Christina Reuterwall

A Review of the Living Representatives of the Genus Alces Randolph L. Peterson, 1952

Alces and Esel Jamila Siddiqui, 2007-12-03 This hilarious comic is for a not-so-sensitive audience. Featuring Alces, a crack addicted cat/dog type animal and Esel, a (supposedly) gay kangaroo, along with a cast of other bizarre characters.

Alces, moose ecology Jean Bédard, 1975

The Moral Conflict of Law and Neuroscience Peter A. Alces, 2018-01-18 New insights offered by neuroscience have provoked discussions of the nature of human agency and responsibility. Alces draws on neuroscience to explore the internal contradictions of legal doctrines, and consider what would be involved in constructing novel legal regimes based on emerging understandings of human capacities and characteristics not only in criminal law but in contract and tort law.-- Provided by publisher.

A Theory of Contract Law Peter A. Alces, 2011 In the past few decades, scholars have offered positive, normative, and most recently, interpretive theories of contract law. This title confronts the leading interpretive theories of contract and demonstrates their interpretive doctrinal failures.

characteristics, life cycle, and behavior of North American moose.

Trialectic Peter A. Alces, 2023-08-16 Emerging neuroscientific insights are changing our understanding of what it means to be human. The resulting reconceptualization continues to impact law and the fit between law and morality. This book takes account of those developments and suggests that normative theory, particularly in its non-instrumental iterations, will be challenged, most profoundly. If we are, as the science suggests, nothing more than the coincidence of mechanical forces, then law and normative theory that depend on the immaterial and that would draw distinctions between the mental or emotional and the more manifestly physical are misguided, so misguided that they would actually undermine human thriving. Indeed, they already do. The ramifications of that conclusion are profound. Trialectic posits and investigates the impact of those ramifications on law--

Vegetation Response to Prescribed Fire in the Kenai Mountains, Alaska Tina V. Boucher, 2003

Between 1977 and 1997, 4000 ha were burned to promote regeneration of tree and shrub species used for browse by moose (*Alces alces*) in the Kenai Mountains. Species composition was documented along burned and unburned transects at 17 prescribed burn sites. Relationships among initial vegetation composition, physical site characteristics, browse species abundance, and competitive herbaceous vegetation were examined to determine controls on browse species regeneration after prescribed burning. Browse species abundance after burning was inversely related to *Calamagrostis canadensis* Michx. Beauv. (bluejoint reedgrass) abundance prior to burning. *Calamagrostis canadensis* abundance was related to specific landscape characteristics. Depositional slopes, such as fluvial valley bottoms and toe slopes, often featured soils with deep, loamy surface horizons. Sites with these characteristics generally showed large increases in *C. canadensis* cover after prescribed burning, even when *C. canadensis* was a low percentage (3 percent) of the canopy cover prior to burning. The most important preburn variables for predicting postburn browse species abundance were preburn *C. canadensis* cover and the type of surficial deposit. Site conditions that are favorable to *C. canadensis* may be problematic for successful regeneration of browse species, especially if browse species are not present in the initial composition.

Moose Kevin Jackson, 2009-01-15 Its hooves were supposedly a cure for epilepsy; it is the mascot of the Seattle Mariners baseball team and the clothing company Abercrombie & Fitch; and its meat

is a delicacy. The moose is a fascinating but elusive animal of the north, and its little-known natural history is the focus of Kevin Jackson's engaging new book. *Moose* explains moose's biological history and describes its natural environments around the world, including Canada, New England, Alaska, and Scandinavia, where the moose is the national animal of Sweden and Norway. Jackson considers why the moose is really an elk and an elk is a wapiti, and he also looks at the controversy behind the naming of the Irish Elk. *Moose* explores the animal's role in human history since the Stone Age, including the "alces" in Julius Caesar's history of the Gallic Wars and its influence on figures such as poet Ted Hughes and Theodore Roosevelt and his Bull Moose Party. The Rocky and Bullwinkle Show, a 150-foot statue being built in Sweden, and colorful moose lore all appear in this wide-ranging study, making this an essential read for naturalists and moose lovers alike.

Moose Lesley A. DuTemple, 1997-10-01 Describes the physical characteristics, habitat, and behavior of moose.

Terrestrial Cetartiodactyla Luca Corlatti, Frank E. Zachos, 2022-09-29 This volume provides comprehensive overviews of each terrestrial cetartiodactyl species' biology including palaeontology, physiology, genetics, reproduction and development, ecology, habitat and diet. Their economic significance and management, as well as future challenges for research and conservation are also addressed. Each chapter includes a distribution map, a photograph of the animal and

key literature. This authoritative volume of the Handbook of the Mammals of Europe is a timely and detailed compilation of all European terrestrial cetartiodactyls and will appeal to academics and students in mammal research, as well as to professionals dealing with mammal management, including control, use and conservation.
