**Wasting Perfect Conditions** B. Clement Williams,2007-11 The sight of the new Buick almost makes Heyward Jennings physically ill. At sixty years old, the prominent Atlanta banker can no longer oblige himself to drive another of the sensible gray Buicks that First Mercantile Security Bank provides its executives as company cars. At the twilight of his career-and the brink of old age-Heyward realizes his life, much like the dull gray cars, is guarded and boring. On impulse, Heyward retires and moves, with his wife Elizabeth, to their beach house on the Atlantic coast. There, he begins to experience the kind of thrills he's always avoided. Finished playing by the rules, he creates a new life, where Buicks and prudence are only a distant memory, and excitement and adventure occasionally take place on the wrong side of the law. With the encouragement of a well-endowed lesbian and his redneck cousins, Heyward, in the face of a tragedy surrounding his best friend, steps so far out of his careful and cautious ways that he crosses a line-and soon realizes there's no way back.

**Wonderfully Wordless** William Patrick Martin,2015-10-15 Wonderfully Wordless: The 500 Most Recommended Graphic Novels and Picture Books is the first comprehensive best book guide to wordless picture books (and nearly wordless picture books). It is an indispensable resource for parents

and teachers who love graphic storytelling or who recognize the value of these exceptional books in working with different types of students, particularly preschool, English as a Second Language (ESL), and special needs, and creative writers. Every age group will benefit from *Wonderfully Wordless*, from babies and toddlers encountering their first books, to elementary age children captivated by the popular fantasy and adventure themes, to teenagers attracted to graphic novels because of their more intense content and comic book format. Even adults who are not yet readers will benefit from this uniquely authoritative resource because it will provide a bridge to literacy and give them books that they can immediately share with their children. *Wonderfully Wordless* is the ultimate guide to wordless and almost wordless books. Its 500 exemplary titles are a composite of 140 sources including recommendations from reference books, award lists, book reviews, professional journals, literary blogs, and the collections of many of the most prominent libraries in the United States and the English-speaking world. The US libraries include the Boston Public Library, Carnegie Library of Pittsburgh, Denver Library, New York Public Library, and Seattle Public Library, as well as the academic libraries at Bank Street College, Miami University, Michigan State University, Penn State University, Stanford University, and University of Chicago. The international libraries include the University of Oxford, British Council Library India, British Library, Hong Kong Public Libraries, National Library of the Philippines, Toronto Public Library, Trinity College Library (Dublin), Vancouver Public Library, and the National Library of New Zealand. The 500 books included here are generated from a database with 7,300 booklist entries. In essence, the ranked list emerging from this compilation will constitute “votes” for the most popular titles, the ones most experts agree are the best. By pooling the expertise from the US and other English-speaking countries, *Wonderfully Wordless* is an unrivaled core list of classic and contemporary titles. This authoritative reference book conveys not the opinion of one expert, but the combined opinions of a legion of experts. If a single picture is worth a thousand words, then a multitude of the picture-only texts is worth a compendium. *Wonderfully Wordless* is organized by theme and format and readers should have no problem zeroing in on their favorite topics. There are thirty-one chapters organized by topics such as Christmas Cheer, Character Values, Comedy Capers, Pet Mischief, Creative Journeys, Fascinating Fantasies, and Marvelous Mysteries. There is a full spectrum of wordless fiction and nonfiction, concept books, visual puzzles, board books, cloth books, woodcut novels, graphic novels, and more.

*Framing the Nation and Collective Identities* Vjeran Pavlaković, Davor Pauković, 2019-05-01 This book analyzes top-down and bottom-up strategies of framing the nation and collective identities through commemorative practices relating to events from the Second World War and the 1990s Homeland War in Croatia. With attention to media representations of commemorative events and opinion poll data, it draws on interviews and participant observation at commemorative events to focus on the speeches of political elites, together with the speeches of opposition politicians and other social actors (such as the Catholic Church, anti-fascist organizations and war veterans’ and victims’ organizations) who challenge official narratives. Offering innovative approaches to researching and

analyzing commemorative practices in post-conflict societies, this examination of a nation's transition from a Yugoslav republic to an independent state – and now the newest member of the European Union – constitutes a unique case study for scholars of cultural memory and identity politics interested in the production and representation of national identities in official narratives.

