*Serbia and the Serbs in World War Two* Sabrina P. Ramet,2011-10-31 A valuable and objective reassessment of the role of Serbia and Serbs in WWII. Today, Serbian textbooks praise the Chetniks of Draža Mihailović and make excuses for the collaboration of Milan Nedić's regime with the Axis. However, this new evaluation shows the more complex and controversial nature of the political alliances during the period.

Civil Resistance Kurt Schock,2015-08-15 In the past quarter century the world has witnessed dramatic social and political transformations, due in part to an upsurge in civil resistance. There have been significant uprisings around the globe, including the toppling of communist regimes in Eastern Europe, the Color Revolutions, the Arab Spring, protests against war and economic inequality, countless struggles against corruption, and demands for more equitable distribution of land. These actions have attracted substantial scholarly attention, reflected in the growth of literature on social movements and revolution as well as literature on nonviolent resistance. Until now, however, the two bodies of literature have largely developed in parallel—with relatively little acknowledgment of the existence of the other. In this useful collection, an international and interdisciplinary group of scholars takes stock of the current state of the theoretical and empirical literature on civil resistance. Contributors analyze key

processes of nonviolent struggle and identify both frictions and points of synthesis between the narrower literature on civil resistance and the broader literature on social movements and revolution. By doing so, Civil Resistance: Comparative Perspectives on Nonviolent Struggle pushes the boundaries of the study of civil resistance and generates social scientific knowledge that will be helpful for all scholars and activists concerned with democracy, human rights, and social justice.

*The gender dimension of non-medical use of prescription drugs in Europe and the Mediterranean region* Pompidou Group,2015-04-13 In recent years, the non-medical use of prescription drugs (NMUPD) has caused increasing public concern around the globe. Women constitute a special risk category for NMUPD and understanding gender as it relates to this phenomenon is now a critical requirement for effective policy and practice. Intended primarily for policy makers and researchers, this Pompidou Group publication aims to explore gender specificities in terms of the use and misuse of prescription drugs in Europe and the Mediterranean region. Using secondary sources, it also seeks to identify gaps in the data available in the area covered and to make recommendations for further research, coherent policy development and effective, gender-sensitive practice. This publication is an initial attempt to map this emerging phenomenon and to identify lacunae and avenues for further investigation. It constitutes an important resource for those interested in the interaction between gender and drug use.

*Branding Post-Communist Nations* Nadia Kaneva,2011-08-26  
Nation branding--a set of ideas rooted in Western marketing--gained popularity in the post-communist world by promising a quick fix for the identity malaise of transitional societies. Since 1989, almost every country in Central and Eastern Europe has engaged in nation branding initiatives of varying scope and sophistication. For the first time, this volume collects in one place studies that examine the practices and discourses of the nation branding undertaken in these countries. In addition to documenting various rebranding initiatives, these studies raise important questions about their political and cultural implications.

**A History of Serbian Mediaeval Law** Srđan

Šarkić,2023-05-01 This book explores the complete history of Serbian law in the Middle Ages, covering the 12th to the 15th centuries, which until now has been largely unstudied in international scholarship. Firmly rooted in primary source research and showing strong awareness of the contemporary historical context, this comprehensive study examines different types of law – such as criminal law, constitutional law, and civil law – and the various legal systems and procedures in place during this time, offering a valuable synthesis while also presenting new views and novel interpretations of Serbian legal history.

Serbia and the Church of England Mark D. Chapman,Bogdan Lubardić,2022-07-17 This book presents the first comprehensive account of the changing ecumenical relationships between Britain and Serbia. While the impetus for the collection is the commemoration of the Serbian seminarians who settled in and around Oxford towards the end of the First World War, the scope is much broader, including detailed accounts of the relationships between the Church of England and Serbia and its Orthodox

Church from the middle of the nineteenth century until World War II. It includes studies of leading thinkers from the period, especially the charismatic Nikolaj Velimirović. The contributors use many unpublished resources that reveal the centrality of the churches in promoting the Serbian cause through the course of the First World War and in its aftermath.

