Living with Florida's Atlantic Beaches David M. Bush,2004 A call to live with the coast, as opposed to living at the coast; unless Florida coastal communities conserve beaches and mitigate storm impacts, the future of the beach-based economy is in question.

Miss Julia Weathers the Storm Ann B. Ross,2018-04-03 In the latest installment of Ann B. Ross's New York Times bestselling series, Miss Julia takes a trip to the beach, only to confront a hurricane roiling off the coast--and all the trouble it washes ashore Miss Julia's sweet and generous husband, Sam, has decided to take a big group trip to the beach, inviting family and friends. While Miss Julia prepares for the big trip, her longtime friend LuAnne comes to her with a horrifying discovery--her husband may be cheating on her. Julia invites LuAnne along to the beach to get away and clear her head--and to keep from doing anything rash. Everyone settles into the rental house and six-year-old Latisha, their beloved housekeeper Lillian's great-granddaughter, is having a blast searching for seashells when she discovers some much more valuable treasures that have washed up from a strong storm off the coast. As the storm nears, the crew packs up to head back to Abbotsville, and it appears that the three strangers they met on the beach--who seemed a bit too interested in little Latisha's treasures--have followed them back to their sleepy town. In *Miss Julia Weathers the Storm*, another highly entertaining and delightful installment in the series by Ann B. Ross, Miss Julia must rely on her quick wit and strong will to protect Latisha, get to the bottom of LuAnne's predicament, and once again save the day. Watch out for Ross's Miss Julia Raises

the Roof, coming in April 2018!

Surviving Sandy Scott Mazzella, 2014-12 *Winner of four national awards for excellence in book publishing.* Superstorm Sandy was an epic storm, the greatest natural disaster in the Jersey Shore's recorded history. Throughout Southern Ocean County it disrupted lives and rearranged neighborhoods. It was a defining moment and, for many, a hard lesson about complacency, natural forces, and building castles on shifting sand. In this full-color book, readers experience the superstorm from its inception through the devastating impact of its tidal surge on the Long Beach Island area. And, like its survivors, you come away shaken but determined, with a new appreciation for the power of nature and the fragility of things we hold dear. This is the first book with a comprehensive narrative story of the storm -- not just photographs and captions. And although it focuses on the Long Beach Island community, that narrative also represents much of the experience of the entire Jersey Shore. Weather experts explore the incredible meteorology of Hurricane Sandy and its metamorphosis into a hybrid superstorm. Residents and first responders share their personal stories -- their fears, their bravery, their fortitude, and, ultimately, their acceptance. Because so few people actually remained on the front lines, these first-hand stories from inside the storm are an extraordinary look at landfall and human response. Each of us was affected by the tribulations our battered shore endured after landfall. And, in the end, the triumph of our spirit defines us all -- how we picked ourselves up, got to work on recovery, and generously helped others by lending a hand, donating, or offering a shoulder to cry on. The stories in Surviving Sandy help guide us to rebuild stronger -- and smarter. This softcover edition includes 256 color photographs from the height of the storm, the aftermath and the recovery; it includes a Foreword and Introduction from Great Storms of the Jersey Shore authors Margaret Thomas Buchholz and Larry Savadove. Winner of four national awards -- including a

Gold Medal (Nature & Environment), and three Silver Medals (Political/Current Events; Cover Design; and Regional) -- in the IBPA Benjamin Franklin Awards.

Cadillac Beach Tim Dorsey, 2009-03-17 And busting out of Chattahoochee State Hospital ... without his meds! The thrill-killing Floridaphile needs to get to the bottom of his bookie grandad's bizarre 1964 death -- not to mention launch Serge & Lenny's Florida Experience, the new Miami specialty tour venture he's cooked up with his best brain-dead druggie-buddy. The Beaches Are Moving Wallace Kaufman, Orrin H. Pilkey, 1983 Our beaches are eroding, sinking, washing out right under our houses, hotels, bridges; vacation dreamlands become nightmare scenes of futile revetments, fills, groins, what have you—all thrown up in a frantic defense against the natural system. The romantic desire to live on the seashore is in doomed conflict with an age-old pattern of beach migration. Yet it need not be so. Conservationist Wallace Kaufman teams up with

marine geologist Orrin H. Pilkey Jr., in an evaluation of America's beaches from coast to coast, giving sound advice on how to judge a safe beach development from a dangerous one and how to live at the shore sensibly and safely.

