Battle Story: Gallipoli 1915 Peter Doyle,2011-09-30 The Gallipoli campaign was in some ways the brainchild of First Lord of the Admiralty, Winston Churchill, who saw an attack on the Dardanelles as a way to break through the stalemate in supplying the Eastern Front. The preceding naval campaign led many to believe that victory was inevitable. However, increased losses at sea prompted the Allies to send ground troops to invade and eliminate the Ottoman artillery. These ground forces comprised a large ANZAC (Australian and New Zealand) contingent and Gallipoli would be their first major campaign in the war. They invaded on 25 April 1915, landing on 5 stretches of beach in open boats. The casualties from the first landing were horrific, of the first 200 men out of the boats, only 21 reached inland, the rest were mown down by the Ottoman machine-guns. Throughout the campaign losses were severe, with both sides suffering casualties in excess of 200,000 troops. Eventually the Allies were forced to evacuate. The fall out from this disaster was felt in both military and political circles. Battle Story Gallipoli takes you to the frontline and beyond, ensuring that you will appreciate the ultimate sacrifice made by these WW1 soldiers.

Hunter Story Martin W. Bowman,2012-02-29 One of the world's greatest aircraft, for three decades pilots enthused about the Hunter and its smooth lines, Rolls-Royce Avon engine, outstanding handling characteristics and lively performance. Designed by Sir Sydney Camm, the genius behind the Hurricane, work on the Hunter commenced late in 1948, but the post-war economic situation in Britain delayed its first flight until 20 July 1951. In September 1953 Neville Duke piloted a Hunter to shatter the world speed record. This book traces the history of the Hunter across RAF and worldwide service, from design and development to the glory days and the unforgettable aerobatic displays with the Black Knights, Black Arrows and Blue Diamonds. A real pilot's aeroplane, the Hunter reigned supreme for fifty years, with the last example retired in July 2001.

Charles N. Hunter and Race Relations in North Carolina John H. Haley,2014-07-02 Charles N. Hunter, one of North Carolina's outstanding black reformers, was born a slave in Raleigh around 1851, and he lived there until his death in 1931. As public school teacher, journalist, and historian, Hunter devoted his long life to improving opportunities for blacks. A political activist, but never a radical, he skillfully used his journalistic abilities and his personal contacts with whites to publicize the problems and progress of his race. He urged blacks to ally themselves with the best of the white leaders, and he constantly reminded whites that their treatment of his race ran counter to their professed religious beliefs and the basic tenets of the American liberal tradition. By carefully balancing his efforts, Hunter helped to establish a spirit of passive protest against racial injustice. John Haley's compelling book, largely based on Hunter's voluminous papers, affords a unique opportunity to view race relations in North Carolina through the eyes of a black man. It also provides the first continuous survey of the black experience in the state from the end of the Civil War to the Great Depression, an account that critiques the belief that race relations were better in North Carolina than in other southern states.

Stories I Tell Myself Juan F. Thompson,2016-01-05 Hunter S. Thompson, “smart hillbilly,” boy of the South, born and bred in Louisville, Kentucky, son of an insurance salesman and a stay-at-home mom, public school-educated, jailed at seventeen on a bogus petty robbery charge, member of the U.S. Air Force (Airmen Second Class), copy boy for Time, writer for The National Observer, et cetera. From the outset he was the Wild Man of American journalism with a journalistic appetite that touched on subjects that drove his sense of justice and intrigue, from biker gangs and 1960s counterculture to presidential campaigns and psychedelic drugs. He lived larger than life and pulled it up around him in a mad effort to make it as electric, anger-ridden, and drug-fueled as possible. Now Juan Thompson tells the story of his father and of their getting to know each other during their forty-one fraught years together. He writes of the many dark times, of how far they ricocheted away from each other, and of how they found their way back before it was too late. He writes of growing up in an old farmhouse in a narrow mountain valley outside of Aspen—Woody Creek, Colorado, a ranching community with Hereford cattle and clover fields . . . of the presence of guns in the house, the boxes of ammo on the kitchen shelves behind the glass doors of the country cabinets, where others might have placed china and knickknacks . . . of climbing on the back of Hunter's Bultaco Matador trail motorcycle as a young boy, and father and son roaring up the dirt road, trailing a cloud of dust . . . of being taken to bars in town as a small boy, Hunter holding court while Juan crawled around under the bar stools, picking up change and taking his found loot to Carl's Pharmacy to buy Archie comic books . . . of going with his parents as a baby to a Ken Kesey/Hells Angels party with dozens of people wandering around the forest in various stages of undress, stoned on pot, tripping on LSD . . . He writes of his growing fear of his father; of the

arguments between his parents reaching frightening levels; and of his finally fighting back, trying to protect his mother as the state troopers are called in to separate father and son. And of the inevitable—of mother and son driving west in their Datsun to make a new home, a new life, away from Hunter; of Juan’s first taste of what “normal” could feel like . . . We see Juan going to Concord Academy, a stranger in a strange land, coming from a school that was a log cabin in the middle of hay fields, Juan without manners or socialization . . . going on to college at Tufts; spending a crucial week with his father; Hunter asking for Juan’s opinion of his writing; and he writes of their dirt biking on a hilltop overlooking Woody Creek Valley, acting as if all the horrible things that had happened between them had never taken place, and of being there, together, side by side . . . And finally, movingly, he writes of their long, slow pull toward reconciliation . . . of Juan’s marriage and the birth of his own son; of watching Hunter love his grandson and Juan’s coming to understand how Hunter loved him; of Hunter’s growing illness, and Juan’s becoming both son and father to his father . . .

The Rise of the English Prep School Donald Leinster-Mackay,2021-12-16 First published in 1984, The Rise of the English Prep School was written to provide the first general history of the English Preparatory School. The book examines how two types of English schools with largely different beginnings, one based on private enterprise and one primarily (but by no means exclusively) on philanthropy, came to be complementary parts of the ‘English Public School system’. It explores the early beginnings of prep or quasi-prep schools in the eighteenth century and their development in the nineteenth and twentieth centuries. The Rise of the English Prep School will appeal to those with an interest in the history of education, and British social history.

The History of Foreign Investment in the United States to 1914 Mira Wilkins,1989 From the colonial era to 1914, America was a debtor nation in international accounts--owing more to foreigners than foreigners owed to us. By 1914 it was the world's largest debtor nation. Mira Wilkins provides the first complete history of foreign investment in the United States during that period. The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation's development, covering both portfolio and direct investment. The immense new wave of foreign investment in the United States today, and our return to the status of a debtor nation--once again the world's largest debtor nation--makes this strong exposition far more than just historically interesting. Wilkins reviews foreign portfolio investments in government securities (federal, state, and local) and in corporate stocks and bonds, as well as foreign direct investments in land and real estate, manufacturing plants, and even such service-sector activities as accounting, insurance, banking, and mortgage lending. She finds that between 1776 and 1875, public-sector securities (principally federal and state securities) drew in the most long-term foreign investment, whereas from 1875 to 1914 the private sector was the main attraction. The construction of the American railroad system called on vast portfolio investments from abroad; there was also sizable direct investment in mining, cattle ranching, the oil industry, the chemical industry, flour production, and breweries, as well as the production of rayon, thread, and even submarines. In addition, there were foreign stakes in making automobile and electrical and nonelectrical machinery. America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts.
