Bastard Culture! Mirko Tobias Schäfer, 2011 The computer and particularly the Internet have been represented as enabling technologies, turning consumers into users and users into producers. The unfolding online cultural production by users has been framed enthusiastically as participatory culture. But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices, this book steps beyond the usual framework and analyzes user participation in the context of accompanying popular and scholarly discourse, as well as the material aspects of design, and their relation to the practices of design and appropriation.

Benjamin Now Kevin McLaughlin, Philip Rosen, 2003 The Arcades Project is the unfinished, final work of influential cultural theorist, critic, and historian Walter Benjamin. Until 1999, this huge, unruly manuscript, which provides a more complete picture of the diversity of Benjamin's work than formerly available, had not been fully translated into English. Benjamin Now is the first collection of essays in English to focus on The Arcades Project. While this essential text's title refers to its ostensible subject--the nineteenth-century shopping arcades of Paris--The Arcades Project is a mass of cultural, political, and social material presented in the form of a vast montage. Benjamin Now reconsiders the significance of his theories and writings in light of this final project. The contributors gathered in this special issue--several of whom participated in the translation of The Arcades Project--include leading scholars from modern culture and media studies, comparative literature and literary studies, art history, philosophy, cultural studies, and film studies. Contributors. T. J. Clark, Howard Eiland, Peter Fenves, Tom Gunning, Michael Jennings, Claudia Brodsky Lacour, Kevin McLaughlin, Philip Rosen, Henry Sussman, Lindsay Waters, Samuel Weber, Peter Wollen

Weak Thought Gianni Vattimo, Pier Aldo Rovatti, 2012-09-01 Heralding the beginning of the philosophical dialogue on the concept for which Gianni Vattimo would become best known (and coining its name), this groundbreaking 1983 collection includes foundational essays by Vattimo and Pier Aldo Rovatti, along with original contributions by nine other Italian philosophers influenced by and working within the authors' framework. Dissatisfied with the responses to nineteenth- and twentieth-century European philosophy offered by Marxism, deconstruction, and poststructuralism, Vattimo found in the nihilism of Friedrich Nietzsche an important context within which to take up the hermeneutics of Martin Heidegger and Hans-Georg Gadamer. The idea of weak thought sketched by Vattimo and Rovatti emphasizes a way of understanding the role of philosophy based on language, interpretation, and limits rather than on metaphysical and epistemological certainties--without falling into relativism. To the first English-language edition of this volume, translator Peter Carravetta adds an extensive critical introduction, providing an overview of weak thought and taking stock of its philosophical trajectory over more than a quarter century.

Seeing with Different Eyes Patrick Curry, Angela Voss

, 2009-05-05 Seeing with Different Eyes: Essays in Astrology and Divination represents the cutting-edge of contemporary thought and research on divination. The thirteen authors come from a variety of academic disciplines, ranging from anthropology and classics to English literature and religious studies, and all address the question of divination, astrology and oracles in a spirit of critical but sympathetic inquiry. The emphasis is on a participatory and reflexive approach which is firmly post-positivist, seeking to understand the divinatory act on its own terms within widely varying contexts - ancient Greek and Chaldean philosophy and theurgy, Theravadan Buddhism, Biblical studies, Elizabethan Hermeticism, Jacobean drama, Heideggerian philosophy, Medieval scholasticism, 19th

century occultism, contemporary Guatemalan divination and Western medical practice. The authors are all teachers or researchers in the area of divination and symbolism, which is a new disciplinary focus developing at the University of Kent, Canterbury under the aegis of the MA programme in the Cultural Study of Cosmology and Divination. The essays in this volume originally contributed to an international conference of the same name held there in April 2006.

Creating Value in Financial Services Edward L. Melnick, Praveen R. Nayyer, Michael L. Pinedo, Sridhar Seshadri, 2012-12-06 *Creating Value in Financial Services* is a compilation of state-of-the-art views of leading academics and practitioners on how financial service firms can succeed in today's competitive environment. The book is based on two conferences held at New York University: the first, 'Creating Value in Financial Services', held in March 1997, and the second, 'Operations and Productivity in Financial Services', in April 1998. The book is essentially designed to be a compendium of leading edge thinking and practice in the management of financial services firms. There is no book today that has this focus. It contains ideas that can apply to other service industries. Topics addressed are increasingly important worldwide as the financial services industries consolidate and search for innovative new directions and ways to create value in a fiercely competitive environment.

Transhumanism David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution, by maximizing the use of scientific technologies, to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction, featured in such films as 2001: A Space Odyssey, Blade Runner, the Terminator series, and more recently, The Matrix, Limitless, Her and Transcendence. However, as its adherents hint at in their own publications, transhumanism is an occult project, rooted in Rosicrucianism and Freemasonry, and derived from the Kabbalah, which asserts that humanity is evolving intellectually, towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself, in the form of living machines, or artificial intelligence. Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK-Ultra, the CIA's "mind-control" program. MK-Ultra promoted the "mind-expanding" potential of psychedelic drugs, to shape the counterculture of the 1960s, based on the notion that the shamans of ancient times used psychoactive substances, equated with the "apple" of the Tree of Knowledge. And, as revealed in the movie Lucy, through the use of "smart drugs," and what transhumanists call "mind uploading," man will be able to merge with the Internet, which is envisioned as the end-point of Kabbalistic evolution, the formation of a collective consciousness, or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human knowledge, and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the "God" of occultism, or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.

