The Phenomenon of Býčí Skála Cave Martin

Golec, et al., The book is divided into seven parts of discussions on one of the most famous localities on the territory of Moravia. It explains the existence of the cave in the landscape, the communication network and the network of artefacts in the human world (Parts 1 to 3). It further presents the complete human activities in Býčí Skála Cave from the Palaeolithic to today (Part 4), it starts from the archaeological, historical and ethnographic sources accumulated between 2007 and 2016. In the fifth part, it presents the complete landscape of the people of the Hallstatt Period and the emergence of the cave sanctuary in the unsettled landscape. In the sixth part, this landscape is look at in relation to mankind and the cave from the perspectives of sociology, cultural anthropology and religious studies. In the seventh part, the world and the life of "Wenkel's princess" - one of the wealthiest women of the time around the middle of the sixth century BC in Moravia from her birth to her death - is presented with elements of the archaeological reconstruction.

The Curse of the Voynich Nicholas Pelling, Nick Pelling, 2006-01-01 For hundreds of years, the bizarre Voynich Manuscript has been the subject of intrigue and fascination. In this book, leading Voynich researcher Nick Pelling strips away the veils of deception to reveal the secret history of this mystery, looking at the people, the places and the politics behind this 'elegant enigma'.

The Austrian Academy of Sciences Herbert Karner, Artur Rosenauer, Werner Telesko, 2007 The building intended to house the University of Vienna was built in 1753/1755 according to a plan drawn up by Jean Nicolas Jadot, an architect from Lothringen. The opening celebrations, presided over by Emperor Francis I and Empress Maria Theresia, took place in April 1756. In 1857 the building was presented to the Imperial Academy of Sciences – the Austrian Academy of Sciences since 1945 – which had been founded by Emperor Ferdinand I in 1846. The building site for the new assembly hall of the university was not chosen by chance, but was located in that part of town in which the university buildings had been since the late 14th century. The urban setting and the narrow building area called for an unusual design for this Neue Aula. The narrow side, facing the square, needed

to be emphasised by means of its main facade, which now competed with the previously dominant front of the University Church of the Jesuits as a standout feature, thus leading to a reordering of the visual framework of the square. Such a weakening of the sacred context of the square was symbolic of the reorganisation of the course of academic studies at the university, made manifest through the erection of the Neue Aula and which was taken out of the hands of the Society of Jesus in successive steps lasting until 1759. If at the beginning the main idea was to set up apartments in the new building for virtually all of the professors of the schools of law and medicine, their preferential treatment can be understood when one considers that particularly the practically oriented schools (law and medicine) were affected by the university reforms of the time. The driving force behind the speedy erection of the building was the Chancellor of the University of Vienna, Archbishop Johann Joseph Graf Trautson, whom Maria Theresia had entrusted with all building projects in March of 1753. No later than February 1754, the unification of the four schools in the new building was placed on the agenda, thus stressing the common identity of the academic disciplines - a point of view that was convincingly taken into account in the frescoes by Gregorio Guglielmi (1755) that decorate the Festsaal [great hall]. As far as can be inferred today from the written and pictorial documents, the erection of the new university building should in no way be interpreted as an isolated undertaking. In the final analysis it was part of a comprehensive plan to give the university quarter, which had been located there since the Middle Ages, a clearer structure and a new definition within the concept of town planning. This publication offers a detailed study of the history and the design and decoration of the

former assembly hall of the university - today the main building of the Austrian Academy of Sciences - and a description of the genesis and function of this building, all based on a large number of written and pictorial sources.

Crusader Archaeology Adrian J. Boas, 2005-08-04
Crusader Archaeology draws together recent excavated material culture in Israel, Cyprus, Syria and Jordan to examine what life was like for the Crusaders in their territory, and how they were influenced by their new-found neighbours. Chapters discuss: * urban and rural settlements * surveying agriculture * industry * the military * the church * public and private architecture * arts and crafts * leisure pursuits * death and burial * building techniques. This highly illustrated volume creates a wonderful portrait of the period, which will make fascinating reading for all those interested in the Middle Ages, and in particular the Crusaders.

Prague Castle Jiří Kopřiva, Petr Chotěbor, 1991
Court Culture in Dresden H. Watanabe-O'Kelly, 2002-03-07 This is the first cultural history of Baroque Dresden, the capital of Saxony and the most important Protestant territory in the Empire from the mid-sixteenth to the early eighteenth century. Helen Watanabe-O'Kelly shows how the art patronage of the Electors fits into the intellectual climate of the age and investigates its political and religious context. Lutheran church music and architecture, the influence of Italy, the cabinet of curiosities and the culture of collecting, alchemy, mining and early technology, official image-making and court theatre are some of the wealth of colourful subjects dealt with during the period 1553 to 1733.

