Philosophy, Risk and Adventure Sports Mike J. McNamee, 2007-06-11 With interest and participation in extreme and adventure sports growing year on year, the time is ripe for a thoughtful and analytical assessment of this phenomenon from a rigorous philosophical perspective. This collection of essays is the first single-source treatment of adventure sports from an exclusively philosophical standpoint. The text offers students a uniquely focused reader of this burgeoning area of interest and provides scholars with a source book for further studies in this area. Featuring contributions from well-respected writers in the field who each also have personal familiarity of participation in adventure and extreme sports, this is set to become a classic analysis of the intersections between philosophy and extreme experiences, encompassing essential related concepts of elation, danger, death, wilderness and authenticity.

Adventure sports Steve Shipside, 2006-02-28 Remember when marathons were something only a few extraordinary athletes did? Now your neighbour's done one. In a rhino costume. The same is happening across the board of sport as people of all ages realise that paragliding, white water rafting, abseiling, ultra running, wakeboarding and the rest are all entirely possible (and enormous fun) for us mere mortals. Increasingly fringe sports are being sought out not just by thrill seekers, but by those who may have never felt comfortable in traditional sports. Or just those who have never felt comfortable being stereotyped. There is almost no limit to the variety on offer or the different degrees of thrills and risks. This book takes a look at the vast range of adventure sports now on offer and how you can master them while turning up the adrenaline volume in the process.

Adventure Sports Photography Tom Bol, 2011-11-21 Adventure Sports Photography, by renowned photographer and workshop leader Tom Bol, combines personal stories from field experience with expert photo technique. Aspiring outdoor photographers, both adventure sports shooters and outdoor photography enthusiasts, will find this book to be a valuable reference and guide. It covers everything an adventure sports shooter needs to know to get the shot—from packing and organizing gear for an afternoon shoot of rock climbing at the local crag to a month-long sea kayaking expedition. You'll explore composition and creative angles for stunning adventure sports images, and learn in-depth techniques for using speedlights and strobes for creative lighting when you're shooting in the field. This book also shows you how to create a sequence shot and set up an effective digital workflow. In addition to creating environmental portraits, you'll find out how to produce quality video of adventure sports. Tom Bol has been photographing adventure sports for more than 25 years, documenting adventures on every continent, and his work has been published worldwide. He is a regular contributor to Digital Photo magazine, and he's been recognized as one of National Geographic Adventure's "50 of America's Top Visionaries" for his photography. Tom's work has been featured by Elinchrom, LowePro, Manfrotto, and Nikon, and he is a Sandisk Extreme Team member. PDN readers voted Tom one of the photography world's best workshop leaders. He is also an instructor at Kelby Training, Maine Photo Workshops, Photo Quest Adventures, and Strabo Photo Tours.

Extreme Sports and Their Greatest Competitors Britannica Educational Publishing, 2015-01-01 When asked to define what makes a sport extreme, one practitioner—a rock climber in the countryside and a skateboarder in the city—replied, "It's a sport where you may well hurt yourself, or worse." Readers of this compelling book will learn all about these alternative, edgy sports and what it takes to parachute from an airplane, zip-line through the air, or brave the possibility of a flash flood by venturing into a canyon. Or, readers may simply be satisfied to read about the popular X Games, during which they can sit back and watch the pros take the risks.

Surviving the Marathon Des Sables Matt Doeden,2017-08-01 The Marathon des Sables is considered the most grueling foot race on the planet, and you're about to run it. Over six days and some 150 miles in the Sahara Desert, you will make decisions that will test your mettle. These decisions could bring you glory, bring you shame, or even send you to an early grave. Only YOU CHOOSE how this adventure story ends.

Encyclopedia of Extreme Sports Kelly Boyer Sagert,2008-12-30 Students and extreme sport enthusiasts will not only learn about the sports themselves, but also about the techniques, innovations, engineering, and physics behind them. How do ice yachters achieve speeds of up to 150 MPH? What does take to become a pro snowboarder? Other parts of the encyclopedia highlight key areas of study, such as extreme sports and the media, the controversies surrounding, and the impact of extreme sports on our culture. A resource guide of print and electronic sources, competitions, organizations offers students an insider's guide to all things extreme. Inside readers will discover BASE (Building, Antenna tower, Span, Earth) Jumping. What's more dangerous than leaping off of a tall building? Jumping off a structure that's much closer to the ground, and that's exactly what many BASE jumpers regularly do. The risks include malfunctioning parachutes, landing on rocks, into electrical wires and more. Readers will learn about Bhang Gliding, where experienced pilots perform full barrel rolls, inverted maneuvers and other stunt flying moves. It is no longer unusual for an experienced hang glider to travel 200 miles or reach altitudes above 10,000 feet. Coverage also includes information on caving, which involves exploring caves

that travel deep into the earth, mountain biking, and many other sports.

Adventure Sports Coaching Matt Berry, Jane Lomax, Chris Hodgson, 2015-03-24 Coaching adventure sports is part of the core work of many adventure educators but has been largely neglected in the adventure studies literature. This is the first book to link contemporary sports coaching science with adventure sports practice. It examines the unique set of challenges faced by adventure sports coaches, such as the dynamic natural environment and the requirement to train athletes to levels of high performance outside of traditional structures of competition, and explores both key theory and best practice. The book covers key topics such as: Skill acquisition and skill development Models of learning and teaching Performance analysis Tactics and decision-making Training principles Mental skills techniques Goal setting and progression Risk management Each chapter contains applied examples from a range of adventure sports, including mountaineering, rock climbing, canoeing, kayaking, surfing, and winter sport, as well as practical coaching techniques and a guide to further reading. Written by a team of authors with wide experience of coaching, teaching, researching and high performance participation in adventure sports, this book is invaluable reading for any student or practitioner with an interest in adventure, outdoor education, sports coaching or lifestyle sport.

Over the Edge Michael Bane, 1996 *Over the Edge: A Regular Guy's Odyssey in Extreme Sports* is the compelling record of Bane's adventures pushing himself to the limit - by participating in some of the world's most dangerous athletic pursuits. Traveling across the country and around the globe, Bane literally risked life and limb to attack thirteen death-defying sports on his List. From a marathon in the hellish temperatures of Death Valley to whitewater rafting in Honduras, kayaking off a waterfall in New Zealand, diving in Florida's pristine underwater caves, bicycling through the mountains of Colorado at speeds 45 miles per hour, and swimming in shark-infested waters in the first leg of the Escape from Alcatraz triathlon, Bane's journey captures all of the exhilaration, excitement, and fear that have accompanied one man on his journey to the edge and back.

Extreme Sports Medicine Francesco Feletti, 2016-09-19 This technically oriented book on medicine as applied to extreme sports offers broad coverage of the field extending well beyond the usual focus on major trauma and acute injuries. In addition to the injuries and diseases associated with individual extreme sports, this book also addresses the topics of psychology, dermatology, ophthalmology, infectious diseases, physiology, nutrition, training, injury prevention strategies, rehabilitation, doping, treatment in hostile environments, and legal aspects. Innovative and less frequently considered topics are also discussed, such as recent advances in protective equipment and materials, the effects of exposure on whole-body vibration, and cold exposure risk management. More than 60 of the most authoritative experts from across the world have contributed to this book, drawing on their personal experiences and including practical examples whenever relevant. Both subject matter and illustrations have been selected with the utmost care, the latter including photographs of world-class athletes. The book's multidisciplinary approach to the subject ensures that it will be relevant to a wide readership.
