Ordering the Storm Susan Grimm, 2006 Literary Nonfiction. Poetics. ORDERING THE STORM empowers readers to see the poetry collection as an artistic medium in itself, and offers diverse perspectives on the subject. Experienced writers and beginners alike will find inspiration and encouragement in the words of exceptional poets such as Maggie Anderson, Wanda Coleman, and Beckian Fritz Goldberg. This book should be required reading for all graduate student poets, even those who are still in the process of writing their first collection, because it includes essential information on poetic sequencing and useful strategies for examining a manuscript's possibilities. One of the most exciting aspects of the book is the sense of community that readers feel upon exploring each essay. ORDERING THE STORM transforms the task of arranging poems from a solitary undertaking to a collaborative adventure-- Mary Biddinger, Associate Editor of RHINO.

The Wind Engineers Jeff Klinkenberg, University of Florida, 2015-10-28 The University of Florida has an ambitious goal: to harness the power of its faculty, staff, students, and alumni to solve some of society's most pressing problems and to become a resource for the state of Florida, the nation, and the world. Hurricanes and tornadoes--and the devastation they leave in their wake--are feared across the globe, but at the University of Florida these natural phenomena are a fascinating research opportunity. At UF's Engineering School of Sustainable Infrastructure and Environment, wind engineers like Forrest Masters and David Prevatt study storm systems and design buildings to better withstand the forces of nature. Follow their stories as they venture inside Hurricane Wilma with wind gauges, travel to Joplin, Missouri to assess the wind-damage from the most powerful tornado in more than a half century, and conduct experiments with the lab's infamous Multi-Axis Wind Load Simulator, ominously nicknamed The Judge. Yet the job of the UF wind engineers does not end there. They take their findings to the drafting table, build roofs and walls, and test shingles, shutters, and garage doors. Their goal: to make sure our houses are still standing, and we are safe, after the storm. The stories chronicled in GATORBYTES span all colleges and units across the UF campus. They detail the far-reaching impact of UF's research, technologies, and innovations--and the UF faculty members dedicated to them. Gatorbytes describe how UF is continuing to build on its strengths and extend the reach of its efforts so that it can help even more people in even more places.

**Building Storm** Gwyn McNamee, 2018-12-20 She hasn't been living. He's looking for a way to forget it all. My life went up in flames. All I'm left with is my daughter and ashes. The simple act of breathing is so excruciating, there are days I wish I could stop altogether. So I have no business being at the party, and I definitely shouldn't be in the arms of the handsome stranger. When his lips meet mine, he breathes life into me for the first time since the day the inferno disintegrated my world. But loving again isn't in the cards, and there are even greater dangers to face than trying to keep Landon McCabe out of my heart. Running is my only option. I have to get away from Chicago and the betrayal that shattered my world. I need a new life--one without attachments. The vibrancy of New Orleans convinces me it's possible to start over. Yet in all the excitement of a new city, it's Storm Hawke's dark, sad beauty that draws me in. She isn't looking for love, and we both need a hot, sweaty release without feelings getting involved. But even the

best laid plans fail, and life can leave you burned. Love can build, and love can destroy. But in the end, love is what raises you from the ashes.

Taking Shelter From the Storm Federal Emergency Federal Emergency Management Agency,2014-08-19 Every year, tornadoes, hurricanes, and other extreme windstorms injure and kill people, and damage millions of dollars worth of property in the United States. Even so, more and more people build houses in tornado- and hurricane-prone areas each year, possibly putting themselves into the path of such storms.Having a shelter, or a safe room, built into your house can help you protect yourself and your family from injury or death caused by the dangerous forces of extreme winds. It can also relieve some of the anxiety created by the threat of an oncoming tornado or hurricane.Should you consider building a shelter in your house to protect yourself and your family during a tornado or hurricane? The answer depends on your answers to many questions, including: - Do you live in a high-risk area?- How quickly can you reach safe shelter during extreme winds?- What level of safety do you want to provide?- What is the cost of a shelter?This guide will help you answer these and other questions so you can decide how best to protect yourself and your family. It includes the results of research that has been underway for more than 20 years, by Texas Tech University's Wind Engineering Research Center (WERC) and other wind engineering research facilities, on the effects of extreme winds on buildings.The guide also provides shelter designs that will show you and your builder/contractor how to construct a shelter underneath a new house, in the basement of a new house, or in an interior room of a new house, or how to modify an existing house to add a shelter in one of these areas. These shelters are designed to protect you and your family from the high winds expected during tornadoes and hurricanes and from flying debris, such as wood studs, that tornadoes and hurricanes usually create.The National Association of Home Builders (NAHB) Research Center has evaluated these designs for construction methods, materials, and costs. Engineers at Texas Tech University have confirmed the design requirements for the expected forces from wind pressure and the impact of typical flying debris. The shelters are designed with life safety as the primary consideration.
