Opening Pandora's Box Ferdie Addis, 2011-10-13 Are you known to strike like a thunderbolt when things don't go your way? Are you fortunate enough to have the Midas touch? Have you ever been struck by Cupid's arrow? Classically derived expressions are commonly used in our everyday language, yet many of us have little knowledge of the Greek and Roman influences that inspired them. With *Opening Pandora's Box* you'll discover the fascinating stories behind familiar phrases like Achilles' Heel, a Nemesis, To Fly too Close to the Sun, and more. For example, did you know that... The lifesaving operation known as the Caesarean section is so named because Julius Caesar was delivered by being cut out of his mother's womb? The original labyrinth was built on the orders of King Minos of Crete after Aphrodite cursed his wife to fall in love with a bull and produce a monstrous baby? The king locked the baby in a maze so complicated and tangled that, once in, he would never emerge. The word cereal is derived from the Italian corn goddess Ceres? Pry open the lid of the English language to find the secrets behind classical phrases we use every day.

Opening Skinner's Box: Great Psychological Experiments of the Twentieth Century Lauren Slater, 2005-02-17 Through ten examples of ingenious experiments by some of psychology's most innovative thinkers, Lauren Slater traces the evolution of the century's most pressing concerns—free will, authoritarianism, conformity, and morality. Beginning with B. F. Skinner and the legend of a child raised in a box, Slater takes us from a deep empathy with Stanley Milgram's obedience subjects to a funny and disturbing re-creation of an experiment questioning the validity of psychiatric diagnosis. Previously described only in academic journals and textbooks, these often daring experiments have never before been narrated as stories, chock-full of plot, wit, personality, and theme.

Opening Pandora's Box G. Nigel Gilbert, Professor Nigel Gilbert, Michael Mulkay, 1984-02-23 This book proposes a fresh approach to sociological analysis and, in particular, to the analysis of scientific culture. It moves away from previous studies, which have tended to focus on scientists' actions and beliefs to show that analysis of scientific discourse can be productive and revealing. The book demonstrates that scientists produce varying accounts of their actions and beliefs in different social situations. Rather than attempting to extract one coherent interpretation from these diverse accounts, the study identifies two basic scientific repertoires and shows how scientists use them to create their discourse. This provides a point of departure for more complex analytical topics. Discourse analysis is applied to show how different degrees of 'consensus' can be ascribed to the same group of scientists at a given moment in time through the application of standard interpretive techniques. Finally, discourse analysis is used to explore scientists' humour, a neglected topic that is shown to provide important insights into the normally hidden interpretive regularities which underlie the cultural diversity of science.

Opening the Black Box Helene Grandvoinnet, Ghazia Aslam, Shomikho Raha, 2015-04-17 *Opening the Black Box: Contextual Drivers of Social Accountability* fills an important knowledge gap by providing guidance on how to assess contextual drivers of social accountability effectiveness. This publication aims to more strategically support citizen engagement at the country level and for a specific issue or problem. The report proposes a novel framing of social accountability as the interplay of constitutive elements: citizen action and state action, supported by three enabling levers: civic mobilization, interface and information. For each of these constitutive elements, the report identifies 'drivers' of contextual effectiveness which take into account a broad range of contextual factors (e.g., social, political and intervention-based, including information and communication technologies). *Opening the Black Box* offers detailed guidance on how to assess each

driver. It also applies the framework at two levels. At the country level, the report looks at 'archetypes' of challenging country contexts, such as regimes with no formal space or full support for citizen-state engagement and fragile and conflict-affected situations. The report also illustrates the use of the framework to analyze specific social accountability interventions through four case studies: Sierra Leone, Pakistan, Yemen, and the Kyrgyz Republic.

Opening the Black Box Metin Gurcan, 2019-09-15 A scholarly analysis of the Turkish military in the 21st century by the Near East policy expert and author of *What Went Wrong in Afghanistan*. On July 15th, 2016, a faction within the Turkish Armed Forces attempted a coup d'état against sitting President Recep Tayyip Erdoğan. Though the attempt was unsuccessful, the TAF would never be the same. In *Opening the Black Box*, former Turkish military advisor Metin Gurcan offers a rare look inside the TAF to examine how it has evolved in the 21st century. With twenty years of experience inside the Turkish military, both on the field and in the corridors of the Turkish General Staff, as well as extensive academic research, Gurcan provides two detailed snapshots of the TAF: one before July 15th and one after. Offering a complete view of this complex institution, Gurcan offers scholarly perspectives on the TAF as a security organization, a social institution and, in the case of career officers, a profession. Gurcan also examines the evolution of civilian-military relations in Turkey over the last decade with a specific focus on the impact of the July 15 Military Uprising on institutional identity.

