DEFENCE and INTERVENTION -1- Mürsel Sevindik,2020-04-25 This book covers Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control issues for law enforcement officer. The most important priority of the officer is able to survive in dangerous situations. Survival techniques, if properly applied, provide the officer an opportunity to overcome the resistive behavior of subjects. These techniques also provide officers with self-confidence, which is needed to win. The primary responsibility of the law enforcement officer is to protect life, and ensure public order. They are authorized to use a range of force options to preserve the peace, prevent crimes, maintain order, and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. By developing a high degree of proficiency with soft empty hand techniques, the officer will be able to respond in a more effective manner, with a minimal amount of force. Hard Empty Hand Control techniques are defined as striking techniques. They are always defensive not offensive. These techniques are used to control active aggression, with empty hands and feet, when the intermediate use of weapons is justified, but are not tactically available. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

For Security Personnel, DEFENCE and INTERVENTION, Theory and Practice, 2020 (Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control, Weapon Retention and Disarming, Handcuffing, Conducting Suspect Searches, Defensive Baton) Mürsel Sevindik,2020-04-29 This book covers Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control, Weapon Retention and Gun Disarming, Handcuffing, Conducting Suspect Searches, and Defensive Baton issues for law enforcement officer. The most important priority of the officer is able to survive in dangerous situations. These techniques provide officers self-confidence, which is needed to win. Law enforcement officers are authorized to use a range of force options to preserve the peace, prevent crimes, maintain order, and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. Hard Empty Hand Control techniques are defined as striking techniques. In some close encounters, a suspect may try to grab the officer's sidearm. Officers must develop a defensive awareness that their weapon can be snatched. Handcuffs are temporary restraining devices designed to control the movements of a subject. Body searching is a careful, systematic examination of the suspect at the scene of a crime, or immediately after apprehension. A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

For Security Personnel, HARD EMPTY HAND CONTROL, 2020 Mürsel Sevindik,2020-04-14 This book covers Hard Empty Hand Control issues for law enforcement officer. The goal is to provide police officers with an understanding of the principles of Hard Empty Hand Control techniques. Hard Empty Hand Control techniques are defined as striking techniques. These techniques are used to control active aggression, with empty hands and feet, when the intermediate use of weapons is justified, but are not tactically available. The term hard is descriptive of the nature of the technique. Hard empty hand strikes are always defensive not offensive. These techniques are taught to protect lives from immediate danger. All hard empty hand control techniques are basic in nature; however, they address non-lethal use of force situations, and are generally reliable and effective when properly utilized. Police officers should learn and demonstrate knowledge of the striking areas as well as methods of striking. When these techniques become necessary, loud, clear, repetitive verbal commands are an important aspect of the control process. The subject needs to know what the officer desires him/her to do. In addition verbal and physical de-escalation is always preferred and should be attempted, if applicable. In training, safety is paramount. Perfect practice makes perfect. Proper technique is more important than the speed of technique application. Proficiency will increase the speed proportionally. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.
