Cuba, Hot and Cold Tom Miller, 2017-10-10 Cuba—mysterious, intoxicating, captivating. Whether you're planning to go or have just returned, Cuba, Hot and Cold is essential for your bookshelf. With a keen eye and dry wit, author Tom Miller takes readers on an intimate journey from Havana to the places you seldom find in guidebooks. A brilliant raconteur and expert on Cuba, Miller is full of enthralling behind-the-scenes stories. His subjects include one of the world's most resourceful master instrument makers, the famous photo of Che Guevara, and the explosion of the USS Maine. A veteran of the underground press of the 1960s, Miller describes the day Cuba's State Security detained him for distributing copies of the United Nations Human Rights Declaration of 1948 and explains how the dollar has become the currency of necessity. His warm reminiscences explain the complexities of life in Cuba. Since his first visit to the island thirty years ago, Miller has shown us the real people of Havana and the countryside, the Castros and their government, and the protesters and their rigor. His first book on Cuba, *Trading with the Enemy*, brought readers into the "Special Period," Fidel's name for the country's period of economic free fall. Cuba, Hot and Cold brings us up to date, providing intimate and authentic glimpses of day-to-day life.

Key Account Management and Planning Noel Capon, 2002-06-15 The vastly increased level of competitive intensity faced by corporations and the increased costs of selling have radically changed the nature of the traditional selling process. Key or strategic accounts have now become a company's most important asset, in some cases supplying in excess of 80 percent of a firm's revenues. Here, in one powerful volume, key account management expert Noel Capon provides the most comprehensive treatment of key account management and planning yet published. For the first time, Capon introduces his breakthrough four-part congruence model of key account management -- a new, thoroughly researched approach to optimally managing your key account portfolio. First, the author shows how to select and conceptualize the key account portfolio; second, how to organize and manage key accounts; third, how to recruit, select, train, retain, and reward key account managers; and fourth, how to formulate and execute strategy and

issues of coordination and control. This congruence model serves as a backdrop as Capon takes the reader step-by-step through the vital functions of key account management including identifying key account criteria, considering the threats and opportunities for the key account, and understanding the roles and responsibilities of critical players. Capon backs up his points with extensive research, real-life stories of successes and failures at a variety of companies, and clarifying figures. Special chapters are devoted to partnering with key accounts and in-depth information on global key account management, an increasingly important weapon for staying ahead of the competition. Timely, important, and essential, Key Account Management and Planning is the only reference handbook those with key account responsibilities will ever need.

Gaslighting, the Double Whammy, Interrogation and Other Methods of Covert Control in Psychotherapy and Analysis Theodore L. Dorpat, 1996-10-28 In treatment, the psychotherapist is in a position of power. Often, this power is unintentionally abused. While trying to embody a compassionate concern for patients, therapists use accepted techniques that can inadvertently lead to control, indoctrination, and therapeutic failure. Contrary to the stated tradition and values of psychotherapy, they subtly coerce patients rather than respect and genuinely help them. The more gross kinds of patient abuse, deliberate ones such as sexual and financial exploitation, are expressly forbidden by professional organizations. However, there are no regulations discouraging the more covert forms of manipulation, which are not even considered exploitative by many clinicians. In this book, noted psychiatrist Theo. L. Dorpat strongly disagrees. Using a contemporary interactional perspective Dorpat demonstrates the destructive potential of manipulation and indoctrination in treatment. This book is divided into three parts. Part I explores the various ways power can be abused. Part II examines eleven treatment cases in which covert manipulation and control either caused analytic failure or severely impaired the treatment process. Cases discussed include the analyses of Dora and the Wolf Man by Freud, the two analyses of Mr. Z by Kohut, as well as other published and unpublished treatments. An interactional perspective is used to examine the harmful short- and long-term effects of using indoctrination methods as well as to unravel conscious and unconscious communications between therapists and patients that can contribute to manipulations. Part III shows readers how to work using a non-directive, egalitarian approach in both psychoanalytic psychotherapy and psychoanalysis.

