No one should go through a hurricane without first reading this book.

📖 **STORM CHASER** Warren Faidley, 1996 Vivid and personal account of confronting some of the planet’s most violent weather.

📖 **BEYOND THE STORMS** Dane S Egli, 2014-12-18 This book deals with both actual and potential terrorist attacks on the United States as well as natural disaster preparedness and management in the current era of global climate change. The topics of preparedness, critical infrastructure investments, and risk assessment are covered in detail. The author takes the reader beyond counterterrorism statistics, better first responder equipment, and a fixation on FEMA grant proposals to a holistic analysis and implementation of mitigation, response, and recovery efforts. The recent Oklahoma tornadoes and West Texas storage tank explosion show the unpredictability of disaster patterns, and the Boston Marathon bombings expose the difficulty in predicting and preventing attacks. Egli makes a compelling case for a culture of resilience by asserting a new focus on interagency collaboration, public-private partnerships, and collective action. Building upon the lessons of the 9/11 attacks, Hurricane Katrina, and the Deepwater Horizon oil spill, the basic findings are supported by a creative mix of case studies, which include Superstorm Sandy, cascading power outages, GPS and other system vulnerabilities, and Japan’s Fukushima disaster with its sobering aftermath. This book will help a new generation of leaders understand the need for smart resilience.

📖 **CATEGORY 7** Bill Evans, Marianna Jameson, 2007-07-10 A Category 4 hurricane, with winds of up to 155 miles per hour, tears roofs off buildings, smashes windows and doors, and can send floodwaters up to the second floor. Evacuation is suggested for up to six miles inland. Hurricane Katrina was a Category 4 when she made landfall. Hurricane Simone is a Category 7—the biggest, strongest storm in recorded history. When she hits New York City, skyscrapers will fall. Subways and tunnels will flood. Lower Manhattan and much of Queens and Brooklyn will disappear under more than thirty feet of water. All along the Eastern Seaboard, towns and cities are being evacuated as wind-driven rain lashes the coast and storm surges crash through seawalls. Roads are packed with fleeing motorists whose cars are jammed with every personal possession that can be crammed in, plus family members, friends, and beloved pets. A huge natural disaster is brewing in the Atlantic. Except that Simone isn’t natural. She’s the product of rogue weather science being wielded by billionaire Carter Thompson as part of a personal vendetta against US President Winslow Benson. Once Carter wanted to bring rain to the desert and feed the starving peoples of the planet. Now he wants to show Benson—and the rest of the world—just how powerful wind and water can be. If technology created Simone, perhaps technology can stop her. It’s up to Kate Sherman, once a member of Carter’s weather team; and Jake Baxter, a weatherman for the CIA, to try, using a secret US Navy weapon. The catch? It has to be deployed inside the hurricane. At the publisher’s request, this title is being sold without Digital Rights Management Software (DRM) applied.

📖 **TORNADO HUNTER** Stefan Bechtel, Tim Samaras, 2009-05-19 Like the deadly tornadoes it documents, this potent combination of high adventure and hard science is terrifyingly timely in our era of global warming and climate change. The Weather Channel, now America’s most watched programming, has in recent years shown us a relentless series of hurricanes, tsunamis, earthquakes, and eruptions killing thousands, turning millions into refugees, and leaving whole cities in shocked, shattered ruins. Of nature’s weapons, tornadoes are among the most unforgiving, and here’s an unforgettable portrait of these storms and one extraordinary man who challenged them—and produced the first-ever photographs snatched from a rampaging twister’s black heart. Tornado chaser Tim Samaras, working with master storyteller Stefan Bechtel, author of Roar of the Heavens, has created a page-turner with narrative force and scientific substance. In the first of five you-are-there accounts, Tornado Hunter opens with a moment-by-moment description of the 2003 catastrophe that engulfed Manchester, South Dakota. The authors evoke the doomed town and its people; the dark menacing funnel; and Samaras’s fearless advance into the whirlwind’s core to deploy the ingenious equipment he devised. They interweave the tornado chaser’s passion, the fascinating science of the storms themselves, and six decades of progress in predicting and recording their onslaught—an art beholden to Samaras’s own groundbreaking inventions. Tim Samaras’s 2004 article in National Geographic became one of the most widely read in the magazine’s history. This powerful book is destined to blast its way onto bestseller lists everywhere.

