Across Peter Handke,1986-07 Across is the story of Andreas Loser, a teacher of classical languages and amateur archaeologist living a life of quiet routine in Salzburg. One day, seeing a swastika defacing a beech tree, he tracks down the defacer and commits murder, crossing the invisible boundary between good and evil.

Down and Across Arvin Ahmadi,2018-02-06 John Green fans will appreciate this tale. —USA Today [A] humorous, deeply human coming-of-age story. —The Washington Post Scott Ferdowsi has a track record of quitting. His best friends know exactly what they want to do with the rest of their lives, but Scott can hardly commit to a breakfast cereal, let alone a passion. With college applications looming and his parents pushing him to settle on a “practical” career, Scott sneaks off to Washington, DC, seeking guidance from a famous psychologist who claims to know the secret to success. He never expects an adventure to unfold. But that’s what Scott gets when he meets Fiora Buchanan, a ballsy college student whose life ambition is to write crossword puzzles. When the bicycle she lends him gets Scott into a high-speed chase, he knows he’s in for the ride of his life. Soon, Scott finds himself sneaking into bars, attempting to pick up girls at the National Zoo, and even giving the crossword thing a try—all while opening his eyes to fundamental truths about who he is and who he wants to be.

Two Across Jeffrey Bartsch,2015-08-04 Highly awkward teenager Stanley Owens meets his match in beautiful, brainy Vera Baxter when they tie for first place in the annual National Spelling Bee-and the two form a bond that will change both of their lives. Though their mothers have big plans for them-Stanley will become a senator, Vera a mathematics professor-neither wants to follow these pre-determined paths. So Stanley hatches a scheme to marry Vera in a sham wedding for the cash gifts, hoping they will enable him to pursue his one true love: crossword puzzle construction. In enlisting Vera to marry him, though, he neglects one variable: she's secretly in love with him, which makes their counterfeit ceremony an exercise in misery for her. Realizing the truth only after she's moved away and cut him out of her life, Stanley tries to atone for his mistakes and win her back. But he's unable to find her, until one day he comes across a puzzle whose clues make him think it could only have been created by Vera. Intrigued, he plays along, communicating back to her via his own gridded clues. But will they connect again before it's all too late?

Swimming Across Andrew Grove,2019-08-09 Elegant and concise, this childhood memoir of Andy Grove, one of the pioneers of Silicon Valley, begins in Budapest, Hungary where the author was born into a secular Jewish family in 1936. As a small child, Andris Grof was told, “Jesus Christ was killed by the Jews, and because of that, all of the Jews will be thrown into the Danube.” Grof’s school years were marked by such anti-semitism and interrupted first by the Nazi occupation and then by the post-war Communist regime. He was a good student who excelled at chemistry which he was studying at the University of Budapest when the Hungarian uprising of 1956 persuaded him to “swim across” the border and emigrate to the West. Grove provides an interesting sketch of a boy’s coming of age in a deeply dangerous 20th century Budapest under the control of Nazis and then Communists and concludes the memoir with an account of his escape and eventual resumption of his studies at the City College of New York. “Haunting and inspirational. It should be required reading in schools.” — Tom Brokaw “A poignant memoir... a moving reminder of the meaning of America and the grit and courage of a remarkable young man who became one of America’s phenomenal success stories.” — Henry Kissinger “This honest and riveting account gives a fascinating insight into the man who wroteOnly the Paranoid Survive.” — George Soros “Andy Grove is a tremendous role model, and his book sheds light on his amazing journey. I would choose him as my doubles partner any day!” — Monica Seles “Combines a unique and often harrowing personal experience with the virtues of fiction at its most engrossing — vivid scenes, sharply delineated characters, and an utterly compelling narrative... a wonderful reading experience.” — Richard North Patterson “A poignant tale leading to human courage and hope.” — Elie Wiesel “Grove, the founder and chairman of Intel Corporation, does not whine about his hardships. Instead he recalls ordinary events and matter-of-factly juxtaposes these against the turmoil of midcentury Hungary, creating a subtle though compelling commentary on the power to endure.” — Diane Scharper, The New York Times “Swimming Across tells the childhood stories [Grove] has guarded since first entering the public eye four decades ago... [It] is driven not by executives battling for money and power, but the experiences — some mundane, some extraordinary — of a nonobservant Jewish boy growing up in Hungary through a fascist regime, a Nazi invasion and a Soviet occupation.” — Chris Gaither, The New York Times “ The intelligence, dedication and ingenuity that earned him fame and fortune (he wasTime’s Man of the Year in 1997) are evident early on... Grove’s story stands smartly amid inspirational literature by self-made Americans” — Publishers Weekly “A tight, simply told, extremely intimate memoir... a polished, solid portrait of a particular time and place.” — Kirkus “[A] moving and inspiring memoir... Grove’s account of life in Hungary in the 1950s is a vivid picture of a tumultuous period in world history.” — Booklist

