Storm Mdl Edward Allen Littlepage,2017-04-06 Ace was an artist gifted from birth. He could draw anything and did probably twice, and John played guitar like it grew out of his side. I saw faces that just stare. Scenes of this life were captured in everything. I could hear the voices. They whispered to me. A man walked with answers, and he tried to give it away. But no one could carry it, and he died.

Hurricane Katrina Richard Alan Drummond,2020-11-15 This book is a very personal account of my life during a two-week period in August of 2005. The timeframe begins one week prior to Hurricane Katrina, through one week after Hurricane Katrina battered the Northern Gulf of Mexico's entire coastline. The date was, August 29, 2005; the day that became my personal, Defining Moment of Reference. In this book, I will describe the heavy toll of the losses related to my personal relationships that existed at that time, the immeasurable gains of so many new relationships that were forged out of the unexpected human kindness, comfort and love that arose out of the wreckage, and everything that falls somewhere in between all of these things. I will explain how the decisions that I made during this time period, compounded and influenced by the arrival of Hurricane Katrina, affected my life, and the lives of so many people whose existence was intertwined with mine, including, before, during and after this horrific, natural and disastrous event. This is not a story about Hurricane Katrina, although the entire event is described in an incredibly descriptive way that will make you feel as though you are there, with us! I lay out some very personal and traumatic details within this book, but I also explain how many negative occurrences have positive counterparts that balance the scales of life, and I take care to tell about all of these things in very honest and explicit terms. I am sure that I will be judged harshly, by some, and praised by others, as a result of releasing such intimate details about who I am and what is important to me, in this book. But none of that matters to me because the story had to be told, and in this book the entire story is told!

Category 5 Ernest Zebrowski,Judith A. Howard,2007-05-08 The epic story of the real victims of a perfect storm—overwhelmingly the poor—left behind in the aftermath of a deadly hurricane “A riveting new book.” —Tallahassee Democrat “Not simply an historical account of a storm thirty-seven years ago but a living, breathing entity brimming with the modern-day reality that, yes, it can happen again.” —American Meteorological Society Bulletin Fascinating, easy-to-read, yet informative.” —Richmond Times-Dispatch “Almost like sitting in front of the television watching the events unfold. A page-turner from the very first page.” —Ruston Morning Paper “There is much we can all learn from this relevant and highly engaging chronicle.” — Biloxi Sun Herald “A must-read for anyone who wants to take an emotional stroll through the rubble of these Gulf Coast fishing communities and learn what happened.” —Apalachicola Times “Should be required reading for anyone living in the path of these terrible storms.” —Moondance.org As the unsettled social and political weather of summer 1969 played itself out amid the heat of antiwar marches and the battle for civil rights, three regions of the rural South were devastated by the horrifying force of Category 5 Hurricane Camille. Camille’s nearly 200 mile per hour winds and 28-foot storm surge swept away thousands of homes and businesses along the Gulf Coast of Louisiana and Mississippi. Twenty-four oceangoing ships sank or were beached; six offshore drilling platforms collapsed; 198 people drowned. Two days later, Camille dropped 108 billion tons of moisture drawn from the Gulf onto the rural communities of Nelson County, Virginia—nearly three feet of rain in 24 hours. Mountainsides were washed away; quiet brooks became raging torrents; homes and whole communities were simply washed off the face of the earth. In this gripping account, Ernest Zebrowski and Judith Howard tell the heroic story of America’s forgotten rural underclass coping with immense adversity and inconceivable tragedy. Category 5 shows, through the riveting stories of Camille’s victims and survivors, the disproportionate impact of natural disasters on the nation’s poorest communities. It is, ultimately, a story of the lessons learned—and, in some cases, tragically unlearned—from that storm: hard lessons that were driven home once again in the awful wake of Hurricane Katrina. Ernest Zebrowski is founder of the doctoral program in science and math education at Southern University, a historically black university in Baton Rouge, Louisiana, and Professor of Physics at Pennsylvania State University’s Pennsylvania College of Technology. His previous books include *Perils of a Restless Planet: Scientific Perspectives on Natural Disasters*. Judith Howard earned her Ph.D. in clinical social work from UCLA, and writes a regular political column for the Ruston, Louisiana, Morning Paper.

