This math concepts volume doesn't just tell; it shows early learners the difference between concepts, introduces them to synonyms, and helps them learn to sort a group according to size. Classification is an important concept for the early elementary mathematics student, but the text and photographs in this book, including dogs, fish, and birds, make it fun!

**Sort It!** Nadia Higgins,2016-06-15 In Sort It!, early fluent readers learn about the practice of sorting by exploring a variety of real-world examples. Vibrant, full-color photos and carefully leveled text encourage young readers to look around them for opportunities to sort. Infographics illustrate key concepts, and an activity offers kids an opportunity to extend discovery. Children can learn more about sorting using our safe search engine that provides relevant, age-appropriate websites. *Raising Musical Kids* Robert A. Cutietta,2013 Does music make kids smarter? At what age should a child begin music lessons? Where should you purchase an instrument? What should parents expect from a child's teachers and lessons? How can you get kids to practice? Raising Musical Kids answers these and many other questions as it guides parents through everything from assembling a listening library for kids, to matching a child's personality with an instrument's personality, to finding musical resources in your community. Knowing that children can—and often do—get most of their music education from their school, parent and educator Robert Cutietta explores the features and benefits of elementary and secondary school programs, and shows how parents can work with the schools to provide the best possible music program. Throughout the book, Cutietta emphasizes the joy of participating in music for its own sake. The first edition of Raising Musical Kids delighted and informed parents to equal degrees, and this fully-revised second edition is a book that parents everywhere will treasure as a complete road map for developing their child's musical abilities.

**Sam Sorts** Marthe Jocelyn,2017-02-14 Marthe Jocelyn is back with another clever concept book to follow Hannah's Collections, Ones and Twos and Where Do You Look? This time, she tackles counting and categories. Sam's things are in a heap. Time to tidy up! He starts to organize his things, but quickly runs into trouble. He can make a pile of black and white things. But the penguin also belongs in the things with wings pile. He can make a pile of rocks. But the round rock also belongs in the round things pile. How will he ever sort his 100 things? Marthe Jocelyn takes a fun look at categories and counting in this very cleverly conceived story. Kids will delight in the cut-paper images of everything from a zipper pull to a robot, and Sam's surprising solution makes for a tidy end to this unique story.

*Sorting by Color* Jenny Marks,2007-04-30 Sorting is much more than picking up a bedroom--it's also a key math skill. **Sort It by Texture** Nicholas O'Hara,2015-07-15 Eww, that feels gross! Young learners love learning about texture up close. This accessible book enables readers to imagine how objects would feel that might not be available in the classroom, such as an alligator! Smooth, bumpy, dry, sticky, hard, and soft are just some of the adjectives introduced in this valuable volume. The text and photographs demonstrate objects that illustrate each adjective as well as how to sort objects of a certain texture from a mixed group.

**Sort It by Shape** Emmett Alexander,2015-07-15 Our world is made up of shapes. This colorful book will enable beginning readers to visualize that as they examine photographs of objects in their daily lives, such as books, clocks, and sandwiches. **Children, Film and Literacy** Becky Parry,2013-10-22 Children, Film and Literacy explores the role of film in children's lives. The films children engage in provide them with imaginative spaces in which they create, play and perform familiar and unfamiliar, fantasy and everyday narratives and this narrative play is closely connected to identity, literacy and textual practices. Family is key to the encouragement of this social play and, at school, the playground is also an important site for this activity. However, in the literacy classroom, some children encounter a discontinuity between their experiences of narrative at home and those that are valued in school. Through film children develop understandings of the common characteristics of narrative and the particular 'language' of film. This book demonstrates the ways in which children are able to express and develop distinct and complex understandings of narrative, that is to say, where they can draw on their own experiences (including those in a moving image form). Children whose primary experiences of narrative are moving images face particular challenges when their experiences are not given opportunities for expression in the classroom, and this has urgent implications for the teaching of literacy.

*Developmental Milestones of Young Children* Karen Petty,2015-03-19 Developmental milestones mark the significant progress children make throughout their early years. This Redleaf Quick Guide includes descriptions of the typical physical, social, emotional, language, and cognitive milestones that infants, toddlers, preschoolers, and early elementary-age children reach. It also includes strategies for observing, recording, and communicating milestones to families.

Hope Packs for a Trip Charly Haley,2018-08 Introduces readers to Hope's day packing for a trip. Discusses the concept of sorting by showing Hope and her mom sort their items into different suitcases. Additional features to aid comprehension include vivid photographs, Extended Learning activities, a phonetic glossary, and sources for further research.

**Communicating with Normal and Retarded Children** W. I. Fraser,R. Grieve,2014-05-15 Communicating with Normal and Retarded Children explores the way in which normal children acquire language and the mistakes they make. It aims to trace the common growth between professions in understanding of normal language development and the retarded person's language and to encourage research, particularly of an interdisciplinary kind. This book is organized into five main sections. The contributors provide different professional perspectives of how and why the mentally retarded

get their communication wrong and what remedies can be applied. They also present their own research findings, often in little-explored areas or from a novel angle, and offer their opinion on the types and topics of research that should be carried out. This book will be of interest to academic and clinical psychologists, educators, linguists, advisors and tutors in nursing and social studies, child health doctors, psychiatrists, and a range of therapists.