Crusader Castles Hugh Kennedy, 1994 A general illustrated account of the history and architecture of Crusader castles.

Beethoven's Hradec Petr Hanousek, Jakub Hypš, 2017
Luther's Liturgical Music Robin A.

Leaver, 2017-01-01 Martin Luther's relationship to music has been largely downplayed, yet music played a vital role in Luther's life -- and he in turn had a deep and lasting effect on Christian hymnody. In *Luther's Liturgical Music* Robin Leaver comprehensively explores these connections. Replete with tables, figures, and musical examples, this volume is the most extensive study on Luther and music ever published. Leaver's work makes a formidable contribution to Reformation studies, but worship leaders, musicians, and others will also find it an invaluable, very readable resource.

Vienna and Versailles Jeroen Frans Jozef Duindam, 2003-08-14 This book brings vividly to life the courtiers and servants of the imperial court in Vienna and the royal court at Paris-Versailles. Drawing on a wealth of material masterfully set in a comparative context, the book makes a unique contribution to the field of court studies. Staff, numbers, costs and hierarchies; daily routines and ceremonies; court favourites and the nature of rulership; the integrative and centripetal forces of the central courtly establishment: all are seen in a long-term, comparative perspective that highlights both the similarities and the distinctiveness of developments in France and the Habsburg lands. In the process, most conventional views of each court - and of court life in general - are challenged, and an alternative interpretation emerges. Finally, by relocating the household in the heart of the early modern state, Vienna and Versailles forces us to rethink the process of statebuilding and the notion of 'absolutism'.

Art, Ideology, and Economics in Nazi Germany

Alan E. Steinweis, 2017-11-01 From 1933 to 1945, the Reich Chamber of Culture exercised a profound

influence over hundreds of thousands of German artists and entertainers. Alan Steinweis focuses on the fields of music, theater, and the visual arts in this first major study of Nazi cultural administration, examining a complex pattern of interaction among leading Nazi figures, German cultural functionaries, ordinary artists, and consumers of culture. Steinweis gives special attention to Nazi efforts to purge the arts of Jews and other so-called undesirables. Steinweis describes the political, professional, and economic environment in which German artists were compelled to function and explains the structure of decision making, thus showing in whose interest cultural policies were formulated. He discusses such issues as insurance, minimum wage statutes, and certification guidelines, all of which were matters of high priority to the art professions before 1933 as well as after the Nazi seizure of power. By elucidating the economic and professional context of cultural life, Steinweis helps to explain the widespread acquiescence of German artists to artistic censorship and racial 'purification.' His work also sheds new light on the purge of Jews from German cultural life.

Badenheim Nineteen-thirty-nine Aharon Apelfeld, 1980 A tale of Europe in the days just before the war. It tells of a small group of Jewish holiday makers in the resort of Badenheim in the Spring of 1939. Hitler's war looms, but Badenheim and its summer residents go about life as normal.

Amerika: Timeless World Hector Burgos Stone, 2006-03-01 Hector Burgos Stone is a Chilean-born writer and researcher. In Amerika: Timeless World, he presents fascinating evidence to support the theory that civilization as we know it began in South America and developed throughout the world from there. This book's strength is in its ability to introduce a vast amount of

groundbreaking information while being concise and enjoyable to read. Amerika: Timeless World is highly recommended for students and professors, archaeology and ancient history enthusiasts, and anyone who likes to challenge accepted facts and theories. 243 pages, including 10 B&W illustrations and charts illustrating linguistic concepts. The Powers of Prophecy Robert E. Lerner, 2009 The Powers of Prophecy is an original attempt to investigate the subject of medieval eschatological prophecies: how and in what circumstances they were written; how they circulated; what they told people about the future; and how they were received. Although scholars have studied the ideas of a few outstanding medieval prophetic thinkers or the role of prophecies in heretical movements and popular insurrections, up to now there has been no attempt to study the most commonplace medieval prophetic ideas as they were communicated in the most frequently copied and widely read anonymous prophetic texts. Dedicated to pursuing the typical, Lerner's book traces the fortunes of an eschatological prophecy that was first written around 1240 and thereafter circulated throughout Western Europe for more than four centuries. Originally composed as a response to the Mongol onslaught, the prophecy was resurrected and reconceived to apply to other crises such as the fall of the Holy Land, the Black Death, and the Protestant Reformation. Although it was supposed to have descended from on high, allegedly being a message written by a disembodied moving hand over an altar during mass, countless scribes felt no qualms about recirculating the text with substantial changes. Among the many who took note of the prophecy in one or another of its numerous guises were the scholastic theologian John of Paris; the Infante Peter, a prince of the house of

Aragon; John Clyn, an Irish monk who entered it into his chronicle shortly before dying of the bubonic plague; and Martin Luther.
