The Dragon in the Cockpit Hung-Sying Jing,Allen Batteau,2015-02-28 The purpose of The Dragon in the Cockpit is to enhance the mutual understanding between Western aviation human-factors practitioners and the Chinese aviation community by describing some of the fundamental Chinese cultural characteristics pertinent to the field of flight safety. China's demand for air transportation is widely expected to increase further, and the Chinese aviation community are now also designing their own commercial aircraft, the COMAC C-919. Consequently, the interactions in the air between the West and China are anticipated to become far more extensive and dynamic. However, due to the multi-faceted nature of Chinese culture, it is sometimes difficult for Westerners to understand Chinese thought and ways, sometimes to the detriment of aviation safety. This book provides crucial insights into Chinese culture and how it manifests itself during flight operations, as well as highlighting ways in which Western technology and Chinese culture clash within the cockpit. Science and technology studies (STS) have demonstrated that sophisticated technologies embed cultural assumptions, usually in subtle ways. These cultural assumptions 'bite back' when the technology is used in an unfamiliar cultural context. By creating the insider's perspective on the cultural/technological assumptions of the world's fastest growing industrial economy, this book seeks to minimize the accidents and damage resulting from technological/cultural misunderstandings and misperceptions.

*China's Aerospace Strategy* ,2013-02-15 China has emerged as a major regional power and has clear aspirations to be a global power in the not too distant future. Comprehensive military modernisation programs, sustained economic, scientific and technological developments have substantially elevated China's international profile. For the past three decades, China has been modernising its strategic weaponry and enhancing the capabilities of its nuclear warheads. It has also been developing new and complex military platforms that would be of great value to joint operations warfare. The decade from 2011 through 2020 will prove critical to the PLA as it attempts to integrate many new and complex platforms, and to adopt modern operational concepts, including network-centric warfare. China's air force is in the midst of a transformation. A decade ago, it was an antiquated service equipped almost exclusively with weapons based on 1950s-era Soviet designs and operated by personnel with questionable training according to outdated employment concepts. Today, the PLAAF appears to be on its way to becoming a modern, highly capable air force for the 21st century. The PLA Air Force has continued expanding its inventory of long-range, advanced SAM systems and now possesses one of the largest such forces in the world. The January 2011 flight test of China's next generation fighter prototype, the J-20, highlights China's ambition to produce a fighter aircraft that incorporates stealth attributes, advanced avionics, and super-cruise capable engines over the next several years. China is upgrading its B-6 bomber fleet with a new, longer-range variant that will be armed with a new long-range cruise missile. China's aviation industry is developing several types of airborne early warning and control system (AWACS) aircraft. These include the KJ-200, based on the Y-8 airframe, for AWACS as well as intelligence collection and maritime surveillance, and the KJ-2000, based on a modified Russian IL-76 airframe. China can decisively defeat India in any nuclear confrontation, but is currently unable to match the IAF in any conventional conflict, specifically along the border region of the Himalayas. Also, the IAF has greater experience than PLAAF in actual combat operations with its many conflicts; India is gradually building powerful military capabilities in tune with its expanding geopolitical interests, even as the eastern and western fronts are being strengthened to deter the twin Pakistan-China threat. IAF is on the path to transform into a true aerospace power with the capability to rapidly deploy and operate at great distances. As for the two-front challenge, apart from progressively basing Sukhoi-30MKI fighters and missile squadrons in the two theatres, the plan also includes upgrading the airfields and advanced landing grounds in the sectors in order to give both defensive and offensive options. It is important for India to realise the relevance of Chinese achievements in space technologies and to critically view and analyse Chinese achievements in the area of manned space missions In order to achieve further success in the space arena, developments in cryogenic technology are important for India. These should be pursued in order to develop the capability of launching 4-5 ton satellites, which will help in achieving a greater commercial edge. Programmes like moon and mars missions, using robotic technologies, are also important in order to know more about the nature of resources, especially minerals, available on these bodies and undertaking their mining. It is also important to work towards launching satellites for India's armed forces, which will help gain an advantage over adversaries. The book is an attempt to analyse the strategic importance of rising economic, political and military stature of China with a view to understand its regional and global implications in a new world order. As a rational actor in a chaotic world, China will defend its security interests at all costs. Besides undertaking a comprehensive modernisation of its armed forces, China is developing a series of offensive space capabilities while advocating the peaceful use of outer space. The book will be of immense value not only to the readers of the countries in the immediate neighbourhood of China, but to the strategic community across the globe since rise of China and other major Asian players including India will shape the strategic international environment in the decades to come during this century. It is hoped that the book will contribute to the understanding of the growing importance of integration of air and space and the fact that aerospace has truly become the new theatre of war and thereby establishing a new milestone in mankind's history of warfare. The unifying space dimension will remain the single most important source for information and communication which can be used in multiple forms. Hence, China's aerospace strategy and its implications for India assume greater military importance.

