Investigation of Inappropriate Pollutant Entries Into Storm Drainage

Systems Robert Pitt,1994-11 Provides guidance to municipalities for investigating non-stormwater entries into storm drainage systems. These entries may originate from many diverse sources including sanitary wastewaters from leaky or directly connected sanitary sewerage and from poorly operating septic tank systems, washwaters for laundries and vehicle service facilities, and many types of industrial wastewaters that are discharged to drains leading to storm drainage or from direct industrial wastewater connections to the storm drainage system. 28 charts, tables and graphs.

One Voice Barbara M. Britsch,Amy Dennison,1995-09-15 Enhance student appreciation of music and literature while building listening (i.e., reflecting and analyzing), composition, and performing skills. After experiencing a variety of songs, child-centered art, and stories, students explore elements of each (e.g., rhythm, repetition, theme) and compose and perform their own dramatic and musical productions. Music and story bibliographies, directions for making simple musical instruments, and more accompany practical suggestions for your classroom.

Interactive Poetry Michael Mathison, Do you have feelings inside you that need to get out? Looking for a way to express yourself? Need a class project? You need Interactive Poetry. Interactive Poetry is a teaching book divided into 2 parts. The first section features 39 poems written by me when I was a teen. At the end of each poem is a page for you to create your own content. The 2nd section includes instructions for writing 3 types of poetry, and advise on how to share what you created.

Chasing the Storm Ron Miller,2014-03-01 Huge, towering clouds build up in the sky?it's a super cell. The Doppler radar indicates that the system is rotating. But is there a funnel? Is it touching the ground? Only a storm chaser can confirm when a tornado is present?and help meteorologists warn nearby towns. Whenever severe weather threatens, storm chasers hit the road to hunt for tornadoes, hurricanes, or violent storms. Some drive thousands of miles in just a few days as they follow a storm system from Iowa to Texas. Others serve their cities and towns by taking photos from their backyards and phoning in storm details to local weather stations. Specially trained Hurricane Hunters hop into aircraft packed with scientific instruments to fly deep into powerful hurricanes, hoping to reach the eye of the storm. Are storm chasers a bunch of foolish daredevils? Not at all. Many are scientists while others are professional photographers and videographers. Storm chasers arm themselves with training about severe weather, use sophisticated instruments, and follow safety guidelines. In *Chasing the Storm*, you'll meet real storm chasers and meteorologists, hear their stories, and discover how they do their work. You'll learn tornado basics, get a great window into the science of meteorology, and learn how to pursue a career in the field. You

might even decide to become a storm chaser yourself!

The Tornado John Edward Weems, 2017-06-01 The Tornado gives account of one of the world's most terrifying natural disasters. Twisters have left their wake of freakish consequences throughout the United States and the world, and The Tornado vividly describes some of the most bizarre from around the country—houseboats sailing through the air; cars flown to a landing half a cornfield away; an entire house lifted and demolished, leaving only a divan holding the uninjured family. The most detailed description of a tornado and the violence it can bring comes from the author's focus on the tragedy of one American town in 1953. John Edward Weems was an eyewitness reporter of a funnel that hit Waco, Texas, on May 11 of that year. In gripping narrative, he portrays the events of that day: a man clinging to a guard rail while a mailbox, plate glass, bricks, and assorted debris whizzed past his head; automobiles rolling end on end down the street; buildings falling like blocks knocked down by an angry child; a movie theater crumbling on the terrified patrons. When the storm had passed, 114 people were dead and hundreds injured; property damage ran in the tens of millions of dollars. Research in news reports, government weather documents, and books flesh out this account, which Pulitzer-prize winner Annie Dillard called "wonderfully exciting. It is full of people, and the thousands of details that make up their lives—and deaths. [It is] a story of enormous power." John Banta, writing in the Waco Tribune-Herald, described it as "a gripping story of human drama and tragedy." Kirkus Reviews said, ". . . the events still chill face to face with a power that defies reason." Royalties from the sale of The Tornado will benefit the book fund of the Waco-McLennan County Public Library.

Stormchasers David M. Toomey, 2002 In a virtual age when tempests are monitored by global positioning and The Weather Channel, Stormchasers reminds us that our first understanding of hurricanes was directly built on the risks and sacrifices of living, breathing heroes, writes Hampton Sides (author of Ghost Soldiers). In September 1955, Navy Lieutenant Commander Grover B. Windham and a crew of eight flew out of Guantánamo Bay into the eye of Hurricane Janet swirling in the Caribbean: a routine weather reconnaissance mission from which they never returned. In the wake of World War II, the Air Force and the Navy had discovered a new civilian arena where daring pilots could test their courage and skill. These Hurricane Hunters flew into raging storms to gauge their strength and predict their paths. Without computer, global positioning, or satellite support, they relied on rudimentary radar systems to locate the hurricane's eye and estimated the drift of their aircraft by looking at windblown waves below. Drawing from Navy documents and interviews with members of the squadron and relatives of the crew, Stormchasers reconstructs the ill-fated mission of Windham's crew from preflight checks to the chilling moment of their final transmission.