Opening the Black Box Gavin J. D. Smith, 2014-10-03 Closed Circuit Television (CCTV) cameras are a prominent, if increasingly familiar, feature of urbanism. They symbolize the faith that spatial authorities place in technical interventions for the treatment of social problems. CCTV was principally introduced to sterilize municipalities, to govern conducts and to protect properties. Vast expenditure has been committed to these technologies without a clear sense of how precisely they influence things. CCTV cameras might appear inanimate, but *Opening the Black Box* shows them to be vital mediums within relational circulations of supervision. The book principally excavates the social relations entwining the everyday application of CCTV. It takes the reader on a journey from living beneath the camera, to working behind the lens. Attention focuses on the labour exerted by camera operators as they source and process distanced spectacles. These workers are paid to scan monitor screens in search of disorderly vistas, visualizing stimuli according to its perceived riskiness and/or allurement. But the projection of this gaze can draw an unsettling reflection. It can mean enduring behavioural extremities as an impotent witness. It can also entail making spontaneous decisions that determine the course of justice. *Opening the Black Box*, therefore, contemplates the seductive and traumatic dimensions of monitoring telemediated 'riskscapes' through the prism of camera circuitry. It probes the positioning of camera operators as 'vicarious' custodians of a precarious social order and engages their subjective experiences. It reveals the work of watching to be an ambiguous practice: as much about managing external disturbances on the street as managing internal disruptions in the self.

Opening the Black Box of Editorship Y. Baruch, A. Konrad, H. Aguinis, W. Starbuck, 2008-05-28 Understanding the roles of editors, and the processes of editorship in knowledge dissemination, are highly relevant issues for most scholars. Written by leading scholars with strong editorial experience, this book will serve as a guide for editors and scholars wishing to become editors in management and behavioural sciences.

Opening the Tablet Box Sarah Melville, Alice Slotsky, 2010-08-09 With topics ranging from social and economic history to literature, language, and to art history and archaeology, the essays in his book reflect the broad spectrum of interests of its honoree, Benjamin R. Foster.

Opening the Black Box of Cabinet-Level Politics Sarah Sinram, 2020-03-10 The book takes a look at social expenditure in affluent democracies in times of fiscal austerity. The study analyzes expenditure changes in nine social policy areas between 1980 - 2010, from an intra-cabinet perspective by considering the partisan affiliation of responsible spending ministers and effects of budgeting reforms. Thus, the analysis contributes to the question of whether parties or institutions matter.

Blowing the Lid Off the God-Box Anne Robertson,2005 What's in your God-box? Each of us, says author Anne Robertson, builds our own way of understanding God-our God-box-- and fills it up with bits of scripture, wisdom, and our experiences of God at work in our lives. It's a perfectly good way to puzzle out what God means to us. Encountering God through our human limitations, we learn something about the meaning of Incarnation. But to say that our experience of God is the only valid one is to put a lid on the box and create an idol. This book is about examining our God-boxes and bursting them wide open. *Blowing the Lid Off the God-Box* starts with the ministry of Jesus - who blew the lid off everyone's God-box by constantly challenging his followers with the unexpected. Subsequent chapters examine the God-boxes we create with scripture, worship, and political and social agendas.

Protean Supply Chains James A. Cooke,2014-05-23 Features emerging trends that are shaping supply chain operations worldwide as well as impacting the global business landscape Beginning with the assertion that supply chains are an overlooked factor behind anemic economic growth, *Protean Supply Chains: Ten Dynamics of Supply and Demand Alignment* provides a comprehensive overview of the developments occurring in the field of supply chain management. A broad range of topics in facility location, inventory, strategic sourcing, and supply chain coordination are addressed in addition to coverage of major developments within the field. The author's main position is that supply chains must be more than agile or flexible; rather, they must become protean and capable of changing shape in response to a volatile global business landscape. The author, a well-known editor and researcher in the field, presents current real-world examples combined with insights into the impact of recent trends that are expected to affect the global business landscape over the next decade. Highlighting companies with leading-edge supply chains as examples, the book discusses methods to reduce spending, increase revenues, and achieve streamlined productivity in a changing economic climate. The book utilizes further examples from the growth of online retailing and automation in distribution centers, as well as the use of protean supply chains to gain competitive advantages internationally. In addition, the book features the following ten emerging trends, which are shaping supply chain operations worldwide: The rise of regional theaters of supply Global risk management through control towers Customer segmentation Real demand realization Demand

swing alignment with production and distribution Omnichannel retailing challenges Customer of one service Sustainability challenges Collaboration vs. competition in the new economy Financial dynamism The book is an ideal reference for professionals and practitioners in operations research, business/management science, applied mathematics, and industrial engineering as well as an appropriate supplement for undergraduate and graduate-level courses in supply chain management.
