*Bridge Management* Bojidar Yanev,2007-01-22 A comprehensive, up-to-the-minute account of bridge management developments for researchers, designers, builders, administrators, and owners Bridge Management draws on Bojidar Yanev's thirty years of research, teaching, and consulting as well as his management of 800 of New York City's 2,200 bridges. It offers an insider's view of the problems to be resolved in bridge management by civil and transportation engineers, budget and asset managers, abstract analysts, and hands-on field workers. The personal search of the author for solutions is juxtaposed with an overview of the dynamic interactions between bridge builders and the social and physical forces shaping the transportation infrastructure over the centuries. Bridge Management uniquely integrates the priorities, constraints, objectives, and tastes governing the domains of structural mechanics, economics, public administration, and field operations at both the project and network levels. It features: A review of current bridge management vulnerabilities, objectives, tools, and products Dozens of case studies illustrating the application of analytic models, and practical developments currently shaping the field Unique chapters exploring the evolution of bridge design, construction, and maintenance, from the origins of deliberate planning to the current integrated lifecycle asset management models

*Supernormal* Meg Jay,2017-11-14 Clinical psychologist and author of The Defining Decade, Meg Jay takes us into the world of the supernormal: those who soar to unexpected heights after childhood adversity. Whether it is the loss of a parent to death or divorce; bullying; alcoholism or drug abuse in the home; mental illness in a parent or a sibling; neglect; emotional, physical or sexual abuse; having a parent in jail; or growing up alongside domestic violence, nearly 75% of us experience adversity by the age of 20. But these experiences are often kept secret, as are our courageous battles to overcome them. Drawing on nearly two decades of work with clients and students, Jay tells the tale of ordinary people made extraordinary by these all-too-common experiences, everyday superheroes who have made a life out of dodging bullets and leaping over obstacles, even as they hide in plain sight as doctors, artists, entrepreneurs, lawyers, parents, activists, teachers, students and readers. She gives a voice to the supernormals among us as they reveal not only How do they do it? but also How does it feel? These powerful stories, and those of public figures from Andre Agassi to Jay Z, will show supernormals they are not alone but are, in fact, in good company. Marvelously researched and compassionately written, this exceptional book narrates the continuing saga that is resilience as it challenges us to consider whether -- and how -- the good wins out in the end.

She's dealt with her anger, depression, and blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one.
