Ignition! John Drury Clark,2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

New Class at Malory Towers Enid Blyton,Rebecca Westcott,Narinder Dhami,Patrice Lawrence,Lucy Mangan,2019-06-27 It's time to welcome new girls to Malory Towers, the famous boarding school by the sea, in four brand-new stories by outstanding authors, set in Enid Blyton's much-loved school. YA and Waterstones Book Prize-winner Patrice Lawrence introduces us to proud Marietta with her magnificent head of braided hair. A dormitory argument reveals something unusual about Marietta, and something equally unexpected about Alicia. In Guardian and Stylist columnist Lucy Mangan's story, student librarian Evelyn is wary of her lively, lacrosse-playing classmates. When one of them becomes a regular visitor to the hushed domain of the library, can Evelyn really trust her? Sunita Sharma joins Malory Towers surrounded by a sense of mystery, in Narinder Dhami's fabulous story. But is Sunita really as glamorous as Gwendoline imagines? Vertebrate Paleontology in Utah David D. Gillette,1999 The 52 papers in this vary in content from summaries or state-of-knowledge treatments, to detailed contributions that describe new species. Although the distinction is subtle, the title (Vertebrate Paleontology in Utah) indicates the science of paleontology in the state of Utah, rather than the even more ambitious intent if it were given the title “Vertebrate Paleontology of Utah” which would promise an encyclopedic treatment of the subject. The science of vertebrate paleontology in Utah is robust and intense. It has grown prodigiously in the past decade, and promises to continue to grow indefinitely. This research benefits everyone in the state, through Utah’s muse ums and educational institutions, which are the direct beneficiaries.

Pauli and the Spin-Statistics Theorem Ian Duck,E C G Sudarshan,1998-03-13 This book makes broadly accessible an understandable proof of the infamous spin-statistics theorem. This widely known but little-understood theorem is intended to explain the fact that electrons obey the Pauli exclusion principle. This fact, in turn, explains the periodic table of the elements and their chemical properties. Therefore, this one simply stated fact is responsible for many of the principal features of our universe, from chemistry to solid state physics to nuclear physics to the life cycle of stars. In spite of its fundamental importance, it is only a slight exaggeration to say that “everyone knows the spin-statistics theorem, but no one understands it”. This book simplifies and clarifies the formal statements of the

theorem, and also corrects the invariably flawed intuitive explanations which are frequently put forward. The book will be of interest to many practising physicists in all fields who have long been frustrated by the impenetrable discussions on the subject which have been available until now. It will also be accessible to students at an advanced undergraduate level as an introduction to modern physics based directly on the classical writings of the founders, including Pauli, Dirac, Heisenberg, Einstein and many others. Contents: The Historic Era: Discovery of the Exclusion Principle The Discovery of the Electron Spin Bose–Einstein Statistics Wave Function of States of Many Identical Particles Fermi-Dirac Statistics Dirac's Invention of Quantum Field Theory The Jordan-Wigner Invention of Anticommutation for Fermi-Dirac From Hole Theory to Positrons The Pauli Era: Pauli's First Proof of the Spin-Statistics Theorem Fierz's Proof of the Spin-Statistics Theorem Belinfante's Proof of the Spin-Statistics Theorem deWet's Proof Based on Canonical Field Theory Pauli's Proof of the Spin-Statistics Theorem The Wightman-Schwinger Era: Feynman's Proof and Pauli's Criticism Schwinger's Proof from Time Reversal Invariance The Proofs of Lüders and Zumino, and of Burgoyne The Hall–Wightman Theorem Schwinger, Euclidean Field Theory, Source Theory, and the Spin-Statistics Connection The Contemporary Era: Responses to Neuenschwander's Question. Evaluation of Intuitive Proofs of the Spin-Statistics Theorem Overview and Epilog Readership: Physicists, mathematical physicists and chemical physicists. keywords: “The reviewer recommends the book as a good starting point for the student who wishes to acquire an understanding of the Spin-Statistics Connection both in its historical context and in the present state of knowledge.” American Journal of Physics

Composites and Their Properties Ning Hu, 2012-08-22 Composites are a class of material, which receives much attention not only because it is on the cutting edge of active material research fields due to appearance of many new types of composites, e.g., nanocomposites and bio-medical composites, but also because there are a great deal of promises for their potential applications in various industries ranging from aerospace to construction due to their various outstanding properties. This book mainly deals with fabrication and property characterization of various composites by focusing on the following topics: functional and structural nanocomposites, numerical and theoretical modelling of various damages in long fiber reinforced composites and textile composites, design, processing and manufacturing technologies and their effects on mechanical properties of composites, characterization of mechanical and physical properties of various composites, and metal and ceramic matrix composites. This book has been divided into five sections to cover the above contents.

A Time for Everything Karl Ove Knausgaard, 2009-11-20 In the sixteenth century, Antinous Bellori, a boy of eleven, is lost in a dark forest and stumbles upon two glowing beings, one carrying a spear, the other a flaming torch ... This event is decisive in Bellori's life, and he thereafter devotes himself to the pursuit and study of angels, the intermediaries of the divine. Beginning in the Garden of Eden and soaring through to the present, A Time for Everything reimagines pivotal encounters between humans and angels: the glow of the cherubim watching over Eden; the profound love between Cain and Abel despite their differences; Lot's shame in Sodom; Noah's isolation before the flood; Ezekiel tied to his bed, prophesying ferociously; the death of Christ; and the emergence of sensual, mischievous cherubs in the seventeenth century. Alighting upon these dramatic scenes – from the Bible and beyond – Knausgaard's imagination takes flight: the result is a dazzling display of storytelling at its majestic, spellbinding best. Incorporating and challenging tradition, legend, and the Apocrypha, these penetrating glimpses hazard chilling questions: can the nature of the divine undergo change, and can the immortal perish?

Smart City Implementation Renata Paola Dameri, 2016-09-15 In a series of essays, this book describes and analyzes the concept and theory of the recent smart city phenomenon from a global perspective, with a focus on its implementation around the world. After defining the concept it then elaborates on the role of Information and Communication Technology (ICT) as an enabler for smart cities, and the role of ICT in the interplay with smart mobility. A separate chapter develops the concept of an urban smart dashboard for stakeholders to measure performance as well as the economic and public value. It offers examples of smart cities around the globe, and two detailed case studies on Genoa and Amsterdam exemplify the book's theoretical and empirical findings, helping readers understand and evaluate the effectiveness and capability of new smart city programs.