Dune Erosion During Storm Surges Jacob Simon Marie van Thiel de Vries, 2009 Because large parts of The Netherlands lie below sea level and are largely protected from flooding by a narrow strip of sandy beaches and dunes, optimal management of this coastal strip is of vital importance. This work extends the existing knowledge of dune erosion during storm surges as it occurs along the Dutch coast. Among the areas discussed are: a large scale erosion experiment designed to improve insight into near dune hydrodynamics, sediment transport and interaction between dune face and swash zone; detailed modeling to study dune erosion physics, validated against measurements, and a morphodynamic dune erosion model applied in a variety of dune erosion conditions. This publication represents a valuable contribution to an improved understanding of dune erosion, an increasingly important area of study with regard to climate change and rising sea levels.

Hurricane Hazel in the Carolinas Jay Barnes, 2010 Hurricane Hazel swept the U.S. Eastern Seaboard in mid-October 1954, eventually landing in the record books as one of the most deadly and enduring hurricanes. After punishing Haiti with mudslides that killed hundreds, Hazel edged northward, striking the Carolina coast as a ferocious category four. Landfall occurred near the South Carolina-North Carolina border, where a massive surge washed over barrier beaches and swept away hundreds of homes. Coastal communities like Myrtle Beach, Long Beach, Carolina Beach, and Wrightsville Beach caught the brunt of the storm tide and suffered heavy damages. Hazel barreled inland

and battered eastern North Carolina with 100-plus mile-per-hour gusts that toppled trees and power lines and peeled away rooftops. It then raced northward, setting new wind records across seven states. In Ontario, it spawned flash floods that became the most deadly in Canadian history. When it was all over, Hazel had killed more than 1,000 and left a trail of destruction across the hemisphere. But nowhere was its impact more dramatic than in the Carolinas. For more than 20 years, Tar Heel native Jay Barnes has studied and written about America's hurricane history. In *Hurricane Hazel in the Carolinas*, he shares dozens of striking photographs from his collection along with his insights into the nature of this benchmark hurricane. The *Images of America* series celebrates the history of neighborhoods, towns, and cities across the country. Using archival photographs, each title presents the distinctive stories from the past that shape the character of the community today. Arcadia is proud to play a part in the preservation of local heritage, making history available to all.

Delaware's 1962 Northeaster Wendy Carey, Tony Pratt, Kimberly McKenna, 2014 Delaware's March 1962 storm caused unprecedented destruction to life and property. Unusually high wind-driven tides carried breaking waves inland, destroying buildings and structures that, ordinarily, would have been beyond the reach of the surf. These photographs and the story they tell about devastation and destruction carry a strong message about hazards, risks, and the vulnerability of Delaware's communities and environments.

Hurricane Beach Lexie Nicholas, 2020-12-31 Can a hurricane threatening the Georgia coast reunite the once high school sweethearts? With her disgruntled teenage daughter in tow, Anna, a recently divorced paramedic, returns to Magnolia Hill to heal and to prove to herself she is capable of providing for them on her own. Soon her old small-town life she had left behind catches up with her-but not all in a good way. Only by facing her

fears and the people who've told her she's not worthy can she make room in her heart to love again. Two years after a car accident that claimed his wife, Chief Meteorologist Jason Morrison is still grieving. However, when he collides with Anna at a community event, memories of his senior year resurface, and he can't get her out of his mind. He invites her to tag along on an opportunity of a lifetime-to cover Hurricane Gerard's landfall at Tybee Island-just as friends. Nothing ever goes as planned, though. Spending time together rekindles the familiar feelings they had for each other when they dated in high school nearly two decades ago. But they can't be together. Too much has changed. He's made a sacred promise. She has to learn to trust again. Will they find a way? If you enjoy clean romances with charming characters and a small-town feel, stories about second chances, and the excitement of stormy weather, then you'll love Lexie Nicholas's debut novel.