*The Psychology of Religion and Place* Victor Counted, Fraser Watts, 2019-11-01 This book examines the role of religious and spiritual experiences in people's understanding of their environment. The contributors consider how understandings and experiences of religious and place connections are motivated by the need to seek and maintain contact with perceptual objects, so as to form meaningful relationship experiences. The volume is one of the first scholarly attempts to discuss the psychological links between place and religious experiences. The chapters within provide insights for understanding how people's experiences with geographical places and the sacred serve as agencies for meaning-making, pro-social behaviour, and psychological adjustment in everyday life.

**Egg Innovations and Strategies for Improvements** Patricia Hester, 2016-12-19 Egg Innovations and Strategies for Improvements examines the production of eggs from their development to human consumption. Chapters also address consumer acceptance, quality control, regulatory aspects, cost and risk analyses, and research trends. Eggs are a rich source of macro- and micronutrients which are consumed not only by themselves, but also within the matrix of food products, such as pastas, cakes, and pastries. A wholesome, versatile food with a balanced array of essential nutrients, eggs are a staple of the human diet. Emerging strategies entail improvements to the composition of eggs via fortification or biological enrichment of hen's feed with polyunsaturated fatty acids, antioxidants, vitamins, or minerals. Conversely, eggs can be a source of food-borne disease or pollutants that can have effects on not only human health, but also egg production and commercial viability. Written by an international team of experts, the book presents a unique overview of the biology and science of egg production, nutrient profiling, disease, and modes for increasing their production and quality. Designed for poultry and food scientists, technologists, microbiologists, and workers in public health and the food and egg industries, the book is valuable as an industrial reference and as a resource in academic libraries. Focuses on the production and food science aspects of eggs Includes a broad range of microbial contaminants, their risks, and prevention, as well as non-microbial contaminant risks Presents analytical techniques for practical application

*New Media in New Europe-Asia* Jeremy Morris, Natalya Rulyova, Vlad Strukov, 2016-04-14 This volume offers an in-depth investigation of the role of new media in the political, social and cultural life in the region of Europe-Asia. By focusing on new media, which is understood primarily as internet-enabled networked social practice, the book puts forward a political and cultural redefinition of the region which is determined by the recognition of the diversity of new media uses in the countries included in the study. This book focuses on the period prior to the advent of 'world internet revolutions', and it registers the region at its pivotal moment—at the time of its entry into the post-broadcast era. Does the Internet aid democratisation or is it conditioned by socio-political norms? Has the Internet changed politics or has it had to fit existing political structures? Has the use of digital technologies revolutionized election campaigns? How is hyperlinked society different from society prior to the advent of the web? How do ordinary people actually use the Internet. These and other pressing questions – crucial to understanding the post-socialist world – are investigated in the current volume. This book was published as a special issue of Europe-Asia Studies.

**The Palgrave Encyclopedia of the Possible** Vlad Petre Glăveanu, 2023-01-25 The Palgrave Encyclopedia of the Possible represents a comprehensive resource for researchers and practitioners interested in an emerging multidisciplinary area within psychology and the social sciences: the study of how we engage with and cultivate the possible within self, society and culture. Far from being

opposed either to the actual or the real, the possible engages with concrete facts and experiences, with the result of transforming them. This encyclopedia examines the notion of the possible and the concepts associated with it from standpoints within psychology, philosophy, sociology, neuroscience and logic, as well as multidisciplinary fields of research including anticipation studies, future studies, complexity theory and creativity research. Presenting multiple perspectives on the possible, the authors consider the distinct social, cultural and psychological processes - e.g., imagination, counterfactual thinking, wonder, play, inspiration, and many others - that define our engagement with new possibilities in domains as diverse as the arts, design and business.