**Chinese Migrants in Russia, Central Asia and Eastern Europe**

Felix B. Chang, Sunnie T. Rucker-Chang, 2013-03 Much of the former Soviet bloc has become a destination for new Chinese migrants. Throughout Russia, Eastern Europe and Central Asia, Chinese migrants are engaged in entrepreneurial activities, primarily as petty merchants of consumer goods in unsteady economies. This book situates these migrants within the broader context of Chinese globalization and China's economic rise. It traces the origins of Chinese migration into the region, as well as the conditions that have allowed migrants to thrive. Furthermore, it discusses the perception that Chinese globalization is purely economic and explores the relationship among petty merchants, labourers and institutional investors. Finally, by examining the movement of China's minorities into Central Asia, this book challenges the ethnic construct of new Chinese migration.

[Establishing Food Security and Alternatives to International Trade in Emerging Economies](#) Erokhin, Vasily, 2017-07-13 The process of food production and distribution has grown into a global corporate system in recent years. This has caused significant impacts on sustainability on an international scale, particularly for developing nations. Establishing Food Security and Alternatives to International Trade in Emerging Economies is a pivotal reference source for the latest scholarly research on agricultural trade relations and trade liberalization in the context of developing countries. Highlighting a range of pertinent topics such as crop productivity, rural development, and value-added agriculture, this book is ideally designed for academics, researchers, graduate students, and practitioners interested in the current state of global food markets.

**Codification in International Perspective** Wen-Yeu Wang, 2014-02-12 No aspect of legal formalism has interested comparative jurists as much as the extent of legislative codification across legal systems. This book looks at codification from a broad, international perspective, discussing general themes as well as various legal fields. The first of two volumes on this subject begins with a general theoretical and historical view of codification, followed by a series of other horizontal inquiries. It encompasses papers focusing on several significant contemporary issues in codification, including codification of private law in post-soviet times, criminal law codification beyond the nation state and soft codification of private law. In addition, this volume consists of general reports and national reports on

administrative procedure and human rights, providing a comparative analysis of codification of law. This book is developed from papers presented at the 2012 Thematic Congress of the International Academy of Comparative Law.

**Infectious Diseases of Montenegro** Gideon Informatics, Inc., Stephen Berger, MD, 2022-03-17 Infectious Diseases of Montenegro is one in a series of GIDEON ebooks which explore all individual infectious diseases, drugs, vaccines, outbreaks, surveys and pathogens in every country of the world. Data are based on the GIDEON web application ([www.gideononline.com](http://www.gideononline.com)) which relies on standard text books, peer-review journals, Health Ministry reports and ProMED, supplemented by an ongoing search of the medical literature. Chapters are arranged alphabetically, by disease name. Each chapter is divided into three sections: 1. Descriptive epidemiology 2. Status of the disease in Montenegro 3. References A chapter outlining the routine vaccination schedule of Montenegro follows the diseases chapters. There are 364 generic infectious diseases in the world today. 216 of these are endemic, or potentially endemic, to Montenegro. A number of other diseases are not relevant to Montenegro and have not been included in this book. In addition to endemic diseases, all published data regarding imported diseases and infection among expatriates from Montenegro are included.

**The Legacy of Serbia's Great War** Alex Tomic, 2024-01-05  
In the winter of 1915, following the invasion of Serbia by the Central Powers, the Serbian Army retreated across the mountains of Albania and Montenegro together with thousands of civilians. Around 240,000 lost their lives. Today, the story of the retreat is little known, except in Serbia where it represents the heroic Serbian sacrifice in the Great War. In this book Alex Tomic examines the centenary events memorializing the First World War with the retreat at its core, and provides a persuasive account of the ways in which the remembrance of Serbian history has been

manipulated for political purposes. Whether through commemorations, ceremonies, or grass-root initiatives, she demonstrates how these have been used as distractions from the more recent unexamined past and in doing so provides an important new perspective on the cultural history of commemoration.
