Urban Living Labs Simon Marvin, Harriet Bulkeley, Lindsay Mai, Kes McCormick, Yuliya Voytenko Palgan, 2018-05-03 All cities face a pressing challenge – how can they provide economic prosperity and social cohesion while achieving environmental sustainability? In response, new collaborations are emerging in the form of urban living labs – sites devised to design, test and learn from social and technical innovation in real time. The aim of this volume is to examine, inform and advance the governance of sustainability transitions through urban living labs. Notably, urban living labs are proliferating rapidly across the globe as a means through which public and private actors are testing innovations in buildings, transport and energy systems. Yet despite the experimentation taking place on the ground, we lack systematic learning and international comparison across urban and national contexts about their impacts and effectiveness. We have limited knowledge on how good practice can be scaled up to achieve the transformative change required. This book brings together leading international researchers within a systematic comparative framework for evaluating the design, practices and processes of urban living labs to enable the comparative analysis of their potential and limits. It provides new insights into the governance of urban sustainability and how to improve the design and implementation of urban living labs in order to realise their potential.

Late Antique Letter Collections Cristiana Sogno, Bradley K. Storin, Edward J. Watts, 2019-11-19 Bringing together an international team of historians, classicists, and scholars of religion, this volume provides the first comprehensive overview of the extant Greek and Latin letter collections of late antiquity (ca. 300–600 c.e.). Each chapter addresses a major collection of Greek or Latin literary letters, introducing the social and textual histories of each collection and examining its assembly, publication, and transmission. Contributions also reveal how collections operated as discrete literary genres, with their own conventions and self-presentational agendas. This book will fundamentally change how people both read these texts and use letters to reconstruct the social history of the fourth, fifth, and sixth centuries.

Numerical Methods in Scientific Computing: Germund Dahlquist, Ake Björck, 2008-09-04 This work addresses the increasingly important role of numerical methods in science and engineering. Experiential Landscape Kevin Thwaites, Ian Simkins, 2006-12-05 Experiential Landscape offers new ways of looking at the relationship between people and the outdoor open spaces they use in their everyday lives. The book takes a holistic view of the relationship between humans and their environment, integrating experiential and spatial dimensions of the outdoors, and exploring the theory and application of environmental design disciplines, most notably landscape architecture and urban design. The book explores specific settings in which an experiential approach has been applied, setting out a vocabulary and methods of application, and offers new readings of experiential characteristics in site analysis and design. Offering readers a range of accessible mapping tools and details of what participative approaches mean in practice, this is a new, innovative and practical methodology. The book provides an invaluable resource for students, academics and practitioners and anyone seeking reflective but practical guidance on how to approach outdoor place-making or the analysis and design of everyday outdoor places.

Mapping Genetic Interactions Franco Joseph Vizeacoumar, Andrew Freywald, 2022-10-01 This volume details methods of identifying synthetic lethal, genetic interactions by various approaches in different model systems including human cancer cells. Chapters guide readers through genetic interactions in model organisms, RNA interference, CRISPR/Cas9 based genome editing technologies, drug-gene interactions, mapping chemical genetic interactions, synergistic drug-gene relations, single cell sequencing, gene expression profiling, and novel genetic interactions. Written in the format of the highly successful Methods in Molecular Biology series, each chapter includes an introduction to the topic, lists necessary materials and reagents, includes tips on troubleshooting and known pitfalls, and step-by-step, readily reproducible protocols. Authoritative and cutting-edge, Genetic Interaction Mapping aims to be a useful practical guide to researchers to help further their study in this field.

