Meteorology of Hydrologically Critical Storms in California Robert L. Weaver, 1962

Weather of Southern California Harry P. Bailey, 1975

The Remarkable Weather of Southern California Miguel Miller, 2023-02-21 Yes, even in Southern California, weather is something we experience every day. It is in our conscious or subconscious whenever we wake up, look out a window, venture outside, see or feel the sunshine, hear the swish of wind in the trees or the white noise of rain on the roof. We make decisions, sometimes several times a day, based on a brief thought of weather. We make plans based on the near-term forecast, or long-term climate. Occasionally, we take prompt action to stay safe from it. For something so integral to our lives, how much of it do we understand? Greater understanding of the real, practical meaning of the forecast can inform decisions and plans, affording greater confidence and less frustration. You will gain a greater awareness of how the weather you experience works. You'll understand where forecasts come from, how they're made, and what it means to you.

Complementing Hart's narrative are stunning photos taken by many leading nature photographers, including David Sanger, Galen Rowell, and Betty Randall. 61 illustrations. 31 color plates.

Fire and Rain Stephen LaDochy, Michael Witiw, 2023-10-24 This book shows how California's weather and climate have drastically changed and what we can expect in the near future. California's weather and climate are becoming as common a topic in the media as inflation and wars. It comes into our lives during heat waves when we require more cooling and during droughts when we are asked to limit our use of water. We may not be able to visit state and national parks when fires rage nearby. Indeed, California does have weather. LaDochy and Witiw dispel the erroneous myths about the state's climate in a colorful, entertaining way. California does have seasons. It does rain in Southern California. It is not always sunny and mild throughout the year. And not all El Niños bring abundant rainfall every time throughout the state. These and other myths are discussed and dismissed with the latest science and remarkable vignettes. The authors describe the diversity of the state's physical environment, both natural and man-made and how climate change is currently altering this diverse environment. Climate change, in the past, present and future, continues to influence this most populous state. Yes, California does have weather.

Storm Rising Paula Galvan, 2020-05-17 STORM RISING - BOOK II OF THE LARA CHRONICLES In the eighteen century, the Hoopa Valley was a magical, enchanted place--until one day, an innocent maiden becomes the victim of an unspeakable act of betrayal. Centuries later, in a dirty, snow-filled alley, a young girl dies of a heroin overdose, but before her tragic death, she leaves behind a legacy that fans the flames of jealousy, revenge, and murder that were ignited so long ago on the banks of the Trinity River in that forgotten valley. Fifty-one years later, Lara Coleman, living in Seal Beach, California, knows nothing of these events until a heartbreak accident, a shift in her birthright, and a series of strange occurrences submerge her into a supernatural world she never knew existed. From the sandy beaches of the Pacific Ocean to the dense woods of the Angeles National Forest, a storm is rising, and Lara soon finds herself in the middle of a war that began long before she was born. Will she be strong enough to survive the storm?... And protect her family from an ancient evil?

Storm George R. Stewart, 2003 Sweeping across the Pacific, a devastating storm wreaks havoc on San Francisco and the California coast and then moves relentlessly toward the Sierra Nevada, burying mountain passes and railroad tracks under tons of snow. First published in 1941, Storm presaged trends in literature and ecology that would appear decades later; an engrossing novel constructed by a master storyteller, it delineates an intricate web of humanity, wildlife, and landscape, all interacting in a drama that includes the weather itself in its cast of characters.--Page 4 of cover.

Flash Flood Forecasting Over Complex Terrain National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee to Assess NEXRAD Flash Flood Forecasting Capabilities at Sulphur Mountain, California, 2005-01-28 The nation's network of more than 130 Next Generation Radars (NEXRADS) is used to detect wind and precipitation to help National Weather Service forecasters monitor and predict flash floods and other storms. This book assesses the performance of the Sulphur Mountain NEXRAD in Southern California, which has been scrutinized for its ability to detect precipitation in the atmosphere below 6000 feet. The book finds that the Sulphur Mountain NEXRAD provides crucial coverage of the lower atmosphere and is appropriately situated to assist the Los Angeles-Oxnard National Weather Service Forecast Office in successfully forecasting and warning of flash floods. The book concludes that, in general, NEXRAD technology is effective in mountainous terrain but can be improved.

Storm Surge William Neil Martin, 2001-08-21 Sgt. Garland Flowers, a homicide detective for the Los Angeles County Sheriffs Department, has a dilemma. He loves his wife and he loves his job, but his two loves are not compatible. This conflict is causing the breakup of his marriage and any hopes for a normal home life. The long hours, constant demands of the job, and Garlands preoccupation with his cases have caused the couple to separate. The turmoil in his personal life, though, does not compare with what is in store for him in his latest case. Garland and his partner, Archie Penner, are called to investigate a murder in a ghetto community adjacent to the city of Los Angeles. The scene they encounter resembles a disaster area. The place looks like a cyclone went through it is how the deputy at the scene describes it. A triple murder, including a pre-adolescent girl, has been perpetrated. The apartment has been left in shambles, with furniture thrown about as if by a raging storm. Two of the victims, a man and a woman, are in the master bedroom. The mans neck is broken and the woman has been strangled. Both appear to have been dispatched by an incredibly powerful assailant. In the other bedroom is their child, the product of a racially mixed marriage. The body of the child is neatly laid out in repose. She

has been smothered. No items in the room have been displaced ... quite a contrast from the other rooms. Further assessment of the crime scene rules out robbery as a motive. Could this crime have been racially motivated? The crime has all the earmarks of an act of personal rage. With little to go on, no fingerprints, no witnesses or other clues as to the perpetrators identity or motive, the detectives have no place to turn. That is, until another multiple homicide two weeks later gives Flowers his first break. A thumbprint has been lifted from the second crime scene. The fingerprint identifies the suspect as a man by the name of B.C. Jones, a recent parolee from Soledad Prison. Jones is six feet six inches in height and weighs 280 pounds, and none of it is fat. His chest and arms are massive. For six years he has been lifting weights in prison, where he was sent for killing his father. He committed the crime with his bare hands. Jones is a mulatto, the product of a black father and a white mother. He is also simple-minded, having endured a childhood of constant physical abuse. He is a social outcast, and is extremely bitter about his racially mixed blood. In his mind, his lack of racial identity is the root of all of his problems, and he feels compelled to do something about it. During the course of the investigation Sgt. Flowers pieces together the psychological puzzle that motivates Jones to commit these murders. Meanwhile, Jones discovers that he has been named as the suspect in these crimes and flees to the home of his only known relative, an aunt who lives in Gulfport, Mississippi. While staying with her he is arrested for a minor offense. A routine record check is made, and the Gulfport Police Department learns that Jones is wanted for murder in Los Angeles. The L. A. County Sheriffs Department is immediately notified. Sgt. Flowers is assigned the task of traveling to Mississippi to pick up the prisoner and return him to Los Angeles for trial. The Deep South is not a place Flowers has ever given any thought of visiting. After all, this is 1969, and desegregation is still new to these parts ... and Garland Flowers happens to be black. Born and reared in California, he has heard horrifying stories of how blacks are treated in the South, and is concerned about the kind of cooperation and assistance he will receive from the Southern law enforcement officers. But his reception is not what he expects. The absence of racial prejudice that he encounters upon