The Early Settlement of North America Gary Haynes, 2002-11-14 The Early Settlement of North America is an examination of the first recognisable culture in the New World: the Clovis complex. Gary Haynes begins his analysis with a discussion of the archaeology of Clovis fluted points in North America and a review of the history of the research on the topic. He presents and evaluates all the evidence that is now available on the artefacts, the human populations of the time, and the environment, and he examines the adaptation of the early human settlers in North America to the simultaneous disappearance of the mammoths and mastodons. Haynes offers a compelling re-appraisal of our current state of knowledge about the peopling of this continent and provides a significant new contribution to the debate with his own integrated theory of Clovis, which incorporates vital new biological, ecological, behavioural and archaeological data.

Connectivity Conservation Kevin R. Crooks, M. Sanjayan, 2006-11-02 One of the biggest threats to the survival of many plant and animal species is the destruction or fragmentation of their natural habitats. The conservation of landscape connections, where animals, plants, and ecological processes can move freely from one habitat to another, is therefore an essential part of any new conservation or environmental protection plan. In practice, however, maintaining, creating, and protecting connectivity in our increasingly dissected world is a daunting challenge. This fascinating volume provides a synthesis on the current status and literature of connectivity conservation research and implementation. It shows the challenges involved in applying existing knowledge to real-world examples and highlights areas in need of further study. Containing contributions from leading scientists and practitioners, this topical and thought-provoking volume will be essential reading for graduate students, researchers, and practitioners working in conservation biology and natural resource management.

Religion and Place Peter Hopkins, Lily Kong, Elizabeth Olson, 2012-09-14 This unique collection highlights the importance of landscape, politics and piety to our understandings of religion and place. The geographies of religion have developed rapidly in the last couple of decades and this book provides both a conceptual framing of the key issues and debates involved, and rich illustrations through empirical case studies. The chapters span the discipline of human geography and cover contexts as diverse as veiling in Turkey, religious landscapes in rural Peru, and refugees and faith in South Africa. A number of prominent scholars and emerging researchers examine topical themes in each engaging chapter with significant foci being: religious transnationalism and religious landscapes; gendering of religious identities and contexts; fashion, faith and the body; identity, resistance and belief; immigrant identities, citizenship and spaces of belief; alternative spiritualities and places of retreat and enchantment. Together they make a series of important contributions that illuminate the central role of geography to the meaning and implications of lived religion, public piety and religious embodiment. As such, this collection will be of much interest to researchers and students working on topics relating to religion and place, including human geographers, sociologists, religious studies and religious education scholars.

Nineteenth-century Women Seeking Expression Rosemary Lloyd, 2000

The New Russian Book Birgitte Beck Pristed, 2017-10-13 This book takes up the obtrusive problem of visual representation of fiction in contemporary Russian book design. By analyzing a broad variety of book covers, the study offers an absolutely unique material that illustrates a radically changing notion of literature in the transformation of Soviet print culture to a post-Soviet book market. It delivers a profound and critical exploration

of Russian visual imaginary of classic, popular, and contemporary prose. Among all the carelessly bungled covers of mass-published post-Soviet series the study identifies gems from experimental designers. By taking a comparative approach to the clash of two formerly separate book cultures, the Western and the Soviet, that results both in a mixture of highbrow and lowbrow forms and in ideological re-interpretations of the literary works, this book contributes to opening an East-West dialogue between the fields of Russian studies, contemporary book and media history, art, design, and visual studies.

Therapeutic Action Jonathan Lear, 2018-05-01 This book argues that properly understood, irony plays a crucial role in therapeutic action. It is written as an invitation to clinicians to renew their own engagement with the fundamental concepts of their practice. It investigates the concepts of subjectivity and objectivity that are appropriate for psychoanalysts, the concept of internalisation and of transference. It will be of interest to anyone concerned with the central concepts of psychoanalysis.
