**Solar Storm** Gerald M Kilby,2022-12-17 A dramatic new hard sci-fi epic from the author of the highly acclaimed Colony Mars & The Belt series. \_\_\_\_\_ In space, all that matters is survival. Rapid colonization of the Moon is pushing both national space agencies and powerful corporations to negotiate a New Lunar Accord in an effort to prevent escalating conflicts over valuable resources and territory. But hope that this treaty will bring stability to the nascent lunar civilization is suddenly dashed when a high-energy solar storm causes a cascade of destruction to the vast satellite constellations that orbit Earth. Now it's only a matter of weeks before the ever-increasing debris cloud makes travel back to the home planet impossible. Panic soon begins to grip the lunar population as they scramble to evacuate, all fearing that they could be stranded on the Moon with no prospect of ever returning to Earth. But for some, those caught in the grinding gears of the unfolding chaos, the situation becomes much worse. For them, it's simply a matter of survival. This is their story.

**What Stands in a Storm** Kim Cross,2016-03 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America’s biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it’s a story of survival; for others it’s the story of their last hours. Cross’s immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that’s just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

Storm Chasers Matt White,2003 Readers of all ability levels will want to read these high-low books from 5 high-interest nonfiction subject areas: sports, history, biography, adventure, and science. Each easy-to-read book explores a fascinating narrative account of the subject. This all-new series features historical photographs, full-color graphics, glossary words on each page, and a contemporary chapter-book format. Copyright © Libri GmbH. All rights reserved.

*Storm over Warlock* Andre Norton,2016-02-01 When Shan Lante returns to base camp he discovered that it has been burnt to a crisp, leaving him the only living human being on the planet Warlock. Now he must find a way to keep alive and avoid both the Throgs who destroyed the Terran base and the aliens native to Warlock. With few options, Shan will learn his limits and the secrets of this strange planet in his quest for survival.

*Urban Storm Water Management* Hormoz Pazwash,2016-04-27 Design Drainage and Storm Water Management Systems Efficiently Urban Storm Water Management, Second Edition covers the design, installation, and maintenance of storm water management systems, addresses the impact of urban development on runoff and infiltration, and focuses on storm water management relative to flooding and water pollution. *Storm Warning* Nancy Mathis,2007-03-06 The Perfect Storm on the prairie, Storm Warning is a compulsively readable account of one of the most terrible tornadoes in history -- and the extraordinary people who kept it from becoming the deadliest. May 3, 1999, is a day that Oklahomans will never forget. By the time the sun set over a ravaged plain, some 71 tornadoes had claimed 11,000 homes and businesses and caused a billion dollars in damages. One of them was a mile-wide monster of incredible power, the fiercest F5 twister to hit a metropolitan area, and whose 300 mph winds were the fastest ever recorded on the planet. Veteran journalist Nancy Mathis draws on numerous interviews to weave the story of those few terrifying hours that irrevocably changed the lives of many Oklahomans. Storm Warning features Kara Wiese, who fought to save her son from the fatal winds, and Charlie Cusack, who followed the tornado's progress on television until it came knocking on his front door. Amazingly, only thirty-eight people perished at the hands of the Oklahoma F5. Many lives were saved by the efforts of professionals such as Ted Fujita, the creator of the Fujita Scale (dubbed Mr. Tornado for his relentless pursuit to unravel a twister's mysteries); the oft-criticized but dogged government meteorologists; and Gary England, a resourceful TV weatherman whose tireless efforts prepared hundreds of people in the tornado's path. Storm Warning alternates between personal stories and the history of the struggle to understand this bewildering force of Mother Nature, creating a nail-biting, captivating look at surviving the fury from the skies.

**Carbonate Sedimentology** Maurice E. Tucker,V. Paul Wright,2009-07-17 Carbonate rocks (limestones and dolomites) constitute a major part of the geological column and contain not only 60% of the world's known hydrocarbons but also host extensive mineral deposits. This book represents the first major review of carbonate sedimentology since the mid 1970's. It is aimed at the advanced undergraduate -postgraduate level and will also be of major interest to geologists working in the oil industry. Carbonate Sedimentology is designed to take the reader from the basic aspects of limestone recognition and classification through to an appreciation of the most recent developments such as large scale facies modelling and isotope geochemistry. Novel aspects of the book include a detailed review of carbonate mineralogy, non-marine carbonate depositional environments and an in-depth look at carbonate deposition and diagenesis through geologic time. In addition, the reviews of individual depositional systems stress a process-based approach rather than one centered on simple comparative sedimentology. The unique quality of this book is that it contains integrated reviews of carbonate sedimentology and diagenesis, within one volume.
