Sound Out and Sort, Grades 1 - 2 Karen Seberg,2010-05-18 Instill a love of language in special-education students in grades 1-2 using Sound Out and Sort. This 160-page book contains information on phonemic awareness, phonics, and word study. Students work with speech sounds, letter-sound correspondences, and letter clusters. Identify and Sort Anson Jose Teboho,2016 The advent of information technology ushered in new forms of political power. Machines play crucial roles in how states see, understand, and act, and scrutiny of these processes lies at the heart of Identify and Sort. It frames debates about IT in world politics, explaining how industrial sorting systems employed by political actors are renegotiating the social contract between individuals and the state. Anson takes the reader on a global expedition that tracks the historical antecedents of digital power, from Aztec and Inca rituals, to medieval filing systems, to a grandiose 1930s design for a German registry, to the databases used in US presidential campaigns and how IT is deployed in war and post-conflict reconstruction. Databases are also deployed virtually to record and act upon people who have no publicly visible identification or group consciousness; modern wars and election campaigns are fought on this individualised terrain. The uneven distribution of these technical capacities engenders inequality of access, while rights discourses and legal frameworks forged in an era of mass group discrimination, subjugation, and public resistance lag behind these micro-targeting practices. Rich in examples and ideas, Identify and Sort develops an analytical model and vocabulary to explain the functions and limits of digital power in world politics.

Projective Techniques and Sort-Based Research Methods Paul M.W. Hackett,James M. Suvak,Ava Gordley-Smith,2023-04-05 Projective Techniques and Sort-Based Research Methods offers a brief introductory guide to the use of these exciting, innovative and often artistic approaches, to students and researchers who have no prior knowledge of these. This book brings together a wide range of examples of projective and mapping techniques that offer the ideal methodology for researchers wishing to collect less controlled and filtered material, that tap the deeper levels of the conscious and sub-conscious to reveal a more profound, richer and hidden level of response. It presents the techniques in a way that will enable the reader to appreciate their nature and to choose an appropriate method for their own research. Information is also provided that allows readers to design and implement their own projective or sort-based approaches. Each of the approaches the authors present are concisely described, and their usages explained, along with references and examples of the applied usage of the technique. The book is valuable reading for researchers from a wide range of academic disciplines from within the social sciences, humanities, business studies, marketing, etc. The book is an introductory guide, but it will be appropriate for use with undergraduate, post-graduate and research students. It will also be of great use to professionals working in the areas of consumer behaviour, marketing and communications.

Knowing, Not-Knowing and Sort-of-Knowing Jean Petrucelli,2018-03-21 A contemporary, wide-ranging exploration of one of the most provocative topics currently under psychoanalytic investigation: the relationship of dissociation to varieties of knowing and unknowing. The twenty-eight essays collected here invite readers to reflect upon the ways the mind is structured around and through knowing, not-knowing, and sort-of-knowing or uncertainty. The authors explore the ramifications of being up against the limits of what they can know as through their clinical practice, and theoretical considerations, they simultaneously attempt to open up psychic and physical experience. How, they ask, do we tolerate ambiguity and blind spots as we try to know? And how do we make all of this useful to our patients and ourselves? The authors approach these and similar epistemological questions through an impressively wide variety of clinical dilemmas (e.g., the impact of new technologies upon the analytic dyad) and theoretical specialties (e.g., neurobiology).

The Life and Sort of Death of Eric Argyle Ross Dungan,2013-12-02 'Eric Argyle was notably surprised when rather unexpectedly his eyes opened again. If truth be told, if he was being honest with himself, he hadn't really expected this type of thing would ever be happening again.' Eric Argyle is having a bad Sunday. It's late. He's still in his pyjamas. A room full of people are staring at him. And he died at 11.42am, two days ago. An issue that people don't seem all that receptive to. Nominated for Best New Play at the Irish Times Theatre Awards, Ross Dungan's *The Life and Sort of Death of Eric Argyle* premiered at the Pleasance Dome in Edinburgh in August 2012 before transferring to Dublin. It debuted in London at the Soho Theatre on 2 April 2013.

How to Gather Information, Take Notes, and Sort Evidence Sara Howell,2013-12-15 Today's students have access to many sources of information. The mere number of sources can be daunting when doing research for a school project. This handy guide explains the advantages of print and digital sources and impresses upon readers the importance of using credible sources. Suggestions for taking and organizing notes are featured, too.

Sort it Out! Barbara Mariconda,2008-01-01 In rhyming text, Pack the Packrat sorts his collection of trinkets in a variety of ways.

Sorting Things Out Geoffrey C. Bowker,Susan Leigh Star,2000-08-25 A revealing and surprising look at how classification systems can shape both worldviews and social interactions. What do a seventeenth-century mortality table (whose causes of death include fainted in a bath, frightened, and itch); the identification of South Africans during apartheid as European, Asian, colored, or black; and the separation of machine- from hand-washables have in common? All are examples of classification—the scaffolding of information infrastructures. In *Sorting Things Out*, Geoffrey C. Bowker and Susan Leigh Star explore the role of categories and standards in shaping the modern world. In a clear and lively style, they investigate a variety of classification systems, including the International Classification of Diseases, the Nursing Interventions Classification, race classification under apartheid in South Africa, and the classification of viruses and of tuberculosis. The authors emphasize the role of invisibility in the process by which classification orders human interaction. They examine how categories are made and kept invisible, and how people can change this invisibility when necessary. They also explore systems of classification as part of the built information environment. Much as an urban historian would review highway permits and zoning decisions to tell a city's story, the authors review archives of classification design to understand how decisions have been made. *Sorting Things Out* has a moral agenda, for each standard and category valorizes some point of view and silences another. Standards and classifications produce advantage or suffering. Jobs are made and lost; some regions benefit at the expense of others. How these choices are made and how we think about that process are at the moral and political core of this work. The book is an important empirical source for understanding the building of information infrastructures.

Let's Sort by Size Lauren Coss,2014-08-01 This Level 2 guided reader teaches how to classify objects by size and sort them into categories. Students will develop word recognition and reading skills while learning how to identify and sort objects by one of their key attributes, size.

The Big Sort Bill Bishop,2009-05-11 The award-winning journalist reveals the untold story of why America is so culturally and politically divided in this groundbreaking book. Armed with startling demographic data, Bill Bishop demonstrates how Americans have spent decades sorting themselves into alarmingly homogeneous communities—not by region or by state, but by city and neighborhood. With ever-increasing specificity, we choose the communities and media that are compatible with our lifestyles and beliefs. The result is a country that has become so ideologically inbred that people don't know and can't understand those who live just a few miles away. In *The Big Sort*, Bishop explores how this phenomenon came to be, and its dire implications for our country. He begins with stories about how we live today and then draws on history, economics, and our changing political landscape to create one of the most compelling big-picture accounts of America in recent memory.

Let's Sort Shapes Lauren Coss,2014-08-01 This Level 2 guided reader teaches how to classify objects by shape and sort them into categories. Students will develop word recognition and reading skills while learning how to identify, compare, and describe shapes and sort them by their key attributes.

Elle McNicoll, author of *A Kind of Spark* 'The beautiful true story of one girl's journey growing up autistic - and the challenges she faced in the 'normal' world' I'm not like the other children in my class . . . and that's an actual scientific FACT.
