James Rojas, John Kamp

**Build** Tony Fadell, 2022-05-03 \*\*New York Times, Wall Street Journal, and USA Today Bestseller\*\* Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design, startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one, charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of Silicon Valley who succeeded time and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making.

**Steven Caney's Ultimate Building Book** Steven Caney, 2006-10-10 Ever wonder how a suspension bridge can cross a gap thousands of feet wide? Want to know how to build a comfortable lounge chair out of cardboard boxes? Or what keeps a massive cathedral dome from collapsing? Discover the answers to these and many more questions in Steven Caney's Ultimate Building Book, a wonderfully comprehensive exploration of design, construction, and invention that will stimulate the curiosity of children and adults alike. Much as David Macaulay's blockbuster The Way Things Work did for machines and devices a decade ago, this definitive volume from best-selling author Steven Caney details the ins and outs of construction in all its fascinating forms. Packed with exciting building projects guaranteed to engage anyone from age 4 to 104, the Ultimate Building Book gives easy-to-follow instructions for creating amazing models and toys that are as much fun to make as they are to play with! *Dream Play Build* James Rojas, John Kamp, 2022-02 The room is dim, the chairs are in perfectly lined rows. The city planner puts up a color-coded diagram of the street improvement project, dreading the inevitable angry responses. Jana loves her community and is glad to be able to attend the evening meeting, and she has a lot of ideas for community change. But she has a hard time hearing, and can't see the diagrams clearly. She leaves early. It's time

to imagine a different type of community engagement – one that inspires connection, creativity, and fun. People love their communities and want them to become safer, healthier, more prosperous places. But the standard approach to public meetings somehow makes everyone miserable. Conversations that should be inspiring can become shouting matches. So what would it look like to facilitate truly meaningful discussions between citizens and planners? What if they could be fun? For twenty years, James Rojas and John Kamp have been looking to art, creative expression, and storytelling to shake up the classic community meeting. In *Dream Play Build*, they share their insights into building common ground and inviting active participation among diverse groups. Their approach, “Place It!,” draws on three methods: the interactive model-building workshop, the pop-up, and site exploration using our senses. Using our hands to build and create is central to what makes us human, helping spark ideas without relying on words to communicate. Deceptively playful, this method is remarkably effective at teasing out community dreams and desires from hands-on activities. *Dream Play Build* offers wisdom distilled from workshops held around the world, and a deep dive into the transformational approach and results from the South Colton community in southern California. While much of the process was developed through in-person meetings, the book also translates the experience to online engagement--how to make people remember their connections beyond the computer screen. Inspirational and fun, *Dream Play Build* celebrates the value of engaging with the dreams we have for our communities. Readers will find themselves weaving these artful, playful lessons and methods into their own efforts for making change within the landscape around them.

*What We'll Build: Plans for Our Together Future* Oliver Jeffers, 2020-10-06 A spectacular new title from world-renowned artist Oliver Jeffers, creator of the million-copy selling, global phenomenon *Here We Are*!

**Build Beyond Zero** Bruce King, Chris Magwood, 2022-06-16 “Net Zero” has been an effective rallying cry for the green building movement, signaling a goal of having every building generate at least as much energy as it uses. Enormous strides have been made in improving the performance of every type of new building, and even more importantly, renovating the vast and energy-inefficient collection of existing buildings in every country. If we can get every building to net-zero energy use in the next few decades, it will be a huge success, but it will not be enough. In *Build Beyond Zero*, carbon pioneers Bruce King and Chris Magwood re-envision buildings as one of our most practical and affordable climate solutions instead of leading drivers of climate change. They provide a snapshot of a beginning and map towards a carbon-smart built environment that acts as a CO2 filter. Professional engineers, designers, and developers are invited to imagine the very real potential for our built environment to be a site of net carbon storage, a massive drawdown pool that could help to heal our climate. The authors, with the help of other industry experts, show the importance of examining what components of an efficient building (from windows to solar photovoltaics) are made with, and how the supply chains deliver all those products and materials to a jobsite. *Build Beyond Zero* looks at the good and the bad of how we track carbon (Life Cycle Assessment), then takes a deep dive into materials (with a focus on steel and concrete) and biological architecture, and wraps up with education, policy and governance, circular economy, and where we go in the next three decades. In *Build Beyond Zero*, King and Magwood show how buildings

are culprits but stand poised to act as climate healers. They offer an exciting vision of climate-friendly architecture, along with practical advice for professionals working to address the carbon footprint of our built environment.

*A Time to Build* Yuval Levin, 2020-01-21 A leading conservative intellectual argues that to renew America we must recommit to our institutions. Americans are living through a social crisis. Our politics is polarized and bitterly divided. Culture wars rage on campus, in the media, social media, and other arenas of our common life. And for too many Americans, alienation can descend into despair, weakening families and communities and even driving an explosion of opioid abuse. Left and right alike have responded with populist anger at our institutions, and use only metaphors of destruction to describe the path forward: cleaning house, draining swamps. But, as Yuval Levin argues, this is a misguided prescription, rooted in a defective diagnosis. The social crisis we confront is defined not by an oppressive presence but by a debilitating absence of the forces that unite us and militate against alienation. As Levin argues, now is not a time to tear down, but rather to build and rebuild by committing ourselves to the institutions around us. From the military to churches, from families to schools, these institutions provide the forms and structures we need to be free. By taking concrete steps to help them be more trustworthy, we can renew the ties that bind Americans to one another.

**Building Books** Megan Wagner Lloyd, 2018-10-02 Books and blocks bring

together two siblings with nothing in common in this story from Megan Wagner Lloyd (Finding Wild) and illustrator Brianne Farley (Secret Tree Fort). Katie loves to build. She loves the way the blocks click together, the way they crash when they topple to the floor. But most of all, she loves to build something brand-new. Unlike her brother, she hates reading. Owen loves to read. He loves the way the pages rustle when he turns them, the way the paper smells. But most of all, he loves to read something brand-new. But, unlike his sister, he has no interest in building. When their rivalry finally comes to a head, a librarian suggests a solution. Books for Katie to read and books for Owen to shelve. Can they learn to appreciate their siblings hobbies and build something together?

**bookdown** Yihui Xie, 2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.