Writing Across the Curriculum Shelley S. Peterson,2008-08-08 As the amount of curriculum in today’s classrooms expands and teaching time seems to shrink, teachers are looking for ways to integrate content area and writing instruction. In this revised and expanded edition of Writing Across the Curriculum, Shelley Peterson shows teachers how to weave writing and content area instruction together in their classrooms. The author provides practical and helpful ideas for classroom teachers and content-area specialists to easily incorporate writer’s workshop while teaching in their subject area. New features in this second edition include: • Websites that can be used to teach writing (e.g., wiki’s, weblogs, and digital storytelling) • Examples from grades 4-8 classrooms that show how science, social studies, health, and mathematics teachers can also be teachers of poetry, narrative, and non-narrative writing • New assessment scoring guides • Information on working with struggling writers and supporting English Language Learners • Graphic organizers, templates, and mini-lessons that engage students in learning

Explaining Health Across the Sciences Jonathan Sholl,Suresh I.S. Rattan,2020-08-28 This edited volume aims to better understand the multifaceted phenomenon we call health. Going beyond simple views of health as the absence of disease or as complete well-being, this book unites scientists and philosophers. The contributions clarify the links between health and adaptation, robustness, resilience, or dynamic homeostasis, and discuss how to achieve health and healthy aging through practices such as hormesis. The book is divided into three parts and a conclusion: the first part explains health from within specific disciplines, the second part explores health from the perspective of a bodily part, system, function, or even the environment in which organisms live, and the final part looks at more clinical or practical perspectives. It thereby gathers, across 30 chapters, diverse perspectives from the broad fields of evolutionary and systems biology, immunology, and biogerontology, more specific areas such as odontology, cardiology, neurology, and public health, as well as philosophical reflections on mental health, sexuality, authenticity and medical theories. The overarching aim is to inform, inspire and encourage intellectuals from various disciplines to assess whether explanations in these disparate fields and across biological levels can be sufficiently systematized and unified to clarify the complexity of health. It will be particularly useful for medical graduates, philosophy graduates and research professionals in the life sciences and general medicine, as well as for upper-level graduate philosophy of science students.

Education Across Borders Patrick Sylvain, Jalene Tamerat, Marie Lily Cerat, 2022-02-22 A critical resource for K-12 educators that serve BIPOC and first-generation students that explores why inclusive and culturally relevant pedagogy is necessary to ensure the success of their students. The practices and values in the US educational system position linguistically, culturally, and socioeconomically diverse children and families at a disadvantage. BIPOC dropout rates and levels of stress and anxiety have linked with non-inclusive school environments. In this collection, 3 educators tell and will draw on their experiences as immigrants and educators to address racial inequity in the classroom and provide a thorough analysis of different strategies that create an inclusive classroom environment. White educators that serve BIPOC students will benefit from these reflections on incorporating culturally relevant pedagogies that value the diverse experiences of their students. With a focus on Haitian and Dominican students in the US, the authors will reveal the challenges that immigrant and first-generation students face. They'll also offer insights about topics such as: • How do language policies and social justice intersect? • How can educators use culturally relevant teaching and community funds of knowledge to enrich school curriculum? • How can educators center the needs of the student within the classroom? • How can educators support Haitian Creole-speaking students?

