CITA Complex Modelling Mette Ramsgaard

Thomsen, 2021-01-15 CITA Complex Modelling investigates the infrastructures of architectural design models. By questioning the tools for integrating information across the expanded digital design chain, the book asks how to support feedback between different scales of design engagement moving from material design, across design, simulation and analysis to specification and fabrication. The book conveys the findings of the Complex Modelling research project a five-year framing project supported by the Independent Research Fund Denmark. Undertaken at CITA, the Centre for Information Technology and Architecture, The Royal Danish Academy of Fine Arts, School of Architecture, Complex Modelling asks how new interdisciplinary methods for adaptive parametrisation, advanced simulation, machine learning and robotic fabrication can be orchestrated within novel workflows that expand the agency of architecture.

Disaster Robotics Satoshi Tadokoro, 2019-01-20 This book introduces readers to the latest findings on disaster robotics. It is based on the ImPACT Tough Robotics Challenge, a national project spearheaded by the Japan Cabinet Office that focuses on developing robotics technologies to aid in disaster response, recovery and preparedness. It presents six subprojects that involve robot platforms and several component technologies used in conjunction with robots: cyber rescue canines, which are digitally empowered rescue dogs; serpent-like robots for searching debris; serpent-like robots for plant/infrastructure inspection; UAVs for gathering information on large areas struck by disaster; legged robots for plant/infrastructure inspection in risky places; and construction robots for recovery tasks that require both power and precision. The book offers a valuable source of information for

researchers, engineers and practitioners in safety, security and rescue robotics, disaster robotics, and plant and infrastructure maintenance. It will also appeal to a wider demographic, including students and academics, as it highlights application scenarios and the total concept for each robot in various scientific and technical contexts. In addition to a wealth of figures and photos that explain these robots and systems, as well as experimental data, the book includes a comprehensive list of published papers from this project for readers to refer to. Lastly, an external website offers video footage and updated information from the International Rescue System Institute.

CITA Works Phil Ayres,Martin Tamke,Mette Ramsgard

Thomsen,Paul Nicholas,2015 The Centre for Information Technology and Architecture (CITA) is an innovative research environment exploring the emergent intersections between architecture and digital technologies. This thoroughly illustrated book documents over 40 projects, events and research collaborations conducted between 2005 and 2014 by CITA. Through individual project descriptions accompanied by photographic documentation and design drawings, CITA works provides readers with insights into the design-led practice-based architectural research which queries how computation challenges the way we think, design and build architecture. With essays by

Professor Mette Ramsgaard Thomsen (Head of CITA), and Dr. Jane Burry (Head of the Spatial Information Architecture Laboratory, RMIT) the work is contextualized within the field of digital architectural design practice. These essays also identify the emerging questions and maturing methods that continue to inform CITA's research within this territory. CITA works marks the first 10 years of our research effort and acknowledges the institutions, practices, companies and individuals that have participated, contributed and collaborated with us along the way. CITA is based in Copenhagen, Denmark. Mette Ramsgaard Thomsen founded CITA in 2005. Martin Tamke joined CITA in 2006 and has shaped its design based research practice. Phil Ayres joined CITA in 2009 after teaching at London's Bartlett School of Architecture. Paul Nicholas joined CITA in 2011 and is author of *Designing Material / Materialising Design* (Riverside Architectural Press).

Coming Home to Tibet Tsering Wangmo

Dhompap, 2016-07-12 In this beautifully written memoir, a daughter travels to her mother's Tibetan homeland and finds both her own deep connections to her heritage and a people trying to maintain its cultural integrity despite Chinese occupation. After her mother dies in a car accident in India, Tsering Wangmo Dhompap decides to take a handful of her ashes back to her homeland in Tibet. Her mother left Tibet in her youth as a refugee and lived in exile the rest of her life, always yearning to return home. When the author arrives at the foothills of her mother's ancestral home in a nomadic village in East Tibet, she realizes that she had been preparing for this homecoming her whole life. *Coming Home to Tibet* is Dhompap's evocative tribute to her mother and a homeland that she knew little about. Dhompap's story is interlaced with poetic prose describing the land, people, and spirit of the country as experienced by a refugee seeing her country for the first time. It's an intriguing memoir and also an unusual inside view of life in contemporary Tibet, among ordinary people trying to negotiate the changes enforced on it by Chinese rule and modern society.

Breaking the Ocean Annahid Dashtgard, 2019-08-20 In

Breaking the Ocean, diversity and inclusion specialist Annahid Dashtgard addresses the long-term impacts of exile, immigration, and racism by offering a vulnerable, deeply personal account of her life and work. Annahid Dashtgard was born into a supportive mixed-race family in 1970s Iran. Then came the 1979 Revolution, which ushered in a powerful and orthodox religious regime. Her family was forced to flee their homeland, immigrating to a small town in Alberta, Canada. As a young girl, Dashtgard was bullied, shunned, and ostracized both by her peers at school and adults in the community. Home offered little respite, with her parents embroiled in their own struggles, exposing the sharp contrasts between her British mother and Persian father. Determined to break free from her past, Dashtgard created a new identity for herself as a driven young woman who found strength through political activism, eventually becoming a leader in the anti-corporate globalization movement of the late 1990s. But her unhealed trauma was re-activated following the 9/11 terrorist attacks. Suffering burnout, Dashtgard checked out of her life and took the first steps towards personal healing, a journey that continues to this day. *Breaking the Ocean* introduces a unique perspective on how racism and systemic discrimination result in emotional scarring and ongoing PTSD. It is a wake-up call to acknowledge our differences, addressing the universal questions of what it means to belong and ultimately what is required to create change in ourselves and in society.

I Like Him, He Likes Her Phyllis Reynolds Naylor, 2010-05-18

Find a Penny pick it up and all day long you'll have good luck...except, of course, if that Penny is charming and pretty and funny, and the person picking her up just happens to be your boyfriend. Alice McKinley's freshman year is not as "lucky" as she was hoping it would be. But she's is trying to look on the bright side. There are worse things than being single for a semester... for a school year...for the whole summer.... At least Alice can count on her best friends for support—in theory, anyway. Lately they haven't been all that there-for-her. In fact, it seems like Pam and Liz are suddenly involved in intense, secret conversations whenever Alice is around. Single is starting to feel a whole lot like solo.

Engineering Systems Integration Gary O. Langford, 2016-04-19

The first book to address the underlying premises of systems integration and how to exposit them into a practical and productive manner, this book prepares systems managers and systems engineers to consider their decisions in light of systems integration metrics. The book addresses two questions: Is there a way to express the interplay of human actions and the result of system interactions of a product with its environment, and are there methods that combine to improve the integration of systems? The systems integration theory and integration frameworks proposed in the book tie General Systems Theory with practice.
