Animation & Cartoons Nicolae Sfetcu, 2014-05-07 An animated cartoon is a short, hand-drawn (or made with computers to look similar to something hand-drawn) moving picture for the cinema, TV or computer screen, featuring some kind of story or plot. Animation is the optical illusion of motion created by the consecutive display of images of static elements. In film and video production, this refers to techniques by which each frame of a film or movie is produced individually. Computer animation is the art of creating moving images via the use of computers. It is a subfield of computer graphics and animation. Anime is a medium of animation originating in Japan, with distinctive character and background aesthetics that visually set it apart from other forms of animation. An animated cartoon is a short, hand-drawn (or made with computers to look similar to something hand-drawn) moving picture for the cinema, TV or computer screen, featuring some kind of story or plot (even if it is a very short one). Manga is the Japanese word for comics and print cartoons. Outside of Japan, it usually refers specifically to Japanese comics. Special effects (abbreviated SPFX or SFX) are used in the film, television, and entertainment industry to visualize scenes that cannot be achieved by normal means, such as space travel. Stop motion is a generic general term for an animation technique which makes static objects appear to move.

Ajax (Disney) Frederic P. Miller, Agnes F. Vandome, John McBrewster, 2010-08-14 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Ajax Corporation is a fictional corporation in the Disney universe. It is a parody of the Acme Corporation made famous by Warner Bros. Ajax has appeared regularly on the shows Mickey Mouse Works and House of Mouse. An early appearance of the Ajax Corporation can be seen in the 1937 Mickey Mouse short Lonesome Ghosts, starring Mickey Mouse, Donald Duck, and Goofy. In this short cartoon the trio are working in an office with a door labelled Ajax Ghost Exterminators; Day & Night Service. A gorilla named Ajax also appeared in various Donald Duck cartoons during

the 1940s.

Cartoon Animation Preston Blair, 1994-01-01 In *Cartoon Animation*, acclaimed cartoon animator Preston Blair shares his vast practical knowledge to explain and demonstrate the many techniques of cartoon animation. By following his lessons, you can make any character—person, animal, or object—come to life through animated movement! Animation is the process of drawing and photographing a character in successive positions to create lifelike movement. Animators bring life to their drawings, making the viewer believe that the drawings actually think and have feelings. *Cartoon Animation* was written by an animator to help you learn how to animate. The pioneers of the art of animation learned many lessons, most through trial and error, and it is this body of knowledge that has established the fundamentals of animation. This book will teach you these fundamentals. Animators must first know how to draw; good drawing is the cornerstone of their success. The animation process, however, involves much more than just good drawing. This book teaches all the other knowledge and skills animators must have. In chapter one, Preston Blair shows how to construct original cartoon characters, developing a character's shape, personality, features, and mannerisms. The second chapter explains how to create movements such as running, walking, dancing, posing, skipping, strutting, and more. Chapter three discusses the finer points of animating a character, including creating key character poses and in-betweens. Chapter four is all about

dialogue, how to create realistic mouth and body movements, and facial expressions while the character is speaking. There are helpful diagrams in this chapter that show mouth positions, along with a thorough explanation of how sounds are made using the throat, tongue, teeth, and lips. Finally, the fifth chapter has clear explanations of a variety of technical topics, including tinting and spacing patterns, background layout drawings, the cartoon storyboard, and the synchronization of camera, background, characters, sound, and music. Full of expert advice from Preston Blair, as well as helpful drawings and diagrams, *Cartoon Animation* is a book no animation enthusiast should be without.

Think Pink: The Story of Depatie-Freleng Mark Arnold, 2015-10-30 *Think Pink! The Depatie-Freleng Story* In 1963, Warner Bros. closed down their long-running cartoon facility that had produced such memorable merrymakers as the Looney Tunes and Merrie Melodies cartoons. Director/producer Friz Freleng and executive David H. DePatie faced unwanted early retirement. A generous parting gesture from a Warner executive allowed Freleng and DePatie to lease the former Warner cartoons studio on California Street in Burbank, complete with equipment and supplies, for a few dollars each year. They teamed up to create animated cartoons for advertising, but not everything behind their enterprise was enchanting. They struggled to keep their small animation studio running against odds and obstacles such as rising costs, heavy competition, outsourcing of labor to other countries, strikes, death, changing directions, and buyouts. They never anticipated how they would soon style a series of cartoon characters that would paint memorable colors over movie animation history. When director Blake Edwards produced *The Pink Panther* starring David Niven, Peter Sellers, Robert Wagner, Capucine, and Claudia Cardinale, he envisioned a cartoon character of the same name to illustrate the opening credits sequence. Edwards hired Freleng and

DePatie, together with artists at their DePatie-Freleng Enterprises studio, to design the animated sequence. The crafty magenta furry feline minced his way into moviegoer's hearts. The inspiration behind the ink was the people that worked at the DePatie-Freleng Enterprises (DFE) animation studio. Their hilarious cartoons caused a generation of moviegoers to rock theaters with laughter. Author Mark Arnold returns you to the nostalgic memories of the exhilarating Pink Panther series and other cartoons DFE created. Discover the craftsmen behind the cartoons in an exciting exploration of the Pink Panther, Inspector Clouseau, Ant and the Aardvark, Cat in the Hat, The Grinch, The Lorax, Doctor Dolittle, Spider-Man, Spider-Woman, Mr. Magoo, The Fantastic Four, Planet of the Apes, Doctor Snuggles, Baggy Pants, The Nitwits, The Barkleys, The Houndcats, The Grump, The Super Six, Super President, Spy Shadow, Hoot Kloot, Blue Racer, Crazylegs Crane, Misterjaw, Tijuana Toads, The Dogfather, The Oddball Couple, Charlie the tuna, David DePatie, Friz Freleng, Blake Edwards, Peter Sellers, and various animators. Over 400 photos and illustrations. Indexed. Appendixes. About the author: Mark Arnold is a comic book and animation historian. He has written for various magazines, including Back Issue, Alter Ego, Hogan's Alley, Comic Book Artist, and Comic Book Marketplace. He is the author of seven other books, including two about Harvey Comics, two about Cracked magazine, one about TTV (Underdog), one about The Beatles, and one about Disney. He also helped Craig Yoe with a book about Archie. He has also performed commentary for the Underdog, Tennessee Tuxedo, and Casper DVD sets for Shout Factory. He is currently at work on a book about Dennis the Menace. He lives in Eugene, OR. . . . DFE's cartoons will continue to bring amusement and delight to millions of future cartoon enthusiasts to come! I would like to thank Mark for including me in the writing of his fantastic book. - Art Leonardi, Animator, DePatie-Freleng Enterprises. Think Pink! is an impressive result of exhaustive research . .

. Arnold's efforts help the reader to further connect the dots from Yosemite Sam to the Pink Panther to Spider-Man. - Bryan Stroud, writer, Back Issue magazine.

Animated Cartoons E. G. Lutz, 2015-08-08 Excerpt from *Animated Cartoons: How They Are Made, Their Origin and Development* We learn through the functioning of our senses; sight the most precious shows us the appearance of the exterior world. Before the dawn of pictorial presentation, man was visually cognizant only of his immediate or present surroundings. On the development of realistic picturing it was possible, more or less truthfully, to become acquainted with the aspect of things not proximately perceivable. The cogency of the perceptive impression was dependent upon the graphic faithfulness of the agency - a pictorial work - that gave the visual representation of the distant thing. It is by means of sight, too, that the mind since the beginning of alphabets has been made familiar with the thoughts and the wisdom of the past and put into relationship with the learning and reasoning of the present.
