Mach mal Pause - Entspannen, Bewegen und Basteln mit Kastanien Katrin Kleebach,2020-10-09 Liebe Leser, mein Name ist Katrin Kleebach und ich bin Heilerziehungspflegerin. Nebenberuflich beschäftige ich mich intensiv mit den Themen Entspannung, Bewegung und Kreativität für Kinder, Senioren und Menschen mit Behinderung. Ich leite diverse Workshops an der Volkshochschule und im Kindergarten. Der Herbst ist für mich die schönste und kreativste Jahreszeit, die Arbeit mit Naturmaterialien bereitet mir und meinen Teilnehmern immer große Freude und deswegen habe ich diese Ideen Sammlung für den Einsatz von Kastanien für Sie erarbeitet. Die Ideen können in der pädagogischen Arbeit in Kindergärten und Grundschulen eingesetzt werden, eignen sich sehr gut für die Tagesbetreuung von Senioren und Menschen mit Behinderung und können natürlich auch in der Freizeit ausprobiert werden.

The Technical Image Horst Bredekamp,Vera Dünkel,Birgit Schneider,2019-04-10 In science and technology, the images used to depict ideas, data, and reactions can be as striking and explosive as the concepts and processes they embody—both works of art and generative forces in their own right. Drawing on a close dialogue between the histories of art, science, and technology, The Technical Image explores these images not as mere illustrations or examples, but as productive agents and distinctive, multilayered elements of the process of generating knowledge. Using beautifully reproduced visuals, this book not only reveals how scientific images play a constructive role in shaping the findings and insights they illustrate, but also—however mechanical or detached from individual researchers’ choices their appearances may be—how they come to embody the styles of a period, a mindset, a research collective, or a device. Opening with a set of key questions about artistic representation in science, technology, and medicine, The Technical Image then investigates historical case studies focusing on specific images, such as James Watson’s models of genes, drawings of Darwin’s finches, and images of early modern musical automata. These case studies in turn are used to illustrate broad themes ranging from “Digital Images” to “Objectivity and Evidence” and to define and elaborate upon fundamental terms in the field. Taken as a whole, this collection will provide analytical tools for the interpretation and application of scientific and technological imagery.

Gaming the Iron Curtain Jaroslav Švelch,2023-09-19 How amateur programmers in 1980s Czechoslovakia discovered games as a medium, using them not only for entertainment but also as a means of self-expression. Aside from the exceptional history of Tetris, very little is known about gaming culture behind the Iron Curtain. But despite the scarcity of home computers and the absence of hardware and software markets, Czechoslovakia hosted a remarkably active DIY microcomputer scene in the 1980s, producing more than two hundred games that were by turns creative, inventive, and politically subversive. In *Gaming the Iron Curtain*, Jaroslav Švelch offers the first social history of gaming and game design in 1980s Czechoslovakia, and the first book-length treatment of computer gaming in any country of the Soviet bloc. Švelch describes how amateur programmers in 1980s Czechoslovakia discovered games as a medium, using them not only for entertainment but also as a means of self-expression. Sheltered in state-supported computer clubs, local programmers fashioned games into a medium of expression that, unlike television or the press, was neither regulated nor censored. In the final years of Communist rule, Czechoslovak programmers were among the first in the world to make activist games about current political events, anticipating trends observed decades later in independent or experimental titles. Drawing from extensive interviews as well as political, economic, and social history, *Gaming the Iron Curtain* tells a compelling tale of gaming the system, introducing us to individuals who used their ingenuity to be active, be creative, and be heard.

Productive Patterns in Phraseology and Construction Grammar Carmen Mellado Blanco,2021-11-22 Adopting a corpus-based methodology, this volume analyses phraseological patterns in nine European languages from a monolingual, bilingual and multilingual point of view, following a mostly Construction Grammar approach. At present, corpus-based constructional research represents an interesting and innovative field of phraseology with great relevance to translatology, foreign language didactics and lexicography.

Aboriginal Canada Revisited Kerstin Knopf,2008-09-13 Exploring a variety of topics—including health, politics, education, art, literature, media, and film—Aboriginal Canada Revisited draws a portrait of the current political and cultural position of Canada’s Aboriginal peoples. While lauding improvements made in the past decades, the contributors draw attention to the systemic problems that continue to marginalize Aboriginal people within Canadian society. From the Introduction: “[This collection helps] to highlight areas where the colonial legacy still takes its toll, to acknowledge the manifold ways of Aboriginal cultural expression, and to demonstrate where Aboriginal and non-Aboriginal people are starting to find common ground.” Contributors include Aboriginal and non-Aboriginal scholars from Europe and Canada, including Marlene Atleo, University of Manitoba; Mansell Griffin, Nisga’a Village of Gitwinksihlkw, British Columbia; Robert Harding, University College of the Fraser Valley; Tricia Logan, University of Manitoba; Steffi Retzlaff, McMaster University; Siobhán Smith, University of British Columbia; Barbara Walberg, Confederation College.

Critique of Information Scott Lash,2002-01-21 This penetrating book raises questions about how power operates in contemporary society. It explains how the speed of information flows has eroded the separate space needed for critical reflection. It argues that there is no longer an 'outside' to the global flows of communication and that the critique of information must take place within the information itself. The operative unit of the information society is the idea. With the demise of depth reflection, reflexivity through the idea now operates external to the subject in its circulation through networks of humans and intelligent machines. It is these ideas that make the critique of information possible. This book is a major testament to the prospects of culture, politics and theory in the global information society.

The Wounded Self Nina Schmidt,2018 Takes the recent wave of German autobiographical writing on illness and disability seriously as literature, demonstrating the value of a literary disability studies approach.

Point v. Dunstable Thomas J. Leach,2014-11-20 Having a film short accepted at the prestigious Sundance Film Festival is a dream come true for many indie filmmakers, especially if early buzz suggests it could take the top prize. Such was the case for French filmmaker Joséphine Point and *What Red Balloon?*, Point’s incisive, twenty-minute social critique of globalization. But when her distributor colorized portions of the film without her express consent, Point was outraged and embarrassed, but hardly surprised, when her film was the flop of Sundance. Colorization had changed her film’s theme to such a degree that it no longer made the strong social statement that the plaintiff intended, and her repeated invocation of *droit moral* the European legal concept of artists’ “moral right” to have their artistic works remain as they created them fell on the deaf ears of counsel and the

arbitration board assembled to settle the dispute. Point v. Dunstable is a legal malpractice case involving artists, arbitrators, film experts, questions of professional liability, and the nexus, if any, of American and European intellectual property law. With exhibits and two witnesses (including experts) per side, Dunstable sharpens a student’s trial skills and knowledge of ethics and professional conduct. Substantive knowledge of intellectual property law is neither tested nor required. It is suitable as a half-day bench trial or full-day full trial. Please note that a crucial part of the fact pattern in Point v. Dunstable concerns the unauthorized colorization of the plaintiff’s film.

Wörterbuch der Elektronik, Datentechnik, Telekommunikation und Medien Victor Ferretti,2003-12-10 Since the first edition was published, new technologies have emerged, especially in the area of convergence of computing and communications, accompanied by a lot of new technical terms. This third expanded and updated edition has been adaptetd to cope with this situation. The number of entries has been incremented by 35%. This dictionary offers a valuable guide to navigate through the entanglement of German and English terminology. The lexicographic concept (indication of the subject field for every term, short definitions, references to synonyms, antonyms, general and derivative terms) has been maintained, as well as the tabular layout.
