*Best Practices for Credit-Bearing Information Literacy Courses* Christopher Vance Hollister,2010

This work is a collection of previously unpublished papers in which contributing authors describe and recommend best practices for creating, developing and teaching credit-bearing information literacy (IL) courses at the college and university level. Contributors include academic librarians from universities, four-year colleges and community colleges to demonstrate successful IL course endeavors at their respective institutions. It includes several case studies of both classroom and online IL courses; some are elective and some required, some are discipline-specific and others are integrated into academic programs or departments. Contributors discuss useful and effective methods for developing, teaching, assessing and marketing courses. Also included are chapters on theoretical approaches to credit bearing IL courses and their history in higher education. Organized around three themes, create, develop and teach, this book provides practitioners and administrators with a start-to-finish guide to best practices for credit-bearing IL courses.

**Free, Fair, and Alive** David Bollier,Silke Helfrich,2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this

guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

**Critical Terms for the Study of Gender** Catharine R. Stimpson, Gilbert Herdt, 2014-07-11  
“Gender systems pervade and regulate human lives—in law courts and operating rooms, ballparks and poker clubs, hair-dressing salons and kitchens, classrooms and playgroups. . . . Exactly how gender works varies from culture to culture, and from historical period to historical period, but gender is very rarely not at work. Nor does gender operate in isolation. It is linked to other social structures and sources of identity.” So write women’s studies pioneer Catharine R. Stimpson and anthropologist Gilbert Herdt in their introduction to *Critical Terms for the Study of Gender*, laying out the wide-ranging nature of this interdisciplinary and rapidly changing field. The sixth in the series of “Critical Terms” books, this volume provides an indispensable introduction to the study of gender through an exploration of key terms that are a part of everyday discourse in this vital subject. Following Stimpson and Herdt’s careful account of the evolution of gender studies and its relation to women’s and sexuality studies, the twenty-one essays here cast an appropriately broad

net, spanning the study of gender and sexuality across the humanities and social sciences. Written by a distinguished group of scholars, each essay presents students with a history of a given term—from bodies to utopia—and explains the conceptual baggage it carries and the kinds of critical work it can be made to do. The contributors offer incisive discussions of topics ranging from desire, identity, justice, and kinship to love, race, and religion that suggest new directions for the understanding of gender studies. The result is an essential reference addressed to students studying gender in very different disciplinary contexts.

**Politics of the Everyday** Ezio Manzini, 2019-02-07 Each of us develops and enacts strategies for living our everyday lives. These may confirm the general tendency towards new forms of connected solitude, in which we work, travel and live alone, yet feel sociable mainly by means of technology. Alternatively, they may help to create flexible communities that are open and inclusive, and therefore resilient and socially sustainable. In *Politics of the Everyday*, Ezio Manzini discusses examples of social innovation that show how, even in these difficult times, a better kind of society is possible. By bringing autonomy and collaboration together, it is possible to develop new forms of design intelligence, for our own good, for the good of the communities we are part of, and for society as a whole.

**Mechanisms of antibiotic resistance** Jun Lin, Kunihiro Nishino, Marilyn C. Roberts, Marcelo Tolmasky, Rustam I. Aminov, Lixin Zhang, 2015-06-01 Antibiotics represent one of the most successful forms of therapy in medicine. But the efficiency of antibiotics is compromised by the growing number of antibiotic-resistant pathogens. Antibiotic resistance, which is implicated in elevated morbidity and mortality rates as well as in the increased treatment costs, is considered to be one of the major global public health threats ([www.who.int/drugresistance/en/](http://www.who.int/drugresistance/en/)) and the magnitude of the problem recently prompted a number of international and national bodies to take actions to protect the public ([http://ec.europa.eu/dgs/health\\_consumer/docs/road-map-amr\\_en.pdf](http://ec.europa.eu/dgs/health_consumer/docs/road-map-amr_en.pdf): [http://www.who.int/drugresistance/amr\\_global\\_action\\_plan/en/](http://www.who.int/drugresistance/amr_global_action_plan/en/); [http://www.whitehouse.gov/sites/default/files/docs/carb\\_national\\_strategy.pdf](http://www.whitehouse.gov/sites/default/files/docs/carb_national_strategy.pdf)). Understanding the mechanisms by which bacteria successfully defend themselves against the antibiotic assault represent the main theme of this eBook published as a Research Topic in Frontiers in Microbiology, section of Antimicrobials, Resistance, and Chemotherapy. The articles in the eBook update the reader on various aspects and mechanisms of antibiotic resistance. A better understanding of these mechanisms should facilitate the development of means to potentiate the efficacy and increase the lifespan of antibiotics while minimizing the emergence of antibiotic resistance among pathogens.