*Origins of Chinese Sports* ,2008-01-01 Until the 1984 Los Angeles Olympics, China had never won an Olympic gold medal; now, after Beijing in 2008, she leads the world. China's sudden emergence as a sporting super power came as a surprise to many people. In reality, she has a long history of sports.brPolo, wrestling, soccer, diving, acrobatics, martial arts, archery, marathon races, tug of war, swimming, ice skating, and weight lifting were all popular sports in ancient China. Some sports were invented by the Chinese; others such as polo and marathon-style racing were developed by the different ethnic groups on the borders of the country and became popular within China as well.brThis book will enhance your appreciation of China as a sports nation and champion. **Chinese Creeds And Customs** Valentine Rodolphe Buckhardt,2013-10-28 First published in 2007. An encyclopaedic account of traditional Chinese festivals, customs and beliefs, lavishly illustrated with line drawings and paintings, this remarkable work by an Englishman who spent twenty years in China from the Imperial aftermath through the establishment of Communism, gives

fascinating insights into a complex culture poised between past and present. Burckhardt's beautifully written and detailed work includes the rites practiced by the Manchu royal court and the rituals permitted under the Communist and Nationalist regimes, the festivals of working people and villagers as well as the ceremonies of the mandarins of Peking and Hong Kong, in all seasons of the year. He was especially close to the renowned Boat People of the former colony, and gives a unique account of life abroad the harbour junks and their sea-borne celebrations. Among the subjects dealt with are Chinese cuisine, the meaning of presents, secret societies, the Chinese calendar, cats (the Chinese prefer cats with yellow eyes), Chinese dress, jade carving, feng shui, etiquette, the hundreds of gods of house and wayside, temples and their guardians, and all the great festivals - those of the Moon, the Dragon Boats, the Hungry Ghosts, the Magnolia, the New Year and many more. Chinese creeds and customs were Burkhardt's passion, and no better account of them will ever be written.

Chinese Traditional Sports Sam Karthik,2022-12-09 China is an ancient civilization with over 5000 years of history. In the long course of historical development, Chinese traditional sports often reflected different aspects of contemporary politics, economy, culture, religion and customs of various ethnic groups (中华民族). The traditional sports made positive contributions to the prosperity of the Chinese nation, promoted the physical and mental health of the people, strengthened national unity, and supported active cultural life. In fact, there are 56 nationalities in China and their colorful traditional sports are a valuable cultural heritage of the Chinese nation. The book has 20 chapters, including: Chapter 1: Overview of Traditional Chinese Sports (中国传统体育概述) Chapter 2: Chinese Kung Fu (中国功夫) Chapter 3: Bruce Lee (李小龙) Chapter 4: Tai Chi (太极拳) Chapter 5: Lion Dance (舞龙) Chapter 6: Tug of War (拔河) Chapter 7: Ancient Football (蹴鞠) Chapter 8: Spinning Top (陀螺) Chapter 9: Stilts (高跷) Chapter 10: Throwing Hydrangea (掷绣球) Chapter 11: Fireworks (烟花爆竹) Chapter 12: Shooting/Crossbow (射箭) Chapter 13: Mongolian Wrestling (Buke) (摔跤) Although China has long been associated with the Martial Arts (武术), in traditional Chinese sports, there are widely-spread sports such as Horse Riding (骑马), Archery (射箭), Tai Chi (太极), Dragon Boat Races (龙舟), Lion Dance (舞龙), and so on. These sports narrate distinctive Chinese culture with regional characteristics. Some show the customs of the water country in the south (江南), some exude the aroma of the northern grassland (草原), and some have the magic of the plateau (高原). Many of the official events in the modern Olympic Games, such as football, running, weightlifting, wrestling, archery and other sports can be found in the Chinese traditional sports, and some of them have a longer history in China than in the West. For example, Cuju (蹴鞠) is a unique title of ancient Chinese football. It is a traditional Chinese sport and entertainment method with a history of more than 2,000 years. The origin of Dragon Boat Racing (龙舟) dates back to about 2500 years ago and remains a traditional event held around China every year. Bows and arrows are one of the earliest long-range weapons invented by the mankind. It is said that Chinese bows and arrows originated from the time of the Yellow Emperor (黄帝). The current book volume, Chinese Traditional Sports, is a Chinese reading practice book. It would introduce you to a variety of important Chinese sports, such as Kung Fu (功夫), Tai Chi Chuan (太极拳), Ancient Football (蹴鞠, Cuju), Mongolian Wrestling (摔跤), Horse Racing (赛马), etc. As such, all these traditional sports are very essential part of learning Chinese language and culture. The new volume in the Introduction to Chinese Culture Series, includes both the Chinese text (simplified characters) and pinyin. With about 1000 unique Chinese characters, the volume would be suitable for the beginners, lower intermediate and advanced level Chinese language learners (HSK 1-6). Overall, the reading series offers you a variety of elementary level books (Level 1/2/3) to learn Chinese culture as well as practice Chinese reading fast.

