Just Like Jonah Jarod Gordon,2023-07-21 In this book, Jarod paints a vivid picture to help us see how we act and think like Jonah. I'll give you a fair warning: it's more often than we might want to admit. Jarod has the heart of a pastor, and he desires to help us see beyond the obvious to the not-so-known parts of the story. When we do that, we'll see that Jonah's story is one we can relate to at every level.

The Human Tradition in American Labor History Eric Arnesen,2004 Assembles biographical stories of famous leaders and unknown activists, covering the 18th century up to 1970. Pacific Coast Rick Steber,2012-08-18 Sir Francis Drake, the daring English pirate, was the first European to sail the stormy North Pacific. In 1579, after having raided the Spanish settlements of South America, he sought to escape up the coast through an inland waterway that would return his ship, the Golden Hind, to the Atlantic Ocean. In his wake came other explorers. They soon concluded a Northwest Passage did not exist and turned their attention to exploiting the natural resources of the region. Trade was initiated with the natives, trinkets for sea otter fur. The fur was transported to China where riches beyond the wildest dreams awaited the adventuresome sailors. Within a decade the sea otter played out and mountain men pushed inland, trading and trapping beaver. The great companies, Hudson's Bay, North West and Pacific Fur fought for the rich spoils. The discovery of gold in California signaled the start of a era. Miners flooded to the Sierra Nevada mountains. Eventually they became disillusioned with the diggings and drifted north, discovering veins of gold in rock and placer pockets in creek bottoms and even on ocean beaches. Following the miners came a wave of pioneers who settled interior valleys, laid claim to the land and plowed the virgin soil. A few hardy souls pushed over the last mountain range, going as far west as land allowed. They were rugged individualists who ever after were isolated by the deep woods on one side and the wide Pacific on the other.

Formation Processes of Maritime Archaeological Landscapes Alicia

Caporaso,2017-01-05 Research into the anthropogenic and taphonomic processes that affect the formation of maritime archaeological resources has grown significantly over the last decade in both theory and the analysis of specific sites and associated material culture. The addition of interdisciplinary inquiry, investigative techniques, and analytical modeling, from fields such as engineering, oceanography, and marine biology have increased our ability to trace the unique pathways through which archaeological sites progress from initial deposition to the present, yet can also link individual sites into an integrated socio-environmental maritime landscape. This edited volume presents a global perspective of current research in maritime archaeological landscape formation processes. In addition to “classically” considered submerged material culture and geography, or those that can be accessed by traditional underwater methodology, case studies include less-often considered sites and landscapes. These landscapes, for example, require archaeologists to use geophysical marine survey equipment to characterize extensive areas of the seafloor or go above the surface to access maritime archaeological resources that have received less scholarly attention.

Tears On The Equator Gerasimos I. Kambites,2014-09-05 In the beginning, in 1973, when a young couple met at a seminary in the city of Boston, during a time of great racial tension over an issue called bussing, they dared to share a dream and the dream was about faith, progress, unity, love and sustainable development in Africa. She trained in education, her Canadian husband schooled in medicine. They would return to the Ugandan paradise island of her youth in Lake Victoria only to discover that beauty hid the beast; that an interracial couple, white and black and their Ancient Orthodox faith would cause a spark which turned verdant fields into flames of conflict. Truths would be told and taboos would be broken. Courage would be unveiled and passions uncovered. This story is about the glue that maintained the vision until time, politics and war wore it away. It is also about survival and rebirth and the ultimate seeds which gave birth to a new crop of hopes. “What are you looking at old man?” the young doctor queried. The elder was looking into a rotten log. “I am seeing the face of God,” he smiled standing up, allowing the doctor to see the sun kissed orchid.” “The face of God,” he said, and so it was, for their five years on Bukasa island uncovered the weaknesses and strengths of this couple and the community around them. That they would fail was inevitable, but that they would survive in a real and mystical way was the hidden treasure.

The Progress of This Storm Andreas Malm,2018-02-13 An attack on the idea that nature and society are impossible to distinguish from each other In a world careening towards climate chaos, nature is dead. It can no longer be separated from society. Everything is a blur of hybrids, where humans possess no exceptional agency to set them apart from dead matter. But is it really

so? In this blistering polemic and theoretical manifesto, Andreas Malm develops a counterargument: in a warming world, nature comes roaring back, and it is more important than ever to distinguish between the natural and the social. Only with a unique agency attributed to humans can resistance become conceivable.

Meanwhile, in the Land of the Denes, Arthur and his fellow prisoners enrage the Dene King when they are presented at court.
