Toys from Trash Arvind Gupta,2001 Get the junk out of the trunk and fashion it into cool toys that promise endless hours of fun. Create over 50 toys- a cool stick figure from ice cream sticks, a snazzy goody bag from an old plastic bottle, a simple spoon propeller from plastic spoons and even a complicated water turbine from a water bottle and drinking straws. All out of readily available material. The step-by-step instructions and simple and clear illustrations make this a handy book to have at home to tide over long vacations.

Dyslexia and Early Childhood Barbara E. Pavey,2016-02-22 Taking a developmental approach, this accessible text addresses the ever increasing interest in identifying the characteristics of dyslexia in young children and reflects on the best way to reach and support these learners. Drawing upon current research, the author considers our current understanding of dyslexia and calls upon best practice to advise professionals, students and family members alike who seek to fulfil the potential of young children with, or showing the signs of, dyslexia. This book considers key topics explored in current best practice and dyslexia research, including: the importance of the role of speaking, hearing and understanding language dyslexia in relation to other languages and orthographies dyslexia and overlapping characteristics, particularly dyspraxia the role of play identifying and assessing dyslexia in the early years. Adopting a dyslexia-friendly position, Barbara Pavey acknowledges the ethics associated with a social model of disability, so that the focus is upon modifying teaching and learning, and respecting the views of children and parents throughout. This book includes assessment and practice strategies, good practice points, helpful ideas, first-hand narratives of dyslexia, pointers for further reading, resources and online tools, and will be of enormous practical use to anyone supporting a young child with potential or diagnosed dyslexia.

Female Innovators Who Changed Our World Emma Green,2022-04-13 We are not all born with equal opportunities. Yet there have been countless of women who have overcome a range of barriers such as prejudice, illness, and personal tragedy to advance our understanding of science, technology, engineering, and mathematics (STEM). They used their knowledge to change the world, and their stories are fascinating. This book offers a concise introduction of the lives of 46 women, taking you into the cultural and social context of the world they lived in. Through their intelligence, courage, and resilience, they used STEM to defy expectations and inspire generations to follow in their footsteps. Some of them invented items we use day-to-day and discovered causes and treatments for epidemics that ostracised whole sections of society, whilst others campaigned for the reproductive rights of women and harnessed mathematics to send people into space and break ciphers. These women are proof that females can and did have a hugely significant role in shaping the world we live in today.

A Pedagogy of Humanist Moral Education Marc Silverman,2017-01-26 This book sheds new light on the life and work of Janusz Korczak, the twentieth century humanist moral educator and path-breaking social-pedagogue who is generally unknown in the English speaking world. In the two orphanages he led in Warsaw, Poland Korczak developed an innovative array of educational practices that motivated children from broken families suffering from serious social-interpersonal pathologies to re-form themselves during the five to seven years they lived in the orphanage. By offering its readers a systematic presentation of Korczak's worldview, educational philosophy and work, and exposing them to a rich selection of his writings, this book seeks to inform the English speaking educated public about an educator who unceasingly strived to make the world a better place for people and to make better people for the world.

URVASI Madhumita Dutta,Soumya Narayan Datta,2021-08-30

Water and Sacred Architecture Anat Geva,2023-05-25 This edited book examines architectural representations that tie water, as a physical and symbolic property, with the sacred. The discussion centers on two levels of this relationship: how water influenced the sacredness of buildings across history and different religions; and how sacred architecture expressed the spiritual meaning of water. The volume deliberately offers original material on various unique contextual and design aspects of water and sacred architecture, rather than an attempt to produce a historic chronological analysis on the topic or focusing on a specific geographical region. As such, this unique volume adds a new

dimension to the study of sacred architecture. The book's chapters are compiled by a stellar group of scholars and practitioners from the US, Canada, Europe, Asia, and Africa. It addresses major aspects of water in religious buildings, such as, rituals, pilgrimage, water as a cultural material and place-making, hydro systems, modern practices, environmental considerations, the contribution of water to transforming secular into sacred, and future digital/cyber context of water and sacredness. All chapters are based on original archival studies, historical documents, and field visits to the sites and buildings. These examinations show water as an expression of architectural design, its materiality, and its spiritual values. The book will be of interest to architects, historians, environmentalists, archaeologists, religious scholars, and preservationists.

