Writing in Red Thomas W. Goldstein, 2017 In the German Democratic Republic words and ideas mattered, both for legitimizing and criticizing the regime. No wonder, then, that the ruling SED party created a Writers Union to mold what writers publicly wrote and said. Its chief task was ideological: creating a socialist and antifascist culture. But it was also supposed to advance its members' professional interests and enable them to act as public intellectuals with a say in the direction of socialism. Many writers demanded that it pursue this second function as well, which brought it into conflict with the SED. This book explores how the union became a site for the

contestation of writers' roles in GDR society with consequences well beyond the literary community. Union leaders, pressured by the SED or the secret police, usually acquiesced in enforcing regime demands, but by the 1980s many authors had adapted to the rules of the game, exploiting their union membership to insulate themselves from reprisal for their carefully worded critiques and in so doing beginning to break down limitations on public speech. The book explores how and why in the 1970s the Writers Union helped normalize relations between writers and state, yet over the course of the 1980s inadvertently aided the expansion of permissible speech, ultimately helping destabilize the East German system. Thomas W. Goldstein is Assistant Professor of History at the University of Central Missouri.

Mobile Multimedia in Action Ilpo Koskinen, 2017-07-05 Mobile Multimedia in Action displays a revealing picture of how people communicate using camera phones and other mobile multimedia devices. With such devices spreading faster than practically any other new technology, questions about how these devices are being used (and abused) to capture and distribute embarrassing or raunchy images and content, and what should be done about it, are surfacing. This volume presents the first detailed study of the use of these devices. Using a variant of social science research known as ethnomethodology,

Koskinen explores the kinds of images people take with camera phones and how they use sound to enhance these images. The book asks two main questions. First, what kinds of methods of expression, such as visuals or sound, do people use when they design multimedia messages? Second, how do people interact with and respond to each other through mobile multimedia devices? Koskinen has a broader objective centering on the impact of these devices on human relationships and society at large. He asks, What do people do with these devices? Is mobile telephony moving toward a more practical direction, or will it simply become a visual chatty channel fit for gossip but not for real news or other practical purposes? What kind of social activities and organizations does it best serve – peer-to-peer networks or institutional ones? Koskinen examines these questions from three unique perspectives: the design elements of mobile multimedia, which considers methods of expression people use in designing multimedia messages; mobile multimedia as interaction, which looks into how people interact with each other using this technology and makes a case for studying multimedia as a naturally occurring activity; and mobile multimedia in society, which searches for answers as to the societal consequences of mobile multimedia usage. A groundbreaking work, *Mobile Multimedia in Action* will be a fascinating read for both multimedia device professionals and everyday users alike. Providing a glimpse into the future, Koskinen asks where mobile multimedia technology is taking mankind and society.
