**Bringer of Storms** Lowell B. Graham, 2005 While Wylla rules Enthanin and civil war rages in Kirthanin, an even greater threat emerges from the subterranean lair of Malek.

**Binding Power** Anastasia Marie, 2012-12-11 On the eve of the destruction of the Sacred Tree, one man's life will change forever. Born in a dystopian era of flying cars and Skytowers, Bartholomew Parker is thrown from a world of science and technology into one of primal nature and magic. His purpose: to balance what mankind has done to the Earth and unite those who fear what cannot be put into equations with those who follow the will of a mythical goddess. The city-dwellers, so comfortable in their sterile, safe world, have sacrificed most of the wilds in their never-ceasing need to expand and advance. The Druids, who listen to the voice of the Mother Earth Herself, have waited for the time when Her champion would be revealed, unifying their world. Only in harmony can mankind be saved from destruction... The Answering Storm is coming...

**Weaving Words and Binding Bodies** Megan Cavell, 2016-05-06 References to weaving and binding are ubiquitous in Anglo-Saxon literature. Several hundred instances of such imagery occur in the poetic corpus, invoked in connection with objects, people, elemental forces, and complex abstract concepts. *Weaving Words and Binding Bodies* presents the first comprehensive study of weaving and binding imagery through intertextual analysis and close readings of *Beowulf*, riddles, the poetry of Cynewulf, and other key texts. Megan Cavell highlights the prominent use of weaving and binding in previously unrecognized formulas, collocations, and type-scenes, shedding light on important tropes such as the lord-retainer “bond” and the gendered role of “peace-weaving” in Anglo-Saxon society. Through the analysis of metrical, rhetorical, and linguistic features and canonical and neglected texts in a wide range of genres, *Weaving Words and Binding Bodies* makes an important contribution to the ongoing study of Anglo-Saxon poetics.

Determinants of synaptic information transfer: From Ca<sup>2+</sup> binding proteins to Ca<sup>2+</sup> signaling domains Philippe Isope, Christian D. Wilms, Hartmut Schmidt, 2016-05-26 The cytoplasmic free Ca<sup>2+</sup> concentration ([Ca<sup>2+</sup>]<sub>i</sub>) is a key determinant of neuronal information transfer and processing. It controls a plethora of fundamental processes, including transmitter release and the induction of synaptic plasticity. This enigmatic second messenger conveys its wide variety of actions by binding to a subgroup of Ca<sup>2+</sup> binding proteins (CaBPs) known as “Ca<sup>2+</sup> sensors”. Well known examples of Ca<sup>2+</sup> sensors are Troponin-C in skeletal muscle, Synaptotagmin in presynaptic terminals, and Calmodulin (CaM) in all eukaryotic cells. Since the levels of [Ca<sup>2+</sup>]<sub>i</sub> directly influence the potency of Ca<sup>2+</sup> sensors, the Ca<sup>2+</sup> concentration is tightly controlled by several mechanisms including another type of Ca<sup>2+</sup> binding proteins, the Ca<sup>2+</sup> buffers. Prominent examples of Ca<sup>2+</sup> buffers include Parvalbumin (PV), Calbindin-D28k (CB) and Calretinin (CR), although for the latter two Ca<sup>2+</sup> sensor functions were recently also suggested. Ca<sup>2+</sup> buffers are distinct from sensors by their purely buffering action, i.e. they influence the spatio-temporal extent of Ca<sup>2+</sup> signals, without directly binding downstream target proteins. Details of their action depend on their binding

kinetics, mobility, and concentration. Thus, neurons can control the range of action of  $\text{Ca}^{2+}$  by the type and concentration of CaBPs expressed. Since buffering strongly limits the range of action of free  $\text{Ca}^{2+}$ , the structure of the  $\text{Ca}^{2+}$  signaling domain and the topographical relationships between the sites of  $\text{Ca}^{2+}$  influx and the location of the  $\text{Ca}^{2+}$  sensors are central determinants in neuronal information processing. For example, postsynaptic dendritic spines act to compartmentalize  $\text{Ca}^{2+}$  depending on their geometry and expression of CaBPs, thereby influencing dendritic integration. At presynaptic sites it has been shown that tight, so called nanodomain coupling between  $\text{Ca}^{2+}$  channels and the sensor for vesicular transmitter release increases speed and reliability of synaptic transmission. Vice versa, the influence of an individual CaBP on information processing depends on the topographical relationships within the signaling domain. If e.g. source and sensor are very close, only buffers with rapid binding kinetics can interfere with signaling. This Research Topic contains a collection of work dealing with the relationships between different  $[\text{Ca}^{2+}]_i$  controlling mechanisms in the structural context of synaptic sites and their functional implications for synaptic information processing as detailed in the below Editorial.

