### **Prize-winning Stories from China, 1978-1979**

Xinwu Liu, Meng Wang, 1981

Chinese Stories 2003 This is a book recording the normal life of some ordinary Chinese with plenty of excellent essays and pictures. China boasts an ancient civilization of 5,000 years, which has nourished the hearts and souls of all Chinese and could also help explain all good and bad things in the characters of the Chinese nation. The ordinary Chinese have diversified experiences and destinies, and of course, different personalities, too. Nevertheless, they share many similarities which are deeply rooted in the country's ancient civilization. In this book the many diverse lives of some ordinary Chinese are brought together, uniting them as a people and yet granting them their undeniable individuality. In its second volume, Chinese Stories continues to deliver the stories of the everyday modern Chinese with all their diversity and unwavering devotion to hold on to their culture by tradition.

**Prospects for the Professions in China** William P Alford, William Kirby, Kenneth Winston, 2010-10-07 Professionals are a growing group in China and increasingly make their presence felt in governance and civil society. At the same time, however, professionals in the West are under increasing pressure from commercialism or scepticism about their ability to rise above self-interest. This book focuses on professionals in China and asks whether developing countries have a fateful choice: to embrace Western models of professional organization as they now exist, or to set off on an independent path, adapting elements of Western practices to their own historical and cultural situation. In doing so, the authors in this volume discuss a wealth of issues, including: the historic antecedents of modern Chinese

professionalism; the implications of professionalism as an import in China; the impact of socialism, the developmental state and rampant commercialism on the professions in China; and the feasibility of liberal professions in an illiberal state. To conclude, the book considers whether there might be an emerging professionalism with Chinese characteristics, and how this might have an impact on the professions elsewhere. Prospects for the Professions in China will be of interest to students and scholars of Chinese Studies, law, sociology, medical studies and cultural studies.

*China as the World Factory* Kevin H.

Zhang, 2006-09-27 Few countries have integrated into the world economy as fast - or as dramatically - as China has since 1978. The world's most populous country is emerging as a world workshop and export machine: a visit to a department store in any country will unearth a plethora of goods manufactured in the People's Republic. China is now the world's fourth largest exporting nation. In this important book, Kevin Zhang brings together an international team of contributors to analyze this development process. Taking a thematic approach, the book covers: \* manufacturing exports and the world workshop \* foreign capital and china's industrial development \* challenges from the WTO and openness. This topical analysis will be an excellent resource for postgraduate students and researchers in the fields of Asian and Chinese studies, export studies, and economics.

**Tradition and Transformation in a Chinese Family Business** Heung-Wah Wong, Karin Ling-fung  
Chau, 2019-12-05 Family businesses have been an important part of the economy in Hong Kong, Taiwan, Singapore, and in the Chinese diaspora, and, since the reforms, in mainland China itself. Some people have argued that the success of Chinese family businesses occurs because of the

special characteristics and approach of such businesses. This book examines the nature of Chinese family business and the key issues involved by exploring in detail the case of a leading Hong Kong jewellery company which was established in the early 1960s and which has grown to become one of the biggest jewellery manufacturers, exporters, and retailers in post-war Hong Kong. The book considers the motivations of Chinese people to set up their own businesses, outlining the strategies adopted, including the strategies for raising capital, and the qualities of successful Chinese entrepreneurs. It discusses the management of the company, including relations between family members, profit sharing and succession planning, and assesses how conflict and crises are coped with and overcome. It charts the evolution of the company, looking at how it has been transformed into a listed corporation. The book concludes by arguing for the importance of studying Chinese family businesses culturally.

**Autonomous Weapons Systems and International Norms** Ingvild Bode, Hendrik Huelss, 2022-01-15  
Autonomous weapons systems seem to be on the path to becoming accepted technologies of warfare. The weaponization of artificial intelligence raises questions about whether human beings will maintain control of the use of force. The notion of meaningful human control has become a focus of international debate on lethal autonomous weapons systems among members of the United Nations: many states have diverging ideas about various complex forms of human-machine interaction and the point at which human control stops being meaningful. In *Autonomous Weapons Systems and International Norms* Ingvild Bode and Hendrik Huelss present an innovative study of how testing, developing, and using weapons systems with autonomous features

shapes ethical and legal norms, and how standards manifest and change in practice. Autonomous weapons systems are not a matter for the distant future – some autonomous features, such as in air defence systems, have been in use for decades. They have already incrementally changed use-of-force norms by setting emerging standards for what counts as meaningful human control. As UN discussions drag on with minimal progress, the trend towards autonomizing weapons systems continues. A thought-provoking and urgent book, *Autonomous Weapons Systems and International Norms* provides an in-depth analysis of the normative repercussions of weaponizing artificial intelligence.

The Coming China Wars Peter Navarro,2008-04-24 For years, China has served as the factory floor for global production, driving down prices for consumers worldwide. But, unfortunately, China's rapid and chaotic industrialization has put it on a collision course with the rest of the world. The *Coming China Wars* was the first book to systematically cover all those conflicts: political, economic, and environmental. Now, in this new edition, Dr. Peter Navarro has thoroughly updated the entire book. You'll find new chapters on the danger posed by China's flood of defective products and contaminated food; China's dramatic military expansion and the rising threat of a hot war; China's space program and its profound strategic implications; China's growing suppression of human rights and free speech; and much more. The coming China Wars will be fought over everything from decent jobs, livable wages,

and advanced technologies to strategic resources...and eventually to our most basic of all needs: bread, water, and air. Unless all nations immediately address these impending conflicts, the results may be catastrophic. Like the First Edition, this book demands that we think much more deeply about how to stop the coming China Wars, laying out hard choices that must be made sooner rather than later. This new edition offers even more policy recommendations, including original contributions from several of the world's most important China experts.

### **The Selected Stories of Patricia Highsmith**

Patricia Highsmith, 2001 With the savage humor of Waugh and the macabre sensibility of Poe, Patricia Highsmith (1921-1995) brought a distinctly contemporary acuteness to her prolific body of noir fiction. Including over 60 short stories written throughout her career, this collection reveals the stunning versatility and terrifying power of her work.

### *Outsourcing War to Machines* Paul J.

Springer, 2018-02-16 Military robots are affecting both the decision to go to war and the means by which wars are conducted. This book covers the history of military robotics, analyzes their current employment, and examines the ramifications of their future utilization. Robotic systems are the future of military conflicts: their development is already revolutionizing the nature of human conflict-and eroding the standards of acceptable behavior in wartime. Written by a professor who teaches strategy and leadership for the U.S. Air Force, one of the global leaders in the development and utilization of military robots, this book both addresses the history of military robotics and discusses the troubling future ramifications of this game-changing technology. Organized both chronologically and thematically, the book's chapters describe the

development and evolution of unmanned warfare; clarify the past, current, and future capabilities of military robotics; and offer a detailed and convincing argument that limits should be placed upon their development before it is too late. This standout work presents an eye-opening analysis that military personnel, civil servants, and academic instructors who teach military history, social policy, and ethics can ill afford to ignore, and will also provide the general public with information that will correct misconceptions about military robotics derived through popular culture and the news media.
