Death by Food Pyramid Denise Minger,2013 Warning: Shock and outrage will grip you as you dive into this one-of-a-kind exposé. Shoddy science, sketchy politics and shady special interests have shaped American Dietary recommendations--and destroyed our nation's health--over recent decades. The phrase Death by Food Pyramid isn't shock-value sensationalism, but the tragic consequence of simply doing what we have been told to do by our own government--and giant food profiteers--in pursuit of health. In *Death by Food Pyramid*, Denise Minger exposes the forces that overrode common sense and solid science to launch a pyramid phenomenon that bled far beyond US borders to taint the eating habits of the entire developed world. Denise explores how generations of flawed pyramids and plates endure as part of the national consciousness, and how the one size fits all diet mentality these icons convey pushes us deeper into the throes of obesity and disease. Regardless of whether you're an omnivore or vegan, research junkie or science-phobe, health novice or seasoned dieter, *Death by Food Pyramid* will reframe your understanding of nutrition science, and inspire you to take your health, and future, into your own hands.

Roman Architecture in Provence James C. Anderson, jr.,James C. Anderson,2013 This book provides a survey of the architecture and urbanism of Provence during the Roman era. Provence, or Gallia Narbonensis as the Romans called it, was one of the earliest Roman colonies in Western Europe. In this book, James C. Anderson, jr. examines the layout and planning of towns in the region, both those founded by the Romans and those redeveloped from native settlements. He provides an in-depth study of the chronology, dating, and remains of every type of Roman building for which there is evidence in Provence. The stamp of Roman civilization is apparent today in such cities as Orange, Nimes, and Arles, where spectacular remains of bridges, theaters, fora, and temples attest to the sophisticated civilization that existed in this area during the imperial period and late antiquity. This book focuses on the remains of buildings that can still be seen, exploring decorative elements and their influence from Rome and local traditions, as well as their functions within the urban environment.

The Rose & the Dagger Renée Ahdieh,2017-04-04 The #1 New York Times bestselling sequel to the breathtaking bestseller *The Wrath and the Dawn* A satisfying fast-paced conclusion, Ahdieh explores the difficulty of family, lasting loyalty, and love giving you a tale you won't soon forget.--InStyle In a land on the brink of war, Shahrzad has been torn from the love of her husband Khalid, the Caliph of Khorasan. She once believed him a monster, but his secrets revealed a man tormented by guilt and a powerful curse—one that might keep them apart forever. Reunited with her family, who have taken refuge with enemies of Khalid, and Tariq, her childhood sweetheart, she should be happy. But Tariq now commands forces set on destroying Khalid's empire. Shahrzad is almost a prisoner caught between loyalties to people she loves. But she refuses to be a pawn and devises a plan. While her father, Jahandar, continues to play with magical forces he doesn't yet understand, Shahrzad tries to uncover powers that may lie dormant within her. With the help of a tattered old carpet and a tempestuous but sage young man, Shahrzad will attempt to break the curse and reunite with her one true love.

From Neurons to Neighborhoods National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on Integrating the Science of Early Childhood Development,2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of expertise. The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about brain wiring and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

Existing Default Values and Recommendations for Exposure Assessment Nordic Council of Ministers,2012-04 Abstract: Default values are often used in exposure assessments e.g. in modelling because of lack of actually measured data. The quality of the exposure assessment outcome is therefore heavily dependent on the validity and representativeness this input data. Today the used default factors consist of a wide range of more or less well-documented values originating from many different sources. The purpose of this report is to give an overview and to evaluate exposure factors that are currently used by the authorities and industry in the exposure assessments for both adults (occupational and consumer exposure) and children in relation to REACH. Another important purpose of the report is to contribute towards a further harmonisation of exposure factors by giving recommendations of most valid and representative defaults. These recommendations can be used besides REACH also in biocide's and plant protection

product's exposure assessments. The exposure default values were collected from the relevant European sources (ECHA, Consexpo, EUSES, Biocide TNsG, ECETOC, ExpoFacts) as well as from WHO and US-EPA. The following key default factors selected to the evaluation: body weight, body surface area, inhalation rate, soil and dust ingestion, drinking water, food intake, non-dietary ingestion factors, lifetime expectancy, activity factors and consumer products

