Swing to Bop Ira Gitler,1985-11-07 This indispensable book brings us face to face with some of the most memorable figures in jazz history and charts the rise and development of bop in the late 1930s and '40s. Ira Gitler interviewed more than 50 leading jazz figures, over a 10-year period, to preserve for posterity their recollections of the transition in jazz from the big band era to the modern jazz period. The musicians interviewed, including both the acclaimed and the unrecorded, tell in their own words how this renegade music emerged, why it was a turning point in American jazz, and how it influenced their own lives and work. Placing jazz in historical context, Gitler demonstrates how the mood of the nation in its post-Depression years, racial attitudes of the time, and World War II combined to shape the jazz of today.

The Economics of Football Stephen Dobson,John Goddard,2011-02-10 The second edition of this popular book presents a detailed economic analysis of professional football at club level, with new material included to reflect the development of the economics of professional football over the past ten years. Using a combination of economic reasoning and statistical and econometric analysis, the authors build upon the successes and strengths of the first edition to guide readers through the economic complexities and peculiarities of English club football. It uses a wide range of international comparisons to help emphasize both the broader relevance as well as the unique characteristics of the English experience. Topics covered include some of the most hotly debated issues currently surrounding professional football, including player salaries, the effects of management on team performance, betting on football, racial discrimination and the performance of football referees. This edition also features new chapters on the economics of international football, including the World Cup.

The Unforgettable Americans John A. Garraty,2013-10 This is a new release of the original 1960 edition.

Cinematic Rotterdam Floris Paalman,2011 This publication zooms in on the part cinema has played in urban development between 1920 and 1980. Rotterdam acts as an inspiring example, as observed from an international perspective. This city has its very own history in film. Besides providing the backdrop for a variety of feature films and avant-garde classics, Cinematic Rotterdam describes how the city has established and maintained its identity through thousands of promotional and educational films and television programmes. This diverse collection of filmed material presents an audiovisual map of Rotterdams emergence as a modern city. Written by film scholar Floris Paalman, Cinematic Rotterdam is not only a thorough study of the audiovisual history of Rotterdam but is more especially a conceptual exploration of a hidden dimension of the city itself. Besides being an exhaustive reference work for policymakers, clients, producers and researchers in architecture, media and social studies, this overview makes a fascinating visual guide for anyone interested in looking at the city of Rotterdam from a different angle -- Publicaciones Arquitectura y Arte.

Melodrama and Modernity Ben Singer,2001-02-05 Surveying the expanding conflict in Europe during one of his famous fireside chats in 1940, President Franklin Roosevelt ominously warned that we know of other methods, new

methods of attack. The Trojan horse. The fifth column that betrays a nation unprepared for treachery. Spies, saboteurs, and traitors are the actors in this new strategy. Having identified a new type of war -- a shadow war -- being perpetrated by Hitler's Germany, FDR decided to fight fire with fire, authorizing the formation of the Office of Strategic Services (OSS) to organize and oversee covert operations. Based on an extensive analysis of OSS records, including the vast trove of records released by the CIA in the 1980s and '90s, as well as a new set of interviews with OSS veterans conducted by the author and a team of American scholars from 1995 to 1997, *The Shadow War Against Hitler* is the full story of America's far-flung secret intelligence apparatus during World War II. In addition to its responsibilities generating, processing, and interpreting intelligence information, the OSS orchestrated all manner of dark operations, including extending feelers to anti-Hitler elements, infiltrating spies and sabotage agents behind enemy lines, and implementing propaganda programs. Planned and directed from Washington, the anti-Hitler campaign was largely conducted in Europe, especially through the OSS's foreign outposts in Bern and London. A fascinating cast of characters made the OSS run: William J. Donovan, one of the most decorated individuals in the American military who became the driving force behind the OSS's genesis; Allen Dulles, the future CIA chief who ran the Bern office, which he called the big window onto the fascist world; a veritable pantheon of Ivy League academics who were recruited to work for the intelligence services; and, not least, Roosevelt himself. A major contribution of the book is the story of how FDR employed Hitler's former propaganda chief, Ernst Putzi Hanfstengl, as a private spy. More than a record of dramatic incidents and daring personalities, this book adds significantly to our understanding of how the United States fought World War II. It demonstrates that the extent, and limitations, of secret intelligence information shaped not only the conduct of the war but also the face of the world that emerged from the shadows.

