Taking Shelter From the Storm Federal Emergency Management Agency, 2014-08-19 Every year, tornadoes, hurricanes, and other extreme windstorms injure and kill people, and damage millions of dollars worth of property in the United States. Even so, more and more people build houses in tornado- and hurricane-prone areas each year, possibly putting themselves into the path of such storms. Having a shelter, or a safe room, built into your house can help you protect yourself and your family from injury or death caused by the dangerous forces of extreme winds. It can also relieve some of the anxiety created by the threat of an oncoming tornado or hurricane. Should you consider building a shelter in your house to protect yourself and your family during a tornado or hurricane? The answer depends on your answers to many questions, including: - Do you live in a high-risk area? - How quickly can you reach safe shelter during extreme winds? - What level of safety do you want to provide? - What is the cost of a shelter? This guide will help you answer these and other questions so you can decide how best to protect yourself and your family. It includes the results of research that has been underway for more than 20 years, by Texas Tech University's Wind Engineering Research Center (WERC) and other wind engineering research facilities, on the effects of extreme winds on buildings. The guide also provides shelter designs that will show you and your builder/contractor how to construct a shelter underneath a new house, in the basement of a new house, or in an interior room of a new house, or how to modify an existing house to add a shelter in one of these areas. These shelters are designed to protect you and your family from the high winds expected during tornadoes and hurricanes and from flying debris, such as wood studs, that tornadoes and hurricanes usually create. The National Association of Home Builders (NAHB) Research Center has evaluated these designs for construction methods, materials, and costs. Engineers at Texas Tech University have confirmed the design requirements for the expected forces from wind pressure and the impact of typical flying debris. The shelters are designed with life safety as the primary consideration.

Storm Cursed Patricia Briggs, 2019-05-07 In this powerful entry in the #1 New York Times bestselling series, Mercy Thompson must face a deadly enemy to defend all she loves... My name is Mercedes Athena Thompson Hauptman, and

I am a car mechanic. And a coyote shapeshifter. And the mate of the Alpha of the Columbia Basin werewolf pack. Even so, none of that would have gotten me into trouble if, a few months ago, I hadn't stood upon a bridge and taken responsibility for the safety of the citizens who lived in our territory. It seemed like the thing to do at the time. It should have only involved hunting down killer goblins, zombie goats, and an occasional troll. Instead, our home was viewed as neutral ground, a place where humans would feel safe to come and treat with the fae. The reality is that nothing and no one is safe. As generals and politicians face off with the Gray Lords of the fae, a storm is coming and her name is Death. But we are pack, and we have given our word. We will die to keep it.

Raised bed gardening is the fastest-growing garden strategy today, and Raised Bed Revolution is the definitive guidebook to mastering this consistently proven and effective gardening method. Raised Bed Revolution provides you with information on size requirements for constructing raised beds, height suggestions, types of materials you can use, and creative tips for fitting the maximum garden capacity into small spaces—including vertical gardening. Enhanced with gorgeous photography, this book covers subjects such as growing-medium options, rooftop gardening, cost-effective gardening solutions, planting tips, watering strategies (automatic water drip systems and hand watering), and more. The process of creating and building raised beds is a cinch, too, thanks to the extensive gallery of design ideas and step-by-step projects. This gardening strategy is taking serious root. Why? Several reasons: · Raised beds allow gardeners to practice space efficiency as well as accessibility (the beds can be customized to be any height). · Raised beds permit gardeners to use their own soil, and they can be designed with wheels for easy portability if partial sunlight is a problem. · Water conservation is easier for gardeners who use raised beds. · Pest control is assisted because most garden pests can’t make the leap up into the raised bed. Find out more about why everyone is joining the raised bed revolution, roll up your sleeves and join in! “This is a great good for the experienced gardener as well as the novice.” —David Williams, Four Shires magazine

It offers beginning and intermediary steps for growth and renewal. Churches, no matter what situation they're in, will be able to jump in and get to work. It has a sense of humor. Baskette's easygoing, often self-deprecating writing style and approachable strategies will empower the reader and their church to revitalize itself. (If her church could do it, we can, too!)

Run the Storm George Michelsen Foy, 2018-05-01 In the bestselling tradition of *The Perfect Storm* and *The Finest Hours*, “an exquisitely written and dramatic book...a literary page-turner” (Doug Stanton, #1 New York Times bestselling author of *Horse Soldiers*)—the 2015 mysterious disappearance of the SS *El Faro*, a gigantic American cargo ship that sank in the Bermuda Triangle, taking with it thirty-three lives. On October 1, 2015, the SS *El Faro*, a massive American cargo ship disappeared in Hurricane Joaquin, a category 4 storm. The ship, its hundreds of shipping containers, and its entire crew plummeted to the bottom of the ocean, three miles down. It was the greatest seagoing US merchant marine shipping disaster since World War II. The massive ship had a seasoned crew, state-of-the-art navigation equipment, and advance warning of the storm. It seemed incomprehensible that such a ship could sink so suddenly. How, in this day and age, could something like this happen? Relying on Coast Guard inquest hearings, as well as on numerous interviews, George Michelsen Foy brings us “the most insightful exploration of this unthinkable disaster” (Outside), a story that lasts only a few days, but which grows almost intolerably suspenseful as deep-rooted flaws leading to the disaster inexorably link together and worsen. We see captain, engineers, and crew fight for their lives, and hear their actual words (as recorded on the ship’s black box) while the hurricane relentlessly tightens its noose around the ship. We watch, minute by minute, all that is happening on board—the ship’s mysterious tilt to one side, worried calls to the engine room, ship-to-shore reports, the courage of the men and women as they fight to survive, and the berserk ocean’s savage consumption of the massive hull. And through it all, the pain and ultimate resilience of the families of *El Faro*’s crew. Now with a new afterword, this “tour de force of nautical expertise” (Ocean Navigator) is a masterwork of stunning power.
