Travel, Space, Architecture Miodrag Mitrasinovic, 2016-02-17 *Travel, Space, Architecture* defines a new theoretical territory in architectural and urban scholarship that frames the processes of spatial production through the notion of travel. By aligning architectural thinking with current critical theory debates, this book explores whether dissociating culture from place and identity, and detaching the idea of architecture from both, can reframe our understanding of spatial and architectural practices. The book presents seventeen key case studies from a diverse range of perspectives including historical, theoretical, and praxis-based, and range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies.

French Encounters with the American Counterculture 1960-1980 Caroline Maniaque-Benton, 2016-12-05 French-American interrelationships in the areas of design and creative thinking have been under-acknowledged. It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas. This book includes interviews with French architects who visited the United States in the 1960s-1970s and then assumed influential positions in the press and education in France. Some of these architects found in non-mainstream America and its radical groups of architectural drop-outs a liberating force, free of the taint of American capitalism and the high-investment technology. Often living in alternative student communities, they saw highly innovative, low-cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living. Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time.

Practical Handbook of Neurosurgery Marc Sindou, 2009-11-06 "Practical Handbook of Neurosurgery" invites readers to take part in a journey through the vast field of neurosurgery, in the company of internationally renowned experts. At a time when the discipline is experiencing a (detrimental) tendency to segment into various subfields and scatter in the process, it can be worthwhile to collect a number of practical lessons gleaned from experienced and leading neurosurgeons. The book also aims to present numerous important figures in the neurosurgical community, with a brief overview of the vitae and main contributions for each. We must confess that we were sad that some of the most active members were unable to participate, likely due to time constraints. We are however fortunate that the majority were able to take part. As such, though not exhaustive, the book does represent an anthology of contemporary neurosurgeons. From the preface: At the very beginning of the project, our intention was to make a "poetbook". But month after month it became obvious that the work would be much more expansive; ultimately we produced three volumes. Nevertheless we hope that all the three volumes together will remain easily accessible and a daily companion. The pocket has to be more like a travel bag! We would like to thank all of the contributors; they have sacrificed their valuable time to deliver sound and critical views, and above all useful guidelines.

Management Control and Creativity Sophie Bollinger, 2024-01-04 Innovation is an essential growth lever for organizations. Like any strategic element, it must be managed to ensure the right decision is made at the right time. When we talk about management, we naturally also consider management control. However, using management tools can be a danger to developing creativity – an essential element of innovation. This book examines the interdependencies between management control and creativity. By comparing two organizational contexts, we highlight the vital role of organizations as generators of creativity. We also underline the acceptance of an imbalance between the elements in tension, which can lead to the questioning and fostering of innovation; and the role of senior management as mediators between organizations and local actors.

Surgery of Cervical Myelopathy W. Grote, M. Brock, H.-E. Clar, M. Klinger, H.E. Nau, 2012-12-06 Fifty-two patients operated on for this type of spondylogenic myelo pathy by the anterior approach were reexamined. The male: female relation was 2 : 1. Fifty percent were males in the 5th decade. About 20% had a congenital narrow spinal canal with an ap-diameter below the minimal standard values (3). The maximum of spondylogenic narrow ing was found between C4 and C6 in 2/3 of the cases. Results: good 44%, satisfactory 31%, unchanged 13%, deteriorated 12%, mortality 0. The duration of the neurological symptoms before operation had no influence on the surgical results. Final neurological restitution was reached within 1 week to 3 months after the operation. The operative results in patients with congenital narrow spinal canal showed the same percentual distribution as the results of the entire group. No factors could be found to explain the groups of unsatisfactory results. References 1. DECKING, D., STEEGE, W. ter: Rontgenologische ParametAr der Hals wirbelsaule im seitlichen Strahlengang. The Routledge International Handbook of Creative Cognition Linden J. Ball, Frédéric Vallée-Tourangeau, 2023-08-31 The Routledge International Handbook of Creative Cognition is an authoritative reference work that offers a well-balanced overview of current scholarship across the full breadth of the rapidly expanding field of creative cognition. It contains 43 chapters written by world-leading researchers, covering foundational issues and concepts as well as state-of-the-art research developments. The handbook draws extensively on contemporary work exploring the cognitive representations and processes associated with creativity, whether studied in the laboratory or as it arises in real-world practice in domains such as education, art, science, entrepreneurship, design, and technological innovation. Chapters also examine the sociocognitive and cultural aspects of creativity in teams and organisations, while additionally capturing the latest research on the cognitive neuroscience of creativity. Providing a compelling synopsis of emerging trends and debates in the field of creative cognition and positioning these in relation to established findings and theories, this text provides a clear sense of the way in which new

research is challenging traditional viewpoints. It is an essential reading for researchers in the field of creative cognition as well as advanced students wishing to learn more about the latest developments in this important and rapidly growing area of enquiry.