**Storm Surge** Kerri Lewis, 2019-08-17 An unsolved death brings investigative reporter Janet Reed face-to-face with a mystery that may claim her life in this novel of secrets and suspense. Still recovering from the sudden loss of her son, Janet Reed agrees to accompany her husband on a business trip along the California coast. With her marriage threatening to crumble and her own grief still raw, she needs a distraction. A touching memorial bench for a deceased teenage girl at the cliff by the lighthouse and the mystery surrounding her death provides just that. What starts as mild curiosity spirals into a full investigation of the unsolved death when she is thrust into the middle of a feud between two men with ties to the young woman. Janet forges a connection with each of the men and, as the mystery deepens, finds herself drawn into both their lives in unexpected ways. As she delves further into the case, Janet discovers that the dead girl may have had more secrets than anyone knew and unearthing new information about her past brings more danger than Janet ever could have anticipated. Her quest for the truth will uncover secrets from the aftermath of a hurricane in New Orleans, the puzzling involvement of the FBI, and a Vietnamese crime organization with unfinished business with someone in this sleepy town. Janet must

confront her own past - and the painful loss that brought her across the country - as she fights for the truth, love, and ultimately her own life. Who can she trust when everyone has their own secrets?

**Dutch Decorated Bookbinding in the Eighteenth Century** Jan Storm van Leeuwen, 2006 Awarded with the 15th ILAB Breslauer Prize for Bibliography 2010. This classic can be ranked among the well-known international standard works on the subject of bookbinding. The author, Dr. Jan Storm van Leeuwen, gives in this work an elaborate general historical introduction to his subject. It also contains a general introduction to each province, as they were known in the eighteenth century, and an extensive overall picture of the towns where luxury bindings were manufactured, describing the bookbinder's workshops and binderies of each town. The historical introduction is completed with a catalogue of the approximately 2000 relevant bindings in the collections of the Koninklijke Bibliotheek (National Library of the Netherlands) and its sister institution the Museum Meermanno-Westreenianum. About 1500 other bindings that the author studied over time in other collections are also described. But the most important feature of this work is that all (nearly 10.000) stamps on these bindings are represented by a picture. Never before so many bindings (3500) have been recorded, described and discussed in such detail and with the benefit of an established model and terminology. Vol. I: General historical introduction; Noord Holland Vol. IIa: Zuid Holland Vol. IIb: Zeeland, Province of Utrecht, Friesland, Province of Groningen, Drente, Overijssel,

Gelderland, Noord-Brabant and Limburg; Place unknown or irrelevant and Bindings in exceptional materials Vol. III: Catalogue of bindings in the Koninklijke Bibliotheek and the Museum Meermanno-Westreenianum; List of Bindings in other collections; Overview of Rubbings important for identification; Diagrams; Books referred to with abbreviated titles; Index to the text; Index to Catalogue and List

Before the end of their twelve-hour flight, the Hurricane Hunters will have gathered enough information to save many lives. Acclaimed author and artist Chris L. Demarest takes you inside the storm with these real-life adventurers who risk their lives to keep our shorelines safe.

*Binding Violence* Moira Fradinger, 2010-06-03 Binding Violence exposes the relation between literary imagination, autonomous politics, and violence through the close analysis of literary texts—in particular Sophocles' Antigone, D. A. F. de Sade's 120 Days of Sodom, and Vargas Llosa's The Feast of the Goat—that speak to a blind spot in democratic theory, namely, how we decide democratically on the borders of our political communities. These works bear the imprint of the anxieties of democracy concerning its other—violence—especially when the question of a redefinition of membership is at stake. The book shares the philosophical interest in rethinking politics that has recently surfaced at the crossroads of literary criticism, philosophy, critical theory, and psychoanalysis. Fradinger takes seriously the responsibility to think through and give names to the political uses of violence and to provoke useful reflection on the problem of violence as it relates to politics and on literature as it relates to its times.

**Storm Unbound** Leo Hull, 2020-09-02 The mission should have been a few simple weeks exploring uninhabited wilderness. But now Tristan is stuck in a land filled with wild women, exotic magic, and dark dangers. His beautiful commander--his only way back and the one person with any faith in him--has caught the eye of a freakish crime lord backed by a shadowy cult. Tristan has his own magic, but to save them both, he'll need to confront his doubts and bind willing women brandishing destructive Fallen powers. If Tristan succeeds, will he even want to return? It's a question as unsettling as his enemy, and one he can only answer after defeating the rising tide of foes. To win he will need to do more than ride a bound storm--he has to unleash its fury himself. This story contains graphic violence, eager women, and explicit harem relationships. Only vanquished foes fade to black.
