The Secret Club That Runs the World Kate Kelly, 2015-06-16 "Thanks to this gripping new book ... we know more about how they do it. And it's even more shocking than you think." –The Independent When most people think of the drama of global finance, they think of stocks and bonds, venture capital, high-tech IPOs, and complex mortgage-backed securities. But commodities? Crude oil and soybeans? Copper and wheat? What could be more boring? That's exactly what the elite commodity traders want you to think. They don't seek the media spotlight. They don't want to be as famous as Warren Buffett or Bill Gross. Their astonishing wealth was created in near-total obscurity, either in closely held private companies or deep within large banks and corporations, where commodity profits and losses weren't broken out. Now Kate Kelly, the bestselling author of *Street Fighters*, takes us inside this secretive inner circle that controls so many things we all depend on. She gets closer than any previous reporter to understanding these whip-smart, aggressive, and often egomaniacal men who bet millions every day on a blend of facts, analysis, and pure gut instinct.

Air Transport Economics Bijan Vasigh, Brian Pearce, 2024-01-26 *Air Transport Economics: From Theory to Applications* uniquely merges the institutional and technical aspects of the aviation industry with their theoretical economic underpinnings. Its integrative approach offers a fresh point of view that will find favor with many students of aviation. This fourth edition has undergone extensive updates throughout. It features new material addressing the impact of COVID-19 on the air transport industry, and the efforts made by both the industry and governments to facilitate recovery. A new chapter examines the impact of air transport on climate change and how government policies to address this issue could reshape the industry. Additionally, alongside expanded coverage of revenue management and pricing decisions, this fourth edition incorporates case studies that give real-world examples to reflect current industry practices. Moreover, there is a discussion of the latest computer applications that enhance the effectiveness of the new techniques. This book offers a self-contained theory and applications-oriented text for individuals aspiring to enter the aviation industry as a practicing professional in the management area. It will be of the greatest relevance to undergraduate and graduate students aiming to acquire a comprehensive grasp of the economics of the aviation industry. The review questions at the end of each chapter have been expanded considerably, and an online assignment has been introduced for each chapter. This book will also appeal to many professionals who seek an accessible and practical explanation of the underlying economic forces that shape the industry.

Half a Lira's Worth Mick Darcy, 2017-03-29 Vivronia was born a girl in the male-dominated Eastern/Arab society. Her mother rejected her at birth because she had black moles on her face and neck. Throughout her childhood and youth, her mother convinced her that love and marriage could never be possible for her. So what opportunities were there for a tall, fat, ugly female with the world in turmoil around her as she tried to survive the Lebanese Civil War? She had to create her own opportunities. Aged twenty-three years, she met a man, gave him half a Lira's worth, married him, and obtained a visa to migrate to Australia as his wife. In line with the Eastern culture, sex was his privilege and her duty only. It was a matter of being out of the frying pan and into the fire. In Sydney, five years later, with her two infant sons, she deserted her violent husband to become a single mother on welfare. The welfare system paid for the removal of her facial moles turning the ugly duckling into a beautiful swan. Aged forty-five years, after a singles without partners party, she was seduced by a tall handsome lover who taught her Western culture lovemaking, where women are allowed to enjoy sex. She became belatedly addicted to it. During the ensuing five years, she climbed up the social ladder and married a prominent recent widower to secure her social and financial standing. But her past life of guilt and shame caught up with her. The reader is left with the question, was she a conniving female gold digger using her sexuality to obtain more of what she was not entitled to, or was she the victim of her lifelong fractured environment, forced to survive on her own in a male-dominated society?

Mechanics of Magnetostrictive Materials and Structures Farzad Ebrahimi, Mehrdad Farajzadeh Ahari, 2023-11-22 *Mechanics of Magnetostrictive Materials and Structures* demonstrates the practical applications and uses for cutting-edge smart magnetostrictive materials. Exploring the analytical and numerical solution procedures and characteristics of these materials more generally, the book details how these materials respond to external factors. Exceptionally adjustable and adaptable, magnetostrictive materials are artificial structures that offer distinctive physical properties. Providing clear illustrations throughout, this book includes a comprehensive guide to the theory and its applications. Presenting the mathematical tools needed to analyze magnetostrictive materials and structures, through the use of MATLAB®, the book will also detail static analysis. Comprehensively assessing the practicalities of these smart materials, it also discusses vibration and buckling under different loads, alongside dynamic behavior. Features: Includes MATLAB® for analytical and numerical simulations relevant to mechanics of magnetostrictive materials Presents vibration analysis of magnetostrictive materials and structures

Demonstrates and analyzes the effect of implementing boundary conditions on the mechanical responses of magnetostrictive structures Examines the use of smart materials in engineering structures Aimed at students and professionals working in the field of mechanics, materials and dynamics, the book is an essential guide to this rapidly developing area.

Rulemaking in Air Transport Ruwantissa Abeyratne,2016-09-29 This book embarks on a discussion of rulemaking in air transport, its processes and legalities, starting with a deconstruction of work carried out at the time of writing in various fields of air transport by the International Civil Aviation Organization (ICAO) which should be at the apex of rulemaking. This initial discussion, which demonstrates the weakness of rulemaking in the air transport field for lack of direction, purpose and structure in the development of authoritative rules and regulations that should serve as compelling directives from the main organization responsible for aviation, leads to an evaluation of the fundamental principles of rulemaking in ICAO, the Federal Aviation Administration (FAA) of the United States and the European Commission (EC).

Understanding Business Statistics Ned Freed,Stacey Jones,Timothy Bergquist,2013-11-27 Understanding Business Statistics is a highly student-oriented business statistics product that makes statistics understandable for students with a wide variety of statistics backgrounds. The authors provide an intuitive discussion of basic statistical principles rather than a mathematically rigorous development. They use simple examples to introduce and develop concepts and procedures. For ease of reading, chapter sections are designed to ensure easy-to-follow continuity from one section to the next. This text provides students with frequent opportunities to check their understanding of topics as they move through the chapters, with exercises included at the end of most sections. In many cases, the exercises have been designed to extend chapter discussions rather than solely provide opportunities for drill and repetition. Understanding Business Statistics is written using a modular approach, allowing students to approach the subject step-by-step with very clear instructions.

Ils ont relevé la tête Mémona Hintermann,Lutz Krusche,2010-10-06 Elle l'avait dit à la fin de Tête Haute : un jour, elle raconterait l'histoire des autres. D'autres, qui comme elle, sont partis du mauvais pied, d'autres qui, parfois en plein vol, ont eu leurs ailes brisées. Aujourd'hui, c'est en tant que journaliste, avec l'aide de son mari, que Mémona Hintermann raconte ces histoires. Comme celle de Georges Charpak, déporté à Dachau en 1943, prix Nobel de Physique en 1992 ; ou celle de Dominique Loiseau, veuve d'un des plus grands chefs cuisiniers français disparu en 2003, aujourd'hui à la tête de son empire ; celle de Nora, une Algérienne qui, jeune fille, a échappé à un mariage forcé et qui s'est battue pour obtenir la nationalité française ; ou encore celle de Corinne, petite héroïne du quotidien, sans le sou, arrachant jour après jour le droit de subsister encore un peu, elle et ses deux enfants... Portés par le regard sans fard de Mémona Hintermann et Lutz Krusche (Tête Haute, Quand nous étions innocents), ces récits bruts de vie témoignent de la force inaltérable, tranquille, qui malgré les revers de l'existence, nous pousse à toujours relever la tête.
