Abstract Realism ~ A True Story Alexis

Nichele, 2007-10-05 \$5 Ebook below is the same as Abstract Realism. Abstract Realism is a book of true paranormal, telepathic, telekinetic, psychic and other-worldly experiences. The experiences are all mine and all true. I have compiled many strange and sometimes frightening experiences into this book as well as some of my art, photographs, poetry, & social ideologies. I've titled this book Abstract Realism because the truth is stranger than fiction and although true, these experiences are so incredible they seem as if they are fiction. I once had an individual come into the store where I worked and telekinetically bend 2 candles. The book goes into detail about some UFO experiences as well as telepathic & telekinetic experiences. One experience I speak of has to do with controlling the weather. There are credible witnesses. I wanted this book to be fun, enlightening & as unique as its author.

Redesigning English Sharon Goodman, David Graddol, Theresa Lillis, 2020-10-28 This fully updated edition of Redesigning English explores the innovative uses of English from early manuscripts to post-colonial literature, creative writing and developments in new media. Focusing on how English has, and continues to evolve through its global status, there is a strong emphasis on the visual forms of language and communication, and on issues of identity and politics. New chapters for this edition include; what makes English into Art? A tongue for sighing, English manuscripts: the emergence of a visual identity, English in a globalized world.

Samuel Beckett's Abstract Drama Erik Tonning, 2007 Samuel Beckett's Play, written 1962-63, was an aesthetic watershed inaugurating his late, 'abstract' dramatic style. This book gets close to Beckett's creative process by examining the possible influence of Arnold Schoenberg's twelve-tone music and Vassily Kandinsky's abstract painting upon this formal shift; by tracing Beckett's developing attitude to abstraction and its relation to his long-standing preoccupation with the 'breakdown' of the subject-object relation and the ultimate failure of all

expression; and by following his formal choices through manuscript drafts. The author goes on to analyse Beckett's attempt to adapt his new methods to the media of film and television, and to demonstrate how Beckett's late works for stage and screen develop alongside one another right up to his 1985 adaptation of the play *What Where* for television. Throughout the book, unpublished manuscript materials such as Beckett's letters, drafts, notes on philosophy, psychology and art, and his 'German diaries' augment a detailed account of the submerged sources that Beckett appropriated to the evolving needs of his abstract dramatic art.

The Moral of the Story John H. Lockwood,1999 The problem this project attempts to solve is to develop a workable moral education in light of the clash between religious forms of moral education and U.S. Supreme Court decisions concerning them. The concept of story and storytelling has been suggested as a unifying focus for disparate prescriptions for moral education. Several recent approaches to moral storytelling have been proposed. The approaches of William Bennett, Nel Noddings, and Herbert Kohl are among those which have attempted to combine moral education and storytelling within the last decade. Bennett is identified with other theorists whose primary concern is the moral content of a story. Noddings is identified as a process theorist, whose primary concern is the process of moral storytelling, not

the content. Kohl is identified as a reflection theorist, whose approach challenges tradition in the hope of creating a more moral society. Each one of these three approaches attempts to provide a comprehensive program of moral education, but they fall short of that goal. The purpose of this project, then, is to construct a storytelling moral education program that improves upon earlier approaches. Using the three levels of moral thinking posited by R.M. Hare, a three-level approach to moral storytelling is proposed. The intuitive, critical, and meta-ethical levels of moral thinking that Hare refers to are used to frame a new, three-level, approach to moral storytelling. The three-level approach combines content, process, and reflection into a unified prescription for moral education. Thus, a more comprehensive plan for moral education through storytelling is developed, one that respects traditional forms of moral education while remaining within the parameters set by the U.S. Supreme Court.

Leading Transformation Nathan Furr, Kyle Nel, Thomas Zoega Ramsey, 2018-10-16 New Tools to Overcome the Human Barriers to Change Leaders know that their job is to transform their organizations to keep pace with technology and an ever-changing business environment. They also know that they are bound to fail in doing so. But this discouraging prospect is not because they won't be able to solve a technological or strategic problem. Leaders will fail because of intractable human responses associated with change--responses such as fear, ingrained habits, politics, incrementalism, and lack of imagination. These stumbling blocks always arise when we humans are faced with change, but what if we had a way to transcend them? This book reveals a radical new method for doing just that. Written by the executive who designed and implemented it, the neuroscientist who helped make it work, and the academic who explains why it works and how to do it, **Leading Transformation** introduces an innovative yet proven process for creating breakthrough change. Divided into three steps--envisioning the possible, breaking down resistance, and prototyping the future--this process uses cutting-edge tools such as science fiction, cartoons, rap music, artifact trails, and neuroprototypes to overcome people's inability to imagine or react to what doesn't yet exist,

override powerful habits and routines that prevent them from changing, and create compelling narratives about the organization's future and how to get there. Showing how these tools have been used successfully by companies such as Lowe's, Walmart, Pepsi, IKEA, Google, Microsoft, and others, the process revealed in this book gives leaders the means to transcend the human barriers that block change and lead their organizations confidently into the future.
