The Beginner Lyn Hejinian,2002 Poetry. Across several decades, Lyn Hejinian has been constructing an exemplary and profoundly influential body of exploratory work, work of a discrepant lucidity that undermines commonplace assumptions of the permissible and the possible. Her poetry and her prose, as well as her frequent artistic collaborations, probe with incisive wit and formal invention fundamental questions of subjectivity and community, content and communication, gender and expressivity. *THE BEGINNER* was originally published in a limited edition in 2001 by Spectacular Books, and is now being reprinted by Tuumba Press. I'm beginning, and thinking that I think myself launched into something, but the actual beginning has occurred long before and as a result the thought that I'm beginning is not a beginning but a pause, a phrase, though one incorporated into a beginning (the beginning concealed around it).

A Beginner's Book of TEX Silvio Levy, Raymond Seroul, 2012-09-21 The last two decades have witnessed a revolution in the realm of typography, with the virtual disappearance of hot-lead typesetting in favor of the so-called digital typesetting. The principle behind the new technology is simple: imagine a very fine mesh superimposed on a sheet of paper. Digital typesetting consists in darkening the appropriate pixels (tiny squares) of this mesh, in patterns corresponding to each character and symbol of the text being set. The actual darkening is done by some printing device, say a laser printer or phototypesetter, which must be told exactly where the ink should go. Since the mesh is very fine—the dashes surrounding this sentence are some six pixels thick, and more than 200 pixels long—the printer can only be controlled by a computer program, which takes a high-level description of the page in terms of text, fonts, and formatting commands, and digests all of that into low-level commands for the printer. TEX is such a program, created by Donald E. Knuth, a computer scientist at Stanford University.