In Praise of Penumbra Agostino De Rosa, Alessio Bortot, Francesco Bergamo, 2023-08-28 Guest-edited by Agostino De Rosa, Alessio Bortot and Francesco Bergamo Penumbra, from the Latin *paene* (almost) and *umbra* (shadow), can be defined as an intermediate zone of transition between light and shadow. Penumbra is therefore that space, both physical and imaginary, where everything is possible: it is the place of the uncanny, where presence and/or absence can produce wonder or horror. This AD positions the presence of this archetype in the contemporary world of architecture, investigating the ways it permeates different expressive forms – from critical theory to architectural drawing, from design and planning to photography. The contributors illustrate and discuss how penumbra has shaped their creativity and modified their approach to the design process. As a physical phenomenon, penumbra has supra-historical and global connotations; nonetheless, different cultures elaborate its symbolism in different ways. Its wide semantic spectrum powerfully inspires creative forms that hover between fullness and emptiness, presence and absence, past and future. The critical perspectives in this issue offer a wide analysis of penumbra's expressive potential and the key to an in-depth understanding of this elusive layer of reality. Contributors: Matthias Bärmann, Silvia Benedito, Filippo Bricolo, Edwin Carels, Javier Corvalán, Dris Kettani, Stephen Kite, Giancarlo Mazzanti, Akira Mizuta Lippit, Susanna Piscicella, Renato Rizzi, Paul O Robinson, and Antonella Soldaini. Featured architects and artists: Alexander Savvich Brodsky, Neri&Hu studio, Quay Brothers, Ursula Schulz-Dornburg, and Marco Tirelli.

The Organisation of Mind Tim Shallice, Richard P. Cooper, 2011-03-17 To understand the mind, we need to draw equally on the fields of cognitive science and neuroscience. But these two fields have very separate intellectual roots, and very different styles. So how can these two be reconciled in order to develop a full understanding of the mind and brain. This is the focus of this landmark new book.

Neurophysiology in Neurosurgery Vedran Deletis, Jay L. Shils, Francesco Sala, Kathleen Seidel, 2020-03-20 Over the last 18 years, there have been many advances in the field of intraoperative monitoring. This new edition of *Neurophysiology in Neurosurgery: A Modern Approach* provides updates on the original techniques, as well as other more recent methodologies that may either prove beneficial or are commonly used in neuromonitoring. The purpose of this book is to describe the integration of neuromonitoring with surgical procedures. Each methodology is discussed in detail as well as chapters describing how those methodologies are applied to multiple surgical procedures and the evidence used to support those uses. The second edition features a surgical procedure section, which focuses on specific surgical procedures and the type of monitoring used during these procedures. The original chapters have been updated, expanded, and the structure modified to ensure the book is beneficial to both physiologists and surgeons. This book is written for neurosurgeons, neurophysiologists, neurologists, anesthesiologists, interventional neuroradiologists, orthopedic surgeons, and plastic surgeons. Provides a valuable educational tool that describes the theoretical and practical aspects of intraoperative monitoring through example Presents in-depth descriptions of the most advanced techniques in intraoperative neurophysiological monitoring and mapping Features a surgical procedures section that focuses on specific surgical procedures and the type of monitoring used during these procedures

Brain Death C. Machado, 2007-09-10 This text provides an overview of the processes of brain death, exploring the concepts and historical approach of human death, clinical examinations of brain-dead patients, ancillary tests in coma and brain death, bioethical discussions of brain death and its relationship with some consciousness disturbances, and the legal considerations of human death. Unlike other, narrow-focus reference this book encompasses a wide spectrum of issues including medical, legal, bioethical and historical aspects.

Current Practice of Clinical Electroencephalography John S. Ebersole, Timothy A. Pedley, 2003 The standard-setting clinical electroencephalography textbook has been rewritten for the next decade of EEG technicians and resident and practicing neurologists. This Third Edition reflects the transition of the field to an all-digital environment, with fundamental changes in data recording, analysis, and interpretation. Drs. Ebersole and Pedley are outstanding educators with extensive experience in editing two of the leading journals--*Journal of Clinical Neurophysiology* and *Epilepsia*, respectively. In this volume, Ebersole and Pedley cover the full range of applications of EEG and evoked potentials in contemporary clinical practice. The book explains the most advanced instrumentation and techniques and their use in evaluating various disorders. More than 600 illustrations depict both normal and abnormal findings.