The Beam of Interest Christopher Garfield Allen,2014-02-10 On Saturday 13th September 2014, the world is shaken to learn of the disastrous loss—with all hands—of the British Astute class nuclear attack submarine: HMS Armageddon off the West Coast of Scotland. With the vote for Scottish independence only days away, the Nationalists insist on the decommissioning of the naval facility at Faslane, thus calling the future of the United Kingdom independent nuclear deterrent into question and intensifying the debate for planetary disarmament. With so much at stake, the need is seen for fresh insights, for new ways of thinking. To this end, from around the world, a deeply committed group of people gathers for a residential—like no other—at Blenheim House on the outskirts of Sherwood Forest. Funded by a wealthy philanthropist, the property is equipped with specialized technology and staffed with instructors of the highest calibre. The intention is to take candidates to the very limit of their

physical, psychological and spiritual endurance and beyond. Despite his initial misgivings, a senior student—Michael Stapleton—eventually agrees to represent the School of Consciousness Studies in a struggle towards the goal of what appears to be the most arduous of human undertakings—the attainment of enlightenment. Over a three week period, he comes to understand that the challenges, he must face, are also the key to unravelling the mystery of memory blackouts that threaten his engagement and future happiness. Nevertheless, as the enterprise unfolds, unexplained accidents add to his growing sense of unease as Michael comes to realize that he may well be the next target for those who have no intention of allowing the venture to succeed. The Beam of Interest is a fact based espionage thriller about the development of human consciousness and the phenomenon of amnesia due to the early onset of Alzheimer's disease. Careful research has been undertaken to ensure that the main and sub plot to 'The Beam of Interest' are both factually accurate and credible. In addition, the author has used personal experience, wherever possible, to gain the reader's trust that the varied action sequences, most especially in relation to scuba diving, are authentic. The story is narrated in the first person by Michael Stapleton who is the central character. It begins in the reception hall of the School of Consciousness Studies in Knightsbridge, London on Tuesday September 2014, few days before the crucial vote on Scottish Independence which threatens to break up the United Kingdom following the recent sinking of the British nuclear attack submarine: HMS Armageddon. Michael is a senior student of the SCS and has been invited—out of the blue and without explanation—to attend an interview with the School leader: the formidable Doctor Duncan Bennett. Their meeting turns out to be acrimonious but, nevertheless sets in motion a remarkable sequence of events over the following 12 months leading to Michael's attendance of an extraordinary gathering designed to lead to enlightenment. Other characters in the drama include: Iris Sheridan: who is Michael's fiancée and fellow student. She persuades him to attend the residential despite his initial reluctance to do so. Michael comes to realise how little he knows about her as a colourful past comes to light. Jill Frobisher: who becomes Michael's mentor in the techniques of espionage. Bradley Douglas: who is a former senior member of the SCS, ex SAS officer and lately CEO of Rapier International Ltd, an armaments and private military company. He is in charge of the security for the three week residential on the Blenheim Estate as well as its External Events Coordinator. However, he appears to have an agenda other than its successful outcome. Michael comes to regard Douglas as the most dangerous of adversaries. John Cassidy: an American who is on leave of absence from the Behavioural Analysis Unit of FBI after a controversial operation against domestic terrorists back in the US.

Ominous Hush Sarah Cash, 1994 Explores American painter Martin Johnson Heade's (1819-1904) use of storm imagery as metaphor for the American Civil War.

Blizzard!! the Great White Hurricane Timothy Minnich, 2019-12-30 THE BLIZZARD OF 1888, legendary in the annals of American weather history, was among the most ferocious winter storms ever to pound the Northeast. Many hundreds of people perished on land and sea during its three-day reign of terror, including some 200 in New York City alone - ground-zero for this storm. In his debut novel, Tim Minnich paints a vibrant New York City landscape in the weeks leading up to what has been coined The Great White Hurricane. Bound to fascinate weather enthusiasts, history buffs, and general readers alike, Minnich captures the suspense which culminates in this awesome display of nature, all while vividly depicting life in late Nineteenth Century Manhattan. On Sunday evening March 11th, the denizens of this great metropolis go to sleep completely unaware they'd be awakening to a howling blizzard. All except for young William Roebling, a brilliant meteorologist recently transferred to the New York Office of the US Army's fledgling Signal Service Corps - the agency responsible for the nation's first weather forecasts. Will has painstakingly developed an ingenious system allowing him to predict this historic event days in advance, but his unconvinced Commanding Officer, for political reasons, orders his silence. A conflicted Will feels he must alert his loved ones, and does - only to find himself in a battle for his life at the height of the storm. Minnich deftly combines the drama and excitement of the blizzard with its profound impact on those unfortunate enough to have been caught in its path, simultaneously weaving an engaging tale of true love, faith, and the indomitable human spirit.

Firestorm M. C. Allen, Sara Jones, 2015-10-17 When the lights went out, David found himself at a loss. Across the planet, the simple pleasures of running water and electricity have been wiped out by a coronal mass ejection. The airplanes circling overhead lost power and crashed into the neighborhoods, and the firestorm can only be left to burn out. Follow David as he tries to find a safe haven for his family.

