Twisting tornadoes leveled small towns in Florida. Floods washed out roads and homes in Peru. Severe droughts in Indonesia caused roaring forest fires,

leaving animals starving. Is it possible that all these deadly disasters were caused by the same weather event? Yes, and its name is El Nino. This weather pattern causes a pool of warm water to form in the Pacific Ocean, which impacts climate conditions around the world. El Nino also has a dangerous little sister, La Nina. Author Carmen Bredeson explores the causes and effects of El Nino and La Nina, and looks at stories from survivors and rescue workers that have seen their wrath.

Now, Emily and Zack are able to use their powers to save lives, though Emily is endangering hers in the process and making her parents worry. When a hurricane warning is issued, everyone in town starts preparing for the worst, but hoping for the best. What are the odds of a hurricane actually hitting a small town in Maine? Emily and Zack can't see into the future, so they don't know what's going to happen, but if the hurricane does come and the worst does happen, are a girl and her dog enough to save a town from the destructive power of Mother Nature?

Some may never be able to retire. Investors and savers of every age and stripe will want to pay careful attention to the concentrated wisdom in this book and take proactive steps to protect themselves while there's still time.