Encyclopedia of British Submarines 1901-1955 Paul Akermann, 2002-11 The history of the development of submarines covered in this book spans the most tumultuous years of the 20th century. When the little Holland No. 1 was launched in 1901, few could guess that the submarine would become the most potent weapon of war ever developed.

Jazz Records, 1897-1942: Abe Lyman to Bob Zurke, 1982

German Battlecruisers of World War One Gary Staff, 2014-11-29 The most comprehensive English-language study of the German Imperial Navy's WWI battlecruisers, fully illustrated with drawings, diagrams and photographs. In this in-depth study, naval historian and author of *Battle on the Seven Seas* Gary Staff presents a full analysis of Imperial Germany's battlecruisers. Known as Panzerkreuzer, the eight ships of this class were involved in several early North Sea skirmishes before their historic victory against the Royal Navy in the Battle of Jutland. Staff details the design and construction of these ships, and traces the full-service history of each one, recounting their actions, largely from first-hand German sources and official documents. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as well as in

dock, where many aspects of their design—as well as damage sustained in action—can be viewed in close up. A superb series of full-color computer graphics show full length profiles and top-down views of each ship in precise and clear detail. German Battle Cruisers of World War One presents a major contribution to German naval history in the English language. It is a must-have volume for Great War historians and enthusiasts, as well as battlecruiser modelers.

The British Battleship Norman Friedman, 2015-10-15 Norman Friedman brings a new perspective to an ever-popular subject in *The British Battleship: 1906-1946*. With a unique ability to frame technologies within the context of politics, economics, and strategy, he offers unique insight into the development of the Royal Navy capital ships. With plans of the important classes commissioned from John Roberts and A D Baker III and a color section featuring the original Admiralty draughts, this book offers something to even the most knowledgeable enthusiast.

Handbook of Vehicle-Road Interaction David Cebon, 2000-01-01 This handbook discusses tyre-road contact forces generated by heavy vehicles covering their influence on road surface and bridge response and damage, as well as ways of regulating and improving vehicles so as to minimize road damage.; The main incentive for understanding vehicle-road interaction is the possibility of reducing the road damage caused by heavy vehicles and the very high associated costs. This may be achieved by highway authorities, through improved design and construction of roads; by government agencies, through regulations intended to encourage the use of more road-friendly vehicles; or by vehicle engineers, through design of improved vehicle configurations and suspensions, which minimize road damage.; The book provides a unified mechanistic approach to the entire subject, covering vehicle dynamics; dynamic tyre forces; weigh-in-motion; pavement and bridge response; damage mechanisms of paving materials; vehicle-guideway interaction; suspension design to minimize road damage; and assessing road damaging potential of vehicles for regulatory purposes. It includes 25 literature reviews, covering topics from asphalt deformation to weigh-in-motion, and citing over 500 references. In addition, it discusses both the fundamental mechanics of the mechanical and civil engineering systems, as well as practical and implementation issues.

Type VII U-Boats Roger Chesneau, 2012-01-20 The *ShipCraft* series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists

commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references – books, monographs, large-scale plans and websites. This volume is devoted to the largest class of submarines ever built, the Type VII, which formed the backbone of the German effort in the critical Battle of the Atlantic. A pre-war design, the Type VII was developed as the campaign progressed and was still in frontline service in 1945. All the major variants, as well as minor changes to equipment, are covered here. With its unparalleled level of visual information – paint schemes, models, line drawings and photographs – it is simply the best reference for any modelmaker setting out to build one of these famous boats.

The Rejection of Consequentialism Samuel Scheffler, 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Every Ruddy Word Armando Iannucci, Steve Coogan, Peter Baynham, Patrick Marber, 2013 Alan Partridge is our most remarkable broadcaster. From the giddy heights of his short-lived TV chat show to the crashing lows of six months in a travel tavern, he's done it all. This book tells the story of one of Britain's comic heroes.