Bilingualism Across the Lifespan Elena Nicoladis, Simona Montanari, 2016-06-20 This book pioneers the study of bilingualism across the lifespan and in all its diverse forms. In framing the newest research within a lifespan perspective, the editors highlight the importance of considering an individual's age in researching how bilingualism affects language acquisition and cognitive development. A key theme is the variability among bilinguals, which may be due to a host of individual and sociocultural factors, including the degree to which bilingualism is valued within a particular context. Thus, this book is a call for language researchers, psychologists, and educators to pursue a better understanding of bilingualism in our increasingly global society.

Sustainable Human Development Across the Life Course Prerna Banati, 2021-02-24 It is critical that the wellbeing of society is systematically tracked by indicators that not only give an accurate picture of human life today but also provide a window into the future for all of us. This book presents impactful findings from international longitudinal studies that respond to the United Nations' Agenda 2030 commitment to "leave no-one behind". Contributors explore a wide range and complexity of pressing global issues, with emphasis given to excluded and vulnerable populations and gender inequality. Importantly, it sets out actionable strategies for policymakers and practitioners to help strengthen the global Sustainable Development Goals framework, accelerate their implementation and improve the construction of effective public policy.

Animal Movement Across Scales Lars-Anders Hansson, Susanne Akesson, 2014-08-21 Movement, dispersal, and migration on land, in the air, and in water, are pervading features of animal life. They are performed by a huge variety of organisms, from the smallest protozoans to the largest whales, and can extend over widely different distance scales, from the microscopic to global. Integrating the study of movement, dispersal, and migration is crucial for a detailed understanding of the spatial scale of adaptation, and for analysing the consequences of landscape and climate change as well as of invasive species. This novel book adopts a broad, cross-taxonomic approach to animal movement across both temporal and spatial scales, addressing how and why animals move, and in what ways they differ in their locomotion and navigation performance. Written by an integrated team of leading researchers, the book synthesizes our current knowledge of the genetics of movement, including gene flow and local adaptations, whilst providing a future perspective on how patterns of animal migration may change over time together with their potential evolutionary consequences. Novel technologies for tracking the movement of organisms across scales are also discussed, ranging from satellite devices for tracking global migrations to nanotechnology that can follow animals only a millimetre in size. *Animal Movement Across Scales* is particularly suitable for graduate level students taking courses in spatial animal ecology, animal migration, and 'movement ecology', as well as providing a source of fresh ideas and opinions for those already active within the field. It will also be of interest and use to a broader audience of professional biologists interested in animal movements and migrations.

Caregiving Across the Lifespan Ronda C. Talley, Lydia LaGue, 2012-12-22 Most scholars do not consider the long-term nature of caregiving, but rather focus on a specific developmental period (e.g., old age) or a specific disability (e.g., cancer). Yet the most important lessons about caregiving may occur at any age, regardless of disabilities or other limitations. Caregiving is a lifelong process. It begins in a mother's womb, continues throughout the lifespan, and ends after death. *Caregiving Across the Lifespan* emphasizes caregiving as a process that occurs throughout one's life. It discusses infant care, the developmental needs of children and adolescents, the many caregiving issues in adulthood and mid-life, and finally end-of-life care and bereavement. Key coverage includes: Examining caregiving issues across a developmental perspective. Caregiving from infancy through early childhood through end of life. Mid-life and multigenerational bonds and responsibilities. Caregiver identity in older adults. Family caregiving at the end of life. This must-have volume offers a wealth of insights and ideas for researchers, practitioners, and graduate students across the caregiving fields, including psychology, social work, public health, geriatrics and gerontology, and medicine as well as public and education policy makers.

Transport of Molecules Across Microbial Membranes J. K. Broome-Smith, Society for General Microbiology. Symposium, 1999-10-14 This volume details the transport of molecules, large and small, across the membranes of prokaryotic and eukaryotic microbial cells. An international group of contributors unify a diverse range of phenomena with the discussion of the signal peptides that target proteins to particular destinations, and the role of chaperonins. Topics covered include secretion of proteins out of the bacterial cell by Type I, II, and III mechanisms, including the newly recognized bacterial signal recognition pathway in Type II; passage across internal membranes of eukaryotic proteins, whether destined for secretion or en route to internal organelles such as chloroplasts and peroxisomes; how bacteria obtain energy required for solute uptake; the role of phosphorylation and evolutionary relationships of the proteins involved; and efflux pumps for toxic substances in bacterial, animal, and plant cells.