The Politics of Species Raymond Corbey, Annette Lanjouw, 2013 The assumption that humans are cognitively and morally superior to other animals is fundamental to social democracies and legal systems worldwide. It legitimises treating members of other animal species as inferior to humans. The last few decades have seen a growing awareness of this issue, as evidence continues to show that individuals of many other species have rich mental, emotional and social lives. Bringing together leading experts from a range of disciplines, this volume identifies the key barriers to a definition of moral respect that includes nonhuman animals. It sets out to increase concern, empathy and inclusiveness by developing strategies that can be used to protect other animals from exploitation in the wild and from suffering in captivity. The chapters link scientific data with normative and philosophical reflections, offering unique insight into controversial issues around the ethical, political and legal status of other species--

Forty Studies that Changed Psychology Roger R. Hock, 2005 This unique book closes the gap between psychology books and the research that made them possible. Its journey through the "headline history" of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.

The Poetics of Late Latin Literature Ja Elsner, Jesús Hernández Lobato, 2017 For a host of reasons, traditionalist scholarship has failed to give a full and positive account of the formal, aesthetic and religious transformations of ancient poetics in Late Antiquity. This collection of new essays attempts to capture the vibrancy of the living ancient tradition reinventing itself in a new context in the hands of a series of great Latin writers of the fourth and fifth centuries AD.

Touch of Power Maria V. Snyder, 2018-03-12 A magic healer must journey to cure a sick prince in this fantasy adventure series launch by the New York Times–bestselling author of the Study series. Laying hands upon the injured and dying, Avry of Kazan absorbs their wounds and diseases into herself. But rather than being honored for her skills, she is hunted. Healers like Avry are accused of spreading the plague that has decimated the Fifteen Realms, leaving the survivors in a state of chaos. Stressed and tired from hiding, Avry is abducted by a band of rogues who, shockingly, value her gift above the golden bounty offered for her capture. Their leader, an enigmatic captor-protector with powers of his own, is unequivocal in his demands: Avry must heal a plague-stricken prince—leader of a campaign against her people. As they traverse the daunting Nine Mountains, beset by mercenaries and magical dangers, Avry must decide who is worth healing and what is worth dying for. Because the price of peace may well be her life . . . Originally published in 2010 Praise for Touch of Power "Filled with Snyder's trademark sarcastic humor, fast-paced action and creepy villainy, Touch of Power is a spellbinding romantic adventure that will leave readers salivating for the next book in the series." —USA Today "A great read, it had a great adventure, a likable heroine, a band of merry men and the exasperating yet sexy Kerrick." —Under the Covers Book Blog

Alhacen on Image-formation and Distortion in Mirrors: Introduction and Latin text Alhazen, A. Mark Smith, 2008 Smith (history, U. of Missouri) is working his way through Alhacen's (965-1039) study of reflection, which is a Medieval Latin version of ibn al-Haytham's Kitab al-Manazir. Book Six concludes the work by focusing on image distortion, applying the cathetus rule to an analysis of the various misperceptions that arise in the seven types

of mirrors he studies in the two previous books. The first volume contains the introduction and Latin text; the second contains the English translation, a Latin-English and glossary, and the bibliography and general index. The volumes are numbered consecutively; the figures appear in both.

Daniel Goleman Omnibus Daniel Goleman, 2004 Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

Archaeology with Art Helen Chittock, Joana Valdez-Tullett, 2016-12-12 Based on a 2013 Theoretical Archaeology Group (TAG) conference session, this book aims to merge the perspectives of artists and archaeologists on making art. It explores the relationship between archaeology and art practice, the interactions between materials and practitioners, and the processes that result in the objects and images we call 'art'.

A Thesaurus of English Word Roots Horace Gerald Danner, 2014-03-27 Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

De Sphaera of Johannes de Sacrobosco in the Early Modern Period Matteo Valleriani, 2020-01-01 This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.