G-Force: Flying the World's Greatest Aircraft James Bennet,2016-10 Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built. It's like a \$20 million strap on carnival ride, - AH-64 Apache Pilot I had high expectations, and it's beat eery one of those. The whole jet is awesome. - F/A-18F Super Hornet pilot. The role of the pilot has changed hugely in the last sixty years of military aviation. Jet pilots in the 1960s, flying types such as the Harrier and F-102, would have spent a huge portion of their concentration just keeping the aircraft under control. That left little spare mental capacity to locate and engage the enemy. Today, the opposite is true. Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F-35 Lightning II, allowing the pilot to focus fully on his or her mission. G-Force Flying the World's Greatest Aircraft is a celebration of the experience of flying some of aviation's most spectacular, powerful, and dangerous machines, from early jet fighters such as the F-86 Sabre and MiG-15 to today's F-22 Raptor and Eurofighter Typhoon. Packed with first-hand interviews with test and combat pilots from the world's air forces, and illustrated with extensively researched and striking imagery, G-Force Flying the World's Greatest Aircraft is thrilling ride alongside the pilots who fly the aircraft every day. Featuring first-hand accounts of combat over Korea in the MiG-15, endurance missions in the B-2, and bombing Iraqi targets in the Tornado, this book puts the reader directly in the pilot's seat, and will appeal to aviation enthusiasts of all ages.

**Dictionary of Ancient Sports Programs of China (Ethnic Minorities)** Jinxiang Bai,2025-01-29 This book provides a comprehensive, systematic and in-depth investigation of ancient Chinese sports of ethnic minorities. It is based on the key state-funded project 'Ancient Chinese Sports Projects' by an academic research team led by Jinxiang Bai, a prominent professor on sports history and minorities studies in China. From a historical perspective, this book applies the research methods of philology, archaeology, ethnology and folklore to cover 100 sports that are classified into nine categories, including ball skills, running jump shots, tactics, martial arts and health, riding, dancing, games, water, ice and snow, chess and cards. For each sport, it provides an in-depth description of its development, evolution, regulation, activity methods, forms, characters, memorabilia, scope of communication, cultural narrative and relevant forms of communication. This approach represents an extension of conventional studies on the sports of China's ethnic minorities, and provides a kaleidoscopic view on China's ethnic minorities as well as their sports and cultures.

**The Chinese Air Force** Richard Hallion,Roger Cliff,Phillip Charles Saunders,2012 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. The conference was jointly organized by Taiwan's Council for Advanced Policy Studies, the Carnegie Endowment for International Peace, the U.S. National Defense University, and the RAND Corporation. This books offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where it is headed.

**Chinese Air Power** E. Gordon,Yefim Gordon,Dmitriy Komissarov,2010 This is the definitive reference source examining all aspects of one of the most powerful air forces in the world, the Chinese. Although China has been a significant air power for more than fifty years, very little has been published or even known about its capabilities. Along with the recent emergence of China as a world economic and military superpower, China has recently invested huge sums of money in modernizing its air force, developing its own aircraft and technology as well as buying from overseas. This remarkable new book unveils for the very first time, the full details of the organization, capabilities, and aircraft of all Chinese air forces - the third largest in the world today. It details the Chinese air force's order of battle, from the top command down to the operational regiments and squadrons. It also includes descriptions and specifications of the Air Force and the NSavy main fixed-wing and rotary-wing aircraft.

**A History of Chinese Martial Arts** Fuhua Huang (Lecturer in physical education),Hong Fan,2019 Featuring contributions from leading Chinese scholars and practitioners, this is the most authoritative study ever written on this topic. Including numerous illustrations of artefacts, weaponry and historical drawings and documents, it offers unparalleled insight into the origins, development and contemporary significance of martial arts in China.

**Skies Over China** Howard Halla,2019-10-21 Brigadier General Claire L. Chennault commanded the Fourteenth Air Force from 1942 to 1945; its mission was to hold the line against further incursion by the Japanese into China, Burma and India. The Chinese American Composite Wing (CACW) was formed in 1943 under the Fourteenth. While it was a small group, it was recognized for its valor and cooperation: The airmen and crews came from China and the US, bound together to fight a common enemy. Their efforts-many of which are captured in this book-contributed to the end WWII and defeat of the Japanese Imperial Forces.
