The Rubbish Goblins Becky Clemett,

Blood Stone Irna van Zyl,2020-03-01 All hell breaks loose when Detective Storm van der Merwe's mom is pushed under a train at Paddington Station. Storm must rush to London, even though she's in the middle of a murder investigation: leading South African fashion designer Beebee Bukelwa Babu was found dead in a luxury Hermanus hotel. Drumming up a team to investigate Beebee's death is proving difficult in a town crippled by protest action and in the grip of a menacing charismatic prophet firing up crowds to hysteria. Storm soon realises that her mom was a deliberate target. And she is one too. Meanwhile Storm's former colleague, the bumbling Andreas Moerdyk, now a PI, is doing his best to locate a missing and very valuable red diamond. From the murky streets of London to the diamond bourse in Antwerp, from secluded Port Nolloth to Storm's beloved Hermanus, Irna van Zyl's third crime novel unfolds at a heart-stopping pace.

Proceedings Of The Coastal Sediments 2011, The (In 3 Volumes) Roberts Tiffany M, Rosati Julie D, Wang Ping, 2011-04-21 This proceedings contains nearly 200 papers on cutting-edge research presented at the seventh international Symposium on Coastal Engineering and Science of Coastal Sediment Processes, held May 2-6, 2011, in Miami, Florida, USA. This technical specialty conference was devoted to promoting an interdisciplinary exchange of state-of-the-art knowledge among researchers in the fields of coastal engineering, geology, oceanography, and related disciplines, with a theme of bringing together theory and practice. Focusing on the physical aspects of sediment processes in various coastal environments, this three-volume conference proceedings provides findings from the latest research and newest engineering applications. Session topics cover a wide range including barrier-island morphodynamics and evolution, beach nourishment and shore protection, coastal dunes, cohesive sediment transport, field and laboratory measurements of sediment transport processes and numerical modeling, gravel transport, large-scale and long-term coastal changes, LiDAR and remote sensing, longshore and cross-shore sediment transport, marsh

and wetlands, regional sediment management, river deltas, sea-level changes, shelf and sand bodies, shoreline changes, tidal inlets and navigation channels. A special session on recent research findings at the Northern Gulf of Mexico is also included.

Waves, Particles, and Storms in Geospace Georgios Balasis, Ioannis A. Daglis, Ian R. Mann, 2016-11-03 Geospace features highly dynamic populations of charged particles with a wide range of energies from thermal to ultra-relativistic. Influenced by magnetic and electric fields in the terrestrial magnetosphere driven by solar wind forcing, changes in the numbers and energies of these particles lead to a variety of space weather phenomena, some of which are detrimental to space infrastructure. This book presents an overview of the latest discoveries and current scientific understanding of the coupling of electromagnetic waves and charged particles during magnetic storms, and explains the observed dynamics of these particle populations. The book furthermore includes investigations relevant to understanding and forecasting this space environment and the adverse impacts of space weather. High-energy electrons and ions in the Van Allen radiation belts and the ring current are of particular interest and importance with regard to the operation of space-based technological infrastructure upon which 21st century civilisation increasingly relies. This book

presents the latest research on the sources, transport, acceleration and loss of these energetic particle populations, as well as their coupling during geospace magnetic storms.
