Thirty-Eight Stephen Long,2016-03-22 The hurricane that pummeled the northeastern United States on September 21, 1938, was New England’s most damaging weather event ever. To call it “New England’s Katrina” might be to understate its power. Without warning, the storm plowed into Long Island and New England, killing hundreds of people and destroying roads, bridges, dams, and buildings that stood in its path. Not yet spent, the hurricane then raced inland, maintaining high winds into Vermont and New Hampshire and uprooting millions of acres of forest. This book is the first to investigate how the hurricane of ’38 transformed New England, bringing about social and ecological changes that can still be observed these many decades later. The hurricane’s impact was erratic—some swaths of forest were destroyed while others nearby remained unscathed; some stricken forests retain their prehurricane character, others have been transformed. Stephen Long explores these contradictions, drawing on survivors’ vivid memories of the storm and its aftermath and on his own familiarity with New England’s forests, where he discovers clues to the storm’s legacies even now. *Thirty-Eight* is a gripping story of a singularly destructive hurricane. It also provides important and insightful information on how best to prepare for the inevitable next great storm.

Storm of Magic Kyra Halland,2023-01-12 After losing everything else, they found each other. Now Leshi and Esavas are ready to begin their new life together in Yevoruta, the city of the mages. But the battles of the past raised more questions than they answered, questions that themselves must be answered if Esavas and Leshi are to lay the ghosts of the past to rest and find peace in their new life. But beneath the mannered, elegant surface of mage society lies treachery, and the search for those answers could cost Leshi and Esavas everything as they face the difficult - and heart-wrenching - challenge of stopping the evil that threatens to consume the life of their beloved Islands. *Storm of Magic* is the epic conclusion of *Mage of Storm and Sea*. Contains strong language, violence, mature subject matter, and sensual content.

The Storm of the Century Al Roker,2016-08-09 In this gripping narrative history, Al Roker from NBC’s Today and the Weather Channel vividly examines the deadliest natural disaster in American history—a haunting and inspiring tale of tragedy, heroism, and resilience that is full of lessons for today’s new age of extreme weather. On the afternoon of September 8, 1900, two-hundred-mile-per-hour winds and fifteen-foot waves slammed into Galveston, the booming port city on Texas’s Gulf Coast. By dawn the next day, the city that hours earlier had stood as a symbol of America’s growth and expansion was now gone. Shattered, grief-stricken survivors emerged to witness a level of destruction never before seen: Eight thousand corpses littered the streets and were buried under the massive wreckage. Rushing water had lifted buildings from their foundations, smashing them into pieces, while wind gusts had upended steel girders and trestles, driving them through house walls and into sidewalks. No race or class was spared its wrath. In less than twenty-four hours, a single storm had destroyed a major American metropolis—and awakened a nation to the terrifying power of nature. Blending an unforgettable cast of characters, accessible weather science, and deep historical research into a sweeping and dramatic narrative, *The Storm of the Century* brings this legendary hurricane and its aftermath into fresh focus. No other natural disaster has ever matched the havoc caused by the awesome mix of winds, rain, and flooding that devastated Galveston and shocked a young, optimistic nation on the cusp of modernity. Exploring the impact of the tragedy on a rising country’s confidence—the trauma of the loss and the determination of the response—Al Roker illuminates the United States’s character at the dawn of the “American Century,” while also underlining the fact that no matter how mighty they may become, all nations must respect the ferocious potential of our natural environment.