Parent-Child Art Psychotherapy Dafna Regev, Sharon Snir, 2017-11-22 Parent-Child Art Psychotherapy presents a working model of ways to incorporate parents into a child's art therapy sessions, drawing on the relational-psychoanalytic notion of mentalization in the treatment of difficulties within childhood relationships. The model is introduced by clearly explaining the theory, the setting, the role of the therapist, and the work with the parents. In addition, the book offers a full section dedicated to practical applications of the model, replete with illustrative case studies and detailed therapeutic art-based interventions covering leadership, movement, collaborative and solitary work, and parent-child exercises. Intended for art therapists, students, parent-child psychotherapists, and other therapists interested in expanding their knowledge in the field, Regev and Snir provide a definition and conceptualization of a short-term treatment model with the potential to have comprehensive effects leading to positive change.

Investing in Democracy Carmen Sirianni, 2010-10-01 The health of American democracy ultimately depends on our willingness and ability to work together as citizens and stakeholders in our republic. Government policies often fail to promote such collaboration. But if designed properly, they can do much to strengthen civic engagement. That is the central message of Carmen Sirianni's eloquent new book. Rather than encourage citizens to engage in civic activity, government often puts obstacles in their way. Many agencies treat citizens as passive clients rather than as community members, overlooking their ability to mobilize assets and networks to solve problems. Many citizen initiatives run up against rigid rules and bureaucratic silos, causing all but the most dedicated activists to lose heart. The unfortunate—and unnecessary—result is a palpable decline in the quality of civic life. Fortunately, growing numbers of policymakers across the country are figuring out how government can serve as a partner and catalyst for collaborative problem solving. Investing in Democracy details three such success stories: neighborhood planning in Seattle; youth civic engagement programs in Hampton, Virginia; and efforts to develop civic environmentalism at the U.S. Environmental Protection Agency. The book explains what measures were taken and why they succeeded. It distills eight core design principles that characterize effective collaborative governance and concludes with concrete recommendations for federal policy.

The Mesh Lisa Gansky, 2010-09-23 A simple, powerful idea that's reinventing the way smart, adaptive companies do business. Most businesses follow the same basic formula: create a product or service, sell it, and collect money. What Lisa Gansky calls Mesh businesses throw this model out the window. Instead, these companies use social media, wireless networks, and data crunched from every available source to provide people with goods and services at the exact moment they need them, without the burden and expense of owning them outright. The Mesh gives companies a better understanding of what customers really want. Already, hundreds of successful Mesh companies are redefining how we interact with the people, goods, and services in our lives. These businesses are easier to start and spreading like wildfire, from bike sharing and home exchanges to peer-to-peer lending, energy cooperatives, and open source design. Consider: • ZipCar profits from streamlined car sharing • Kickstarter connects artists with funding from enthusiastic supporters • Music Gym makes finding a recording studio as easy as joining a gym The Mesh reveals the next wave of information-enabled commerce, showing readers how to plug in and profit.

Software Testing in the Cloud Scott Tilley,Tauhida Parveen,2012-09-13 For a large, complex system, the amount of test cases in a regression test suite can range from a few hundred to several thousands, which can take hours or even days to execute. Regression testing also requires considerable resources that are often not readily available. This precludes their use in an interactive setting, further contributing to an inefficient testing process. Cloud computing offers the use of virtualized hardware, effectively unlimited storage, and software services that can help reduce the execution time of large test suites in a cost-effective manner. The research presented by Tilley and Parveen leverages the resources provided by cloud computing infrastructure to facilitate the concurrent execution of test cases. They introduce a decision framework called SMART-T to support migration of software testing to the cloud, a distributed environment called HadoopUnit for the concurrent execution of test cases in the cloud, and a series of case studies illustrating the use of the framework and the environment. Experimental results indicate a significant reduction in test execution time is possible when compared with a typical sequential environment. Software testing in the cloud is a subject of high interest for advanced practitioners and academic researchers alike. For advanced practitioners, the issue of cloud computing and its impact on the field of software testing is becoming increasingly relevant. For academic researchers, this is a subject that is replete with interesting challenges; there are so many open problems that graduate students will be busy for years to come. To further disseminate results in this field, the authors created a community of interest called “Software Testing in the Cloud” (www.STITC.org), and they encourage all readers to get involved in this exciting new area.