Animal Farm George Orwell,1990 George Orwell's famous satire of the Soviet Union, in which all animals are equal but some animals are more equal than others.

Knowing Tomorrow Today Merrick Brown,2023-05-31 Global warming. Pandemics. Heatwaves. Droughts. Terrorism. Wars. Famine. And who, really, expects things to get better? At least anytime soon? On the contrary, the future can look awfully bleak. And who, at times, doesn't feel helpless before it all, especially before the unknown? Which is why one of the most tantalizing questions we sometimes ask ourselves is: Can the future be known? Obviously, with people spending billions each year on psychics, palm readers, horoscopes, tarot cards, fortune tellers or even computer algorithms—people think we can know it. Yet are they really going to find answers in a palm reader? The good news is that the Bible provides us with answers, and it reveals that we can be hopeful about the future! *Knowing Tomorrow Today* is a riveting account which outlines a most amazing prophecy from the Bible, which points to our day, and predicts that the next global superpower will be one that will last forever. It is a love story of a God who so deeply cares for us, that He risked it all by coming down into the messiness and brokenness of our human reality in order to save us from ourselves and the forces of darkness. In *Knowing Tomorrow Today*, we are given a glimpse of the world tomorrow, a world in which good has forever triumphed over evil. The future will see heaven on earth, a blissful existence in which redeemed humanity forever enjoys endearing encounters with their Creator. Global warming. Pandemics. Heatwaves. Droughts. Terrorism. Wars. Famine. Yes, but there's also this promise as well: And God will wipe away every tear from their eyes; there shall be no more death, nor sorrow, nor crying. There shall be no more pain, for the former things have passed away. (Revelation 21:4). That's knowing tomorrow today.

Toys and Communication Luísa Magalhães,Jeffrey Goldstein,2017-10-14 There are few scholarly books about toys, and even fewer that consider toys within the context of culture and communication. *Toys and Communication* is an innovative collection that effectively showcases work by specialists who have sought to examine toys throughout history and in many cultures, including 1930's Europe, Morocco, India, Spanish art of the 16th-19th centuries. Psychologists stress the importance of the role of toys and play in children's language development and intellectual skills, and this book demonstrates the recurrent theme of the transmission of cultural norms through the portrayal, presentation and use of toys. The text establishes the role of toy and play park design in eliciting particular forms of play, as well as stressing the child's use of toys to 'become' more adult. It will be beneficial for courses in education, developmental psychology, communications, media studies, and toy design.

Learning, Marginalization, and Improving the Quality of Education in Low-income Countries Daniel A. Wagner,Nathan M. Castillo,SuzanneGrant Lewis,2022-02-21 Improving learning evidence and outcomes for those most in need in developing countries is at the heart of the United Nations'

Sustainable Development Goal on Education (SDG4). This timely volume brings together contributions on current empirical research and analysis of emerging trends that focus on improving the quality of education through better policy and practice, particularly for those who need improved 'learning at the bottom of the pyramid' (LBOP). This volume brings together academic research experts, government officials and field-based practitioners. National and global experts present multiple broad thematic papers – ranging from the effects of migration and improving teaching to the potential of educational technologies, and better metrics for understanding and financing education. In addition, local experts, practitioners and policymakers describe their own work on LBOP issues being undertaken in Kenya, India, Mexico and Ivory Coast. The contributors argue persuasively that learning equity is a moral imperative, but also one that will have educational, economic and social impacts. They further outline how achieving SDG4 will take renewed and persistent effort by stakeholders to use better measurement tools to promote learning achievement among poor and marginalized children. This volume builds on the second international conference on Learning at the Bottom of the Pyramid (LBOP2).* It will be an indispensable resource for policymakers, researchers and government thinktanks, and local experts, as well as any readers interested in the implementation of learning equity across the globe. *The first volume Learning at the Bottom of the Pyramid (LBOP1), may be obtained at: <http://www.iiep.unesco.org/en/learning-bottom-pyramid-4608>

Super Sneaky Uses for Everyday Things Cy Tymony, 2011-11 Most of the projects in this book can be completed in just minutes using common items already found around the house. Fans of all ages will use their ingenuity to turn ordinary, everyday objects into something extraordinary with the help of a few things from the junk drawer.