Across the margins Glenda Norquay, Gerry Smyth, 2018-07-30 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The concept of 'margins' denotes geographical, economic, demographic, cultural and political positioning in relation to a perceived centre. This book aims to question the term 'marginal' itself, to hear the voices talking 'across' borders and not only to or through an English centre. The first part of the book examines debates on the political and poetic choice of language, drawing attention to significant differences between the Irish and Scottish strategies. It includes a discussion of the complicated dynamic of woman and nation by Aileen Christianson, which explores the work of twentieth-century Scottish and Irish women writers. The book also explores masculinities in both English and Scottish writing from Berthold Schoene, which deploys sexual difference as a means of testing postcolonial theorizing. A different perspective on the notion of marginality is offered by addressing 'Englishness' in relation to 'migrant' writing in prose concerned with India and England after Independence. The second part of the book focuses on a wide range of new poetry to question simplified margin/centre relations. It discusses a historicising perspective on the work of cultural studies and its responses to the relationship between ethnicity and second-generation Irish musicians from Sean Campbell. The comparison of contemporary Irish and Scottish fiction which identifies similarities and differences in recent developments is also considered. In each instance the writers take on the task of examining and assessing points of connection and diversity across a particular body of work, while moving away from contrasts which focus on an English 'norm'.

Change across Cultures Bruce Bradshaw, 2002-03-01 C. S. Lewis compared the task of ethical inquiry to sailing a fleet of ships; the primary task is avoiding collisions. When introducing cultural change, such collisions are inevitable. Bruce Bradshaw provides expert instruction for navigating these cultural clashes. Bradshaw contends that lasting change comes only through altering the stories by which people live. The Bible is the metanarrative whose altering theme of redemption forms a transcultural ethical basis. Aspects of God's redemption story can change how local cultures think and behave toward the environment, religions, government, gender identities, economics, science, and technology. However, effective change takes place only in a context of reconciliation, Christian community, and mutual learning. A must read for anyone engaged in or preparing for cross-cultural ministry, relief, or development work. The book is also relevant to students of ethics, philosophy, and theology. Numerous real-life examples illustrate the inevitable tensions that occur when cultures and narratives collide.

Malthus Across Nations Gilbert Faccarello,Masashi Izumo,2020-04-24 The writings of Thomas Robert Malthus continue to resonate today, particularly An Essay on the Principle of Population which was published more than two centuries ago. Malthus Across Nations creates a fascinating picture of the circulation of his economic and demographic ideas across different countries, highlighting the reception of his works in a variety of nations and cultures. This unique book offers not only a fascinating piece of comparative analysis in the history of economic thought but also places some of today’s most pressing debates into an accurate historical perspective, thereby improving our understanding of them.

Searching for Life Across Space and Time National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Space Studies Board,2017-09-12 The search for life is one of the most active fields in space science and involves a wide variety of scientific disciplines, including planetary science, astronomy and astrophysics, chemistry, biology, chemistry, and geoscience. In December 2016, the Space Studies Board hosted a workshop to explore the possibility of habitable environments in the solar system and in exoplanets, techniques for detecting life, and the instrumentation used. This publication summarizes the presentations and discussions from the workshop.

Transnational Drug Trafficking Across the Vietnam-Laos Border Hai Thanh Luong,2019-05-06 This book presents the first detailed inquiry into the nature of cross-border drug trafficking between Laos People’s Democratic Republic and Vietnam, using an exploratory approach. It draws upon qualitative and quantitative methods, case studies, interviews and survey data from criminal investigation police and drug-related crimes officers (CIPDRC) from six border provinces which are directly and indirectly involved in investigating these cross-border cases. The author demonstrates that drug markets in Vietnam are not controlled by monopolistic, hierarchical organizations or ‘cartels’ but small structures, based on family ties and fellow-countrymen relations, which are fluid and loosely organized. They are very adaptable and sophisticated with diverse modus operandi and multiple divisions of labour which present particular challenges to law enforcement agencies, which the author discusses.