Iraq's Nuclear Mirage Imad Khadduri, 2003 This book is a testimony of an Iraqi nuclear scientist who worked for the Iraqi Atomic Energy Commission over a period of thirty years. The period covers the peaceful beginnings of the Iraqi nuclear program, its gradual and then sudden turn into a weapon program and its final demise and disintegration. Imad Khadduri elucidates about his educational background, commitment to the Iraqi nuclear program, involvement in its various directions and ultimate disengagement and escape from Iraq. During half a year before the occupation of Iraq, he embarked on a lonely battle to counter the misinformation campaign mounted by the

United States and Britain and fueled by people with questionable credibility.

Digitalization in Open Economies Michael Vogelsang, 2010-03-20 Digital strings are not visible, but affect all economic segments. This book studies the phenomenon of digitalization with the instruments of economics in order to explore the interdependencies between digitalization, economic policy, and macroeconomic variables of open economies. Digitalization is separated into the three components networks, IT services, and digital goods which are then incorporated into macroeconomic models of trade theory in open economies. This approach allows to formally describe the cross-effects between digitalization and macroeconomic variables of a country. Specifically, it is used to analyze interdependencies between macroeconomic variables and networks, IT services, and digital goods, and to determine the challenges of digitalization for economic policy and regulation.

Analysis of Multiple Dependent Variables Patrick Dattalo, 2013-03-14 Multivariate procedures allow social workers and other human services researchers to analyze complex, multidimensional social problems and interventions in ways that minimize oversimplification. This pocket guide provides a concise, practical, and economical introduction to four procedures for the analysis of multiple dependent variables: multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multivariate multiple regression (MMR), and structural equation modeling (SEM). Each procedure will be presented in a way that allows readers to compare and contrast them in terms of (1) appropriate research context; (2) required statistical assumptions, including levels of measurement of variables to be modeled; (3) analytical steps; (4) sample size; and (5) strengths and weaknesses. This invaluable guide facilitates course extensibility in scope and depth by allowing instructors to supplement course content with rigorous statistical procedures. Detailed annotated examples using Stata, SPSS (PASW), SAS, and Amos, together with additional resources, discussion of key terms, and a companion website, make this an unintimidating guide for producers and consumers of social work research knowledge.

Aetia: Introduction, text, and translation Callimachus, Annette Harder, 2012 Callimachus' *Aetia*, written in Alexandria in the third century BC, was an important and influential poem which inspired many later Greek and Latin poets. Papyrus finds show that it was widely read until late antiquity and perhaps well into the Byzantine period. Eventually the work was lost, but thanks to many quotations by ancient authors and substantial papyrus finds a considerable part of it has now been recovered. The aim of the present volumes is to make the *Aetia* newly accessible to readers. Volume 1 comprises an introduction dealing with matters such as the work's composition, contents, date, literary aspects, and its function in the cultural and historical context of third-century BC Alexandria, and a text of all the fragments of the *Aetia* with a translation and critical apparatus; while Volume 2 presents a detailed commentary, including introductions to the separate aetiological stories.

The Substance of Style Virginia Postrel, 2009-03-17 Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying, radically changing how Americans live and work. The twenty-first century has become the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Intelligent, incisive, and thought-provoking, *The Substance of Style* is a groundbreaking portrait of the democratization of taste and a brilliant examination of the way we live now.

The Book of Wonder Lord Dunsany, 2022-01-11 *The Book of Wonder* (1912) is a short story collection by Lord Dunsany. Published at the height of his career, *The Book of Wonder* would influence such writers as J. R. R. Tolkien, Ursula K. Le Guin, and H. P. Lovecraft. Recognized as a pioneering author of fantasy and science fiction, Dunsany is a man whose work, in the words of Lovecraft, remains "unexcelled in the sorcery of

crystalline singing prose, and supreme in the creation of a gorgeous and languorous world of incandescently exotic vision.” The Book of Wonder, Dunsany’s fifth collection of stories, contains fourteen of his finest tales of fantasy and adventure. In “The Hoard of the Gibbelins,” originally published in London weekly The Sketch, is the story of Alderic, a Knight of the Order of the City. Courageous and strong, he ventures to the island realm of the Gibbelins, where a horde of treasure is rumored to be held at the base of a treacherous castle. In “Chu-Bu and Sheemish,” two idols held in the same ancient temple compete for the adoration of their worshippers. As Chu-Bu and Sheemish attempt more and more astounding miracles, they risk striking fear in the hearts of their superstitious people. Humorous and inventive, Dunsany’s tales of high fantasy continue to delight over a century after they first appeared in print. With a beautifully designed cover and professionally typeset manuscript, this edition of Lord Dunsany’s The Book of Wonder is a classic of Irish fantasy fiction reimagined for modern readers.