Science Education in Context Richard K. Coll, Neil Taylor, 2019-02-18 This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.). An important and distinguishing feature of the book is that it draws upon the experiences and research from local experts from an extremely diverse cohort across the world (26 countries in total). The book addresses topics such as: curriculum development; research or evaluation of an implemented curriculum; discussion of pressures driving curriculum reform or implementation of new curricula (e. g., technology or environmental education); the influence of political, cultural, societal or religious mores on education; governmental or ministerial drives for curriculum reform; economic or other pressures driving curriculum reform; the influence of external assessment regimes on curriculum; and so on.

The Book Review , 2006

The Marvel of Martyrdom Sophia Moskalenko, Clark McCauley, 2019-01-23 This text examines the psychological effects of martyrdom and martyrs across the world. The authors discuss martyrdom and martyrs through the lens of current events, iconic historical figures, and popular culture--

Indian Women in Leadership Rajashi Ghosh, Gary N. McLean, 2018-10-10 This book provides intriguing insights into the development of highly qualified women leaders in diverse Indian contexts and their role at national and organizational levels. While India has made enormous economic strides in the past few decades, gender inequality and underutilization of female talent remain deeply rooted and widely spread in many parts of Indian society. This book addresses an urgent need to stop treating Indian women as under-developed human capital and begin realizing their potential as leaders of quality work. This book will fill the gap of research on international leadership for students, academics, and multinational organizations.

Global Water Ethics Rafael Ziegler, David Groenfeldt, 2017-06-12 Scholarly interest in water ethics

is increasing, motivated by the urgency of climate change, water scarcity, privatization and conflicts over water resources. Water ethics can provide both conceptual perspectives and practical methodologies for identifying outcomes which are environmentally sustainable and socially just. This book assesses the implications of ongoing research in framing a new discipline of water ethics in practice. Contributions consider the difficult ethical and epistemological questions of water ethics in a global context, as well as offering local, empirical perspectives. Case study chapters focus on a range of countries including Canada, China, Germany, India, South Africa and the USA. The respective insights are brought together in the final section concerning the practical project of a universal water ethics charter, alongside theoretical questions about the legitimacy of a global water ethics. Overall the book provides a stimulating examination of water ethics in theory and practice, relevant to academics and professionals in the fields of water resource management and governance, environmental ethics, geography, law and political science.

Nutritional Adequacy, Diversity and Choice Among Primary School Children Shreelata Rao Seshadri, Jyoti Ramakrishna, 2017-10-20 This book highlights the reality of malnutrition among school-age children in India and relates it with dietary adequacy, diversity and choice. Using empirical data from field research conducted in Karnataka, India, it documents the nutritional status of school-going children, and examines the socio-economic determinants. It provides insights into changing dietary patterns by analysing case studies from households and schools; and documents the impact of changing dietary choices on the daily nutritional intake of young children. As the issue of nutrition for school-age children is one that is largely neglected in the literature, the book fills an important gap. The book also investigates the policy framework for addressing the nutritional needs of school-going children, and assesses the available government-sponsored interventions in terms of their efficiency and effectiveness, measured by their impact on the nutritional indices of the target group. It offers concrete recommendations for changing the nutritional intake of school-going children. Navigating through the socio-cultural causes for changing food choice and their impact on children's nutritional outcomes, this book shows a viable path to addressing malnutrition, taking into account both macro-level policy constraints and the micro-level perspectives of families, schools and communities.