**Global Antimicrobial Resistance Surveillance System** World Health Organization, 2015 In May 2015, the Sixty-eighth World Health Assembly adopted the Global action plan on antimicrobial

resistance, which reflects the global consensus that AMR poses a profound threat to human health. One of the five strategic objectives of the Global action plan is to strengthen the evidence base through enhanced global surveillance and research. The Global Antimicrobial Resistance Surveillance System (GLASS) has been developed to facilitate and encourage a standardized approach to AMR surveillance globally and in turn support the implementation of the Global action plan on antimicrobial resistance. This manual addresses the early phase of implementation of GLASS, focussing on surveillance of resistance in common human bacterial pathogens. The intended readership of this publication is public health professionals and health authorities responsible for national AMR surveillance. It outlines the GLASS standards and describes the road map for implementation of the system between 2015 and 2019. Further development of GLASS will be based on the lessons learnt during this period--Publisher's description.

Lilavai Kouhala,2021-01-05 The Prakrit romance Lāilāavaāi, an early ninth-century poem attributed to Kouhala and set in modern-day coastal Andhra Pradesh, is the most celebrated work in the genre. Complexly narrated in the alternating voices of its heroines and heroes and featuring a cast of semi-divine and magical beings, it centers on three young women: Lāilāavaāi, princess of

Sinhala (today's Sri Lanka); her cousin Mahanumai, princess of the mythical city Alaka; and Kuvalaavali, Mahanumai's adopted sister. Following a prophecy that Lāilāavaāi's husband will rule the earth, the princess happens upon a portrait of King Hala of Pratihsthana and immediately falls in love. While journeying to meet him, she hears her cousins' tales of their lost loves, and then vows not to marry until they are reunited. To win Lāilāavaāi's hand, King Hala journeys to the underworld, faces monsters, and overcomes armies. Lāilāavaāi explores themes of karma and female desire, notably privileging women as storytellers. A new edition of the Prakrit text, presented in the Devanagari script, accompanies a new English prose translation--

**Pharmaceutical Lifecycle Management** Tony Ellery, Neal Hansen, 2012-06-05 A comprehensive guide to optimizing the lifecycle management of pharmaceutical brands The mounting challenges posed by cost containment policies and the prevalence of generic alternatives make optimizing the lifecycle management (LCM) of brand drugs essential for pharmaceutical companies looking to maximize the value of their products. Demonstrating how different measures can be combined to create winning strategies, *Pharmaceutical Lifecycle Management: Making the Most of Each and Every Brand* explores this increasingly important field to help readers understand what they can—and must—do to get the most out of their brands. Offering a truly immersive introduction to LCM options for pharmaceuticals, the book incorporates numerous real-life case studies that demonstrate successful and failed lifecycle management initiatives, explaining the key takeaway of each example. Filled with practical information on the process of actually writing and presenting an LCM plan, as well as how to link corporate, portfolio, and individual brand strategies, the book also offers a look ahead to predict which LCM strategies will continue to be effective in the future. While the development of new drugs designed to address unmet patient needs remains the

single most important goal of any pharmaceutical company, effective LCM is invaluable for getting the greatest possible value from existing brands. Pharmaceutical Lifecycle Management walks you through the process step by step, making it indispensable reading for pharmaceutical executives and managers, as well as anyone working in the fields of drug research, development, and regulation.

**Justinian's Flea** William Rosen, 2007-05-03 From the acclaimed author of *Miracle Cure* and *The Third Horseman*, the epic story of the collision between one of nature's smallest organisms and history's mightiest empire During the golden age of the Roman Empire, Emperor Justinian reigned over a territory that stretched from Italy to North Africa. It was the zenith of his achievements and the last of them. In 542 AD, the bubonic plague struck. In weeks, the glorious classical world of Justinian had been plunged into the medieval and modern Europe was born. At its height, five thousand people died every day in Constantinople. Cities were completely depopulated. It was the first pandemic the world had ever known and it left its indelible mark: when the plague finally ended, more than 25 million people were dead. Weaving together history, microbiology, ecology, jurisprudence, theology, and epidemiology, *Justinian's Flea* is a unique and sweeping account of the little known event that changed the course of a continent.

**Unmanned Aircraft Systems** Reg Austin, 2010-03-26 *Unmanned Aircraft Systems* delivers a much needed introduction to UAV System technology, taking an integrated approach that avoids compartmentalising the subject. Arranged in four sections, parts 1-3 examine the way in which various engineering disciplines affect the design, development and deployment of UAS. The fourth section assesses the future challenges and opportunities of UAS. Technological innovation and increasingly diverse applications are two key drivers of the rapid expansion of UAS technology. The global defence budget for UAS procurement is expanding, and in the future the market for civilian

UAVs is expected to outmatch that of the military. Agriculture, meteorology, conservation and border control are just a few of the diverse areas in which UAVs are making a significant impact; the author addresses all of these applications, looking at the roles and technology behind both fixed wing and rotorcraft UAVs. Leading aeronautical consultant Reg Austin co-founded the Bristol International Remotely Piloted Vehicle (RPV) conferences in 1979, which are now the longest-established UAS conferences worldwide. In addition, Austin has over 40 years' experience in the design and development of UAS. One of Austin's programmes, the Sprite UAV System has been deployed around the world and operated by day and night, in all weathers.
