee on Artificial Intelligence (Technical Committee 12) and its Working Group 12.5 (Artificial Intelligence Applications). The First Symposium in this series was one of the conferences in the IFIP World Computer Congress 2004, Toulouse France. The conference featured invited talks by Rose Dieng, John Atkinson, John Debenham and Max Bramer. The Symposium was a component of the IFIP AI 2006 conference, organised by Professor Max Bramer. I should like to thank the Symposium General Chair, Professor Bramer for his considerable assistance in making the Symposium happen within a very tight deadline. These proceedings are the

result of a considerable amount of hard work. Beginning with the preparation of the submitted papers, the papers were each reviewed by at least two members of the international Program Committee. The authors of accepted papers then revised their manuscripts to produce their final copy. The hard work of the authors, the referees and the Program Committee is gratefully acknowledged. The IFIP AI 2006 conference and the Symposium are the latest in a series of conferences organised by IFIP Technical Committee 12 dedicated to the techniques of Artificial Intelligence and their real-world applications.