📖 **STORM** John Withington, 2016-09-15 Gales, cyclones, blizzards, tornados, and hurricanes—few things demonstrate the awesome power of nature like a good storm. Devastating, diverse, and sometimes appearing completely out of nowhere, storms are also a source of both scientific and aesthetic wonder. In this book, John Withington takes an in-depth and unique look at the nature of storms and the impact that they have—both physical and cultural—on our lives. Withington shows how storms have changed the course of human history. From Roman times to the modern day, he shows how their devastating effects have wiped out entire communities, changed the fates of battle, and even reset the entire planet. He also shows how beneficial they have been to us: as an important feature of our atmosphere and climate, but also as a source of inspiration for nearly every artist who has ever lived, from Homer to Rembrandt, in works from the Old Testament to Robinson Crusoe. Beautifully illustrated, this book offers a fascinating look at Earth’s most fearsome events.

📖 **EXTREME WEATHER** Bonnie Schneider, 2012-01-31 Flash floods, tsunamis, earthquakes, hurricanes, mudslides, thunderstorms, and wildfires - these devastating events are happening around the world at an alarming rate. As a meteorologist

on CNN and HLN, Bonnie Schneider reports on these natural disasters, explaining when they’re likely to strike, and telling viewers how to respond when they do. In Extreme Weather, Schneider distills that information into a guide for readers. She interviews experts from a wide variety of agencies – including FEMA and NOAA – to provide a comprehensive understanding of the science behind weather patterns and the latest thinking on how to act in dangerous conditions. Ranging from topics that cover every season and every climate, Schneider introduces the reader to the best course of action during weather emergencies, including: *how to handle extreme weather scenarios in your car, outside, on a boat or at home *how to prepare for potential dangers, such as deadly lightning, when planning a camping trip, vacation or sports outing *what you need to have at home to protect against floods, earthquakes, or severe storms *how to protect your home from rapidly spreading wildfire *how to create a family evacuation plan for different emergencies *making sure your beloved pet is taken care of in time of disaster Drawing on actual survivor stories, Extreme Weather reminds readers that disaster can strike at any time, changing your life forever. *making sure your beloved pet is taken care of in time of disaster Drawing on actual survivor stories, Extreme Weather reminds readers that disaster can strike at any time, changing your life forever.

📖 **Wicked Weather** Warren Faidley, 2018-07-15 For the past 30 years, Warren Faidley has forecast, intercepted, and photographed some of the planet’s most extreme weather and natural disasters. As a photojournalist, natural disaster survival expert, and adventurer, his expeditions have covered countless miles. Along the way, he has witnessed both the dark side and breathtaking beauty of Mother Nature’s mysterious ways. He has journeyed into the heart of darkness as hurricanes Andrew and Katrina brought rage and ruin to thousands. Tornadoes, firestorms, earthquakes, and lightning bolts are forever recorded by his cameras, but his memories are filled with the human elements of hope and survival. In this book, you’ll discover over 150 photographs that chronicle Faidley’s quest to find the perfect image in the midst of total chaos and will read about his adventures in the midst of the roar of an EF5 tornado, grapefruit-size hailstones, severe thunder and lightning storms, forest fires, and more.

📖 **Severe Storms** Greg Roza, 2009-12-15 This book describes how scientists calculate velocity to predict where and when severe storms, such as thunderstorms, blizzards, and tornadoes, will hit.

📖 **Storm Chaser** Jim Reed, 2007-10 Reed presents a beautiful picture book about some of the most powerful--and sometimes deadly--weather phenomena in the world. He shares his best images and experiences as he tracks these storms throughout the country.