Arctic Storm Rising Dale Brown, 2022 First in a new series from New York Times bestselling author Dale Brown, featuring U.S. Air Force intelligence officer Nick Flynn on the hunt for Russian commandos in the mountains of Alaska. After a CIA covert mission goes badly awry, U.S. Air Force intelligence officer Nicholas Flynn is exiled to guard a remote radar post along Alaska's Arctic frontier. This dead-end assignment is designed to put his career permanently on ice, but Flynn's not the type to fade quietly into obscurity... As winter storms pound Alaska and northern Canada, Russian aircraft begin penetrating deep into friendly airspace. Are these rehearsals for a possible first strike, using Russia's new long-range stealth cruise missiles? Or is some other motive driving the Kremlin to take ever-increasing risks along the hostile Arctic frontier separating two of the world's great powers? When an American F-22 collides with one of the Russian interlopers, things go south fast--in seconds, missiles are fired. There are no survivors. Despite horrific weather, Flynn and his security team are ordered to parachute into the area in a desperate bid to reach the crash sites ahead of the Russians. It's now obvious that the Pentagon and CIA are withholding vital information, but Flynn and his men have no choice but to make the dangerous jump. Soon they're caught in a deadly game of hide-and-seek with Spetsnaz commandos operating covertly on American soil. It seems that the F-22s and their Russian counterparts aren't the first aircraft to have gone missing in these desolate mountains. The Kremlin is hunting for the first prototype of its new stealth bomber--which vanished on what was supposed to be a test flight...while loaded with nuclear-armed stealth cruise missiles. As Russia and the U.S. square off on the brink of all-out-war, it's up to Nick to find the missing bomber...and prevent a potential nuclear holocaust.

Storm-Bound Alan Douglas, 2016-04-07 [...]disagreeably as he accepted the silver quarter Elmer thrust in his grimy palm. All of them bore heavy loads. For the most part these consisted of extra clothes of course for use in case of extreme cold weather; but two of them also carried guns; and Toby had strapped on his pack a pair of snow-shoes his uncle had once presented to him, but which the boy had never found a good chance to use, though he hoped the time had now arrived for putting them to some service. I've been trying to figure things out, Elmer told them,

Isaac's Storm Erik Larson,1999-08-24 At the dawn of the twentieth century, a great confidence suffused America. Isaac Cline was one of the era's new men, a scientist who believed he knew all there was to know about the motion of clouds and the behavior of storms. The idea that a hurricane could damage the city of Galveston, Texas, where he was based, was to him preposterous, an absurd delusion. It was 1900, a year when America felt bigger and stronger than ever before. Nothing in nature could hobble the gleaming city of Galveston, then a magical place that seemed destined to become the New York of the Gulf. That August, a strange, prolonged heat wave gripped the nation and killed scores of people in New York and Chicago. Odd things seemed to happen everywhere: A plague of crickets engulfed Waco. The Bering Glacier began to shrink. Rain fell on Galveston with greater intensity than anyone could remember. Far away, in Africa, immense thunderstorms blossomed over the city of Dakar, and great currents of wind converged. A wave of atmospheric turbulence slipped from the coast of western Africa. Most such waves faded quickly. This one did not. In Cuba, America's overconfidence was made all too obvious by the Weather Bureau's obsession with controlling hurricane forecasts, even though Cuba's indigenous weathermen had pioneered hurricane science. As the bureau's forecasters assured the nation that all was calm in the Caribbean, Cuba's own weathermen fretted about ominous signs in the sky. A curious stillness gripped Antigua. Only a few unlucky sea captains discovered that the storm had achieved an intensity no man alive had ever experienced. In Galveston, reassured by Cline's belief that no hurricane could seriously damage the city, there was celebration. Children played in the rising water. Hundreds of people gathered at the beach to marvel at the fantastically tall waves and gorgeous pink sky, until the surf began ripping the city's beloved beachfront apart. Within the next few hours Galveston would endure a hurricane that to this day remains the nation's deadliest natural disaster. In Galveston alone at least 6,000 people, possibly as many as 10,000, would lose their lives, a number far greater than the combined death toll of the Johnstown Flood and 1906 San Francisco Earthquake. And Isaac Cline would experience his own unbearable loss. Meticulously researched and vividly written, Isaac's Storm is based on Cline's own letters, telegrams, and reports, the testimony of scores of survivors, and our latest understanding of the hows and whys of great storms. Ultimately, however, it is the story of what can happen when human arrogance meets nature's last great uncontrollable force. As such, Isaac's Storm carries a warning for our time.

Blizzard! Jim Murphy,2006-10 For use in schools and libraries only. Presents a history, based on personal accounts and newspaper articles, of the massive snow storm that hit the Northeast in 1888, focusing on the events in New York City.

The Perfect Storm Sebastian Junger,1998 The perfect storm was a once-in-a-hundred-years combination: a high-pressure system from the Great Lakes running into storm winds over an Atlantic island - Sable Island - and colliding with a weather system from the Caribbean - Hurricane Grace. This is the story of that storm, told through the accounts of fishermen at sea caught up in the maelstrom, of their families waiting anxiously for news, and of the rescue services.