*Eating on the Wild Side* Jo Robinson, 2013-06-04 Winner of the 2014 IACP Cookbook Award in the category of Food Matters. The next stage in the food revolution--a radical way to select fruits and vegetables and reclaim the flavor and nutrients we've lost. Ever since farmers first planted seeds 10,000 years ago, humans have been destroying the nutritional value of their fruits and vegetables. Unwittingly, we've been selecting plants that are high in starch and sugar and low in vitamins, minerals, fiber, and antioxidants for more than 400 generations. EATING ON THE WILD SIDE reveals the solution--choosing modern varieties that approach the nutritional content of wild plants but that also please the modern palate. Jo Robinson explains that many of these newly identified varieties can be found in supermarkets and farmer's market, and introduces simple, scientifically proven methods of preparation that enhance their flavor and nutrition. Based on years of scientific research and filled with food history and practical advice, EATING ON THE WILD SIDE will forever change the way we think about food.

*Desert Exile* Yoshiko Uchida, 2015-04-01 After the attack on Pearl Harbor, everything changed for Yoshiko Uchida. Desert Exile is her autobiographical account of life before and during World War II. The book does more than relate the day-to-day experience of living in stalls at the Tanforan Racetrack, the assembly center just south of San Francisco, and in the Topaz, Utah, internment camp. It tells the story of the courage and strength displayed by those who were interned. Replaces ISBN 9780295961903

**The Milk Cows** John F. White, 2009-09-19 "A comprehensive look at the German submarine tanker program during World War II . . . engaging." —The NYMAS Review During the Second World War the Germans developed a specially adapted U-boat oil tanker with two aims. First, by refueling the attack U-boat fleet their range of operations and duration of patrol could be significantly increased. Secondly, these underwater tankers were far more likely to avoid detection than surface support ships. The submarine tankers, affectionately known as "Milk Cows," were regarded by both the Germans and the Allies as the most important element of the U-boat fleet. Allied forces had orders to attack the tankers first whenever a choice was presented. Until late 1942 the German Milk Cows operated with great success and few losses. But from 1943 onwards the German rendezvous ciphers were repeatedly broken by the Allies and losses mounted rapidly. The Milk Cows were highly vulnerable during the lengthy refueling procedure as they lay stationary on the surface, hatches open.

By the end of the war virtually every tanker had been sunk with severe loss of life. The story of this critical campaign has been thoroughly researched by the author and is told against the background of changing U-boat fortunes. "The author is to be congratulated on his research and writing such a thorough and readable account of such an interesting subject." —Windscreen Magazine, Military Vehicles Trust "Readers will be fascinated not just by the mainstream replenishment work but also by the book's accounts of German submarine operations far afield." —Navy News

**Cold War Shield** Roger Lindsay, 2013

**The Prison Officer** Alison Liebling, David Price, Guy Shefer, 2010-12-22 This book is a thoroughly updated version of the popular first edition of *The Prison Officer*. It incorporates the significant increase in knowledge about the work of prison officer since the first edition was published and provides a live account of prison work and ways of understanding the role of the prison officer in the late-modern context. Few detailed narratives exist of prison work and the sort of role the prison officer occupies; this book addresses the gap. Using a range of quantitative and qualitative data and drawing on available theoretical literature it explores the role of the prison officer in an 'appreciative' way, taking into account the little-discussed issues of power and discretion. It provides a single accessible guide to the world and work of the prison officer, looking in detail at the present role of the prison officer in Britain and demonstrating the centrality of staff-prisoner relationships to every operation carried out by officers. This book will be of relevance to anyone with an interest in the work of a prison officer; students and others looking for an introductory survey of the literature and essential reading for any established and aspiring officers.