📖 **Stormchasers: The Hurricane Hunters and Their Fateful Flight into Hurricane Janet** David Toomey, 2003-06-17 Fifty years after Isaac’s Storm, a riveting story of the first hurricane hunters, and the one crew who paid the ultimate price. In a virtual age when tempests are monitored by global positioning and The Weather Channel, Stormchasers reminds us that our first understanding of hurricanes was directly built on the risks and sacrifices of living, breathing heroes, writes Hampton Sides (author of Ghost Soldiers). In September 1955, Navy Lieutenant Commander Grover B. Windham and a crew of eight flew out of Guam into the eye of Hurricane Janet swirling in the Caribbean: a routine weather reconnaissance mission from which they never returned. In the wake of World War II, the Air Force and the Navy had discovered a new civilian arena where daring pilots could test their courage and skill. These hurricane hunters flew into raging storms to gauge their strength and predict their paths. Without computer, global positioning, or satellite support, they relied on rudimentary radar systems to locate the hurricane’s eye and estimated the drift of their aircraft by looking at windblown waves below. Drawing from Navy documents and interviews with members of the squadron and relatives of the crew, Stormchasers reconstructs the ill-fated mission of Windham’s crew from preflight checks to the chilling moment of their final transmission.

📖 **Category 5** Ernest Zebrowski, Judith A. Howard, 2007-05-08 The epic story of the real victims of a perfect storm—overwhelmingly the poor—left behind in the aftermath of a deadly hurricane “A riveting new book.” —Tallahassee Democrat “Not simply an historical account of a storm thirty-seven years ago but a living, breathing entity brimming with the modern-day reality that, yes, it can happen again.” —American Meteorological Society Bulletin Fascinating, easy-to-read, yet informative.” —Richmond Times-Dispatch “Almost like sitting in front of the television watching the events unfold. A page-turner from the very first page.” —Ruston Morning Paper “There is much we can all learn from this relevant and highly engaging chronicle.” —Biloxi Sun Herald “A must-read for anyone who wants to take an emotional stroll through the rubble of these Gulf Coast fishing communities and learn what happened.” —Apalachicola Times “Should be required reading for anyone living in the path of these terrible storms.” —Moondance.org As the unsettled social and political weather of summer 1969 played itself out amid the heat of antiwar marches and the battle for civil rights, three regions of the rural South were devastated by the horrifying force of Category 5 Hurricane Camille. Camille’s nearly 200 mile per hour winds and 28-foot storm surge swept away thousands of homes and businesses along the Gulf Coast of Louisiana and Mississippi. Twenty-four oceangoing ships sank or were beached; six offshore drilling platforms collapsed; 198 people drowned. Two days later, Camille dropped 108 billion tons of moisture drawn from the Gulf onto the rural communities of Nelson County, Virginia—nearly three feet of rain in 24 hours. Mountainsides were washed away; quiet brooks became raging torrents; homes and whole communities were simply washed off the face of the earth. In this gripping account, Ernest Zebrowski and Judith Howard tell the heroic story of America’s forgotten rural underclass coping with immense adversity and inconceivable tragedy. Category 5 shows, through the riveting stories of Camille’s victims and survivors, the disproportionate impact of natural disasters on the nation’s poorest communities. It is, ultimately, a story of the lessons learned—and, in some cases, tragically unlearned—from that storm: hard lessons that were driven home once again in the awful wake of Hurricane Katrina. Ernest Zebrowski is founder of the doctoral program in science and math education at Southern University, a historically black university in Baton Rouge, Louisiana, and professor of physics at Pennsylvania State University’s Pennsylvania College of Technology. His previous books include Perils of a Restless Planet: Scientific Perspectives on Natural Disasters. Judith Howard earned her Ph.D. in clinical social work from UCLA, and writes a regular political column for the Ruston, Louisiana, Morning Paper.

📖 **In the Path of a Hurricane** Sandy Heitmeier Thompson, 2019-05-07 Brett, Blake, and their neighbor Gavin were having a great time fishing when they learned from their duck friend Mallory that a huge storm was approaching. Mallory is worried and will fly to a safer area with her three little ducklings. The boys rush to find some food to help the ducks and return home to help their families. This story tells us how everyone prepares for the hurricane and how they are going to deal with the aftermath. More importantly, it is a tale of people coming together from all backgrounds and cultures helping each other during a crisis.
