Ignition! John Drury Clark,2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

African Footballers in Europe Ernest Yeboah Acheampong, Malek Bouhaouala, Michel Raspaud, 2019-09-30 African Footballers in Europe traces the social and economic evolution of African football and examines the strategies and resources that players mobilise in their migrations, with a particular focus on 'Give Back Behaviours' (how players contribute to their countries or communities of origin). It shines new light on contemporary migrations, labour markets in sport, and processes of development in Africa. Using a multidisciplinary approach and Weberian methodology to analyse players' 'Give Back' behaviour, the book highlights the complex rationale behind this behaviour, based on a combination of social, cultural, and economic elements. It features interviews with former and current African professional players, providing a vivid picture of the role of communities in players' migration projects, the allure of the European football market, and investment initiatives that can contribute to local and regional development. This is a vital read for academics, researchers, and students of sport sciences, sociology of sport, sport management, sociology, geography, political sciences, management, sociology of Africa, migration studies, sociology of the labour market, and economic sociology. It is also an important resource for professional organisations, NGOs, football agents, football administrators, federations, confederations, and governments.

Thomas Mann's The Magic Mountain Rodney Symington, 2011-09-22 Thomas Mann's novel The

Magic Mountain presents a panorama of European society in the first two decades of the 20th century and depicts the philosophical and metaphysical dilemmas facing people in the modern age. In the years leading up to the First World War, the fundamental elements of human nature were thrown into sharp relief by the political tensions that resulted in the ultimate metaphor for the innate destructiveness of humankind: the War itself. If such a war is the true expression of human tendencies, what hope is there for the future? Through the figure of the main character of the novel, Thomas Mann explores the alternative philosophies of life available to human beings in the modern age, and invites the reader to undertake a personal odyssey of discovery, with a view to adopting a positive approach in an era that seems to offer no clear-cut answers. This book is a comprehensive commentary on Thomas Mann's seminal novel, one of the key literary artefacts of the 20th century. The author has taken upon himself the task of explaining all the references and allusions contained in the novel, and of providing readers who know little or no German with enough explanatory comment to enable them to understand the novel and extract the maximum reading pleasure from it.

Bringing Fossils to Life Donald R. Prothero,2013-11-05 One of the leading textbooks in its field, *Bringing Fossils to Life* applies paleobiological principles to the fossil record while detailing the evolutionary history of major plant and animal phyla. It incorporates current research from biology, ecology, and population genetics, bridging the gap between purely theoretical paleobiological textbooks and those that describe only invertebrate paleobiology and that emphasize cataloguing live organisms instead of dead objects. For this third edition Donald R. Prothero has revised the art and research throughout, expanding the coverage of invertebrates and adding a discussion of new methodologies and a chapter on the origin and early evolution of life.
