Civil Air Patrol Henri S. Galiena,2013 The Civil Air Patrol (CAP) is a federally chartered non-profit corporation that may be utilised as a civilian volunteer auxiliary of the Air Force. The Secretary of the Air Force can employ the services of CAP in lieu of or to supplement Air Force resources to fulfil the non-combat programs and missions of the Air Force. Such services may include Air Force-assigned missions in support of homeland security operations, consequence management, support to civilian law enforcement, and other civil support. This book provides an overview of the organisation and function of the Civil Air Patrol, detailing the procedures, standards, and responsibilities of Air Force organisations that support and employ CAP.

Beaumont's Civil Air Patrol in World War II Penny L. Clark,2021-07-12 During World War II, Beaumont and Port Arthur were leaders in oil refining, which literally kept the Allied wheels moving toward victory. The Germans recognized the importance of Texas oil and sent submarines to sink American ships carrying the valuable cargo. Civil Air Patrol (CAP) Coastal Base No. 10, located at the Municipal Airport in Beaumont, Texas, in 1942-1943, helped alleviate the submarine menace by logging over 14,000 hours in the air over the Gulf. CAP was unconventional. As a part of the Office of Civilian Defense, CAP's members were civilians, many of whom were too old for the military. Other members owned airplanes or had experience flying to help go on missions patrolling the Atlantic and the Gulf of Mexico searching for enemy submarines or survivors of sub attacks. Although the men had training in military protocol, they remained civilians and often returned to their homes after completing their missions.

"An Honorable Place in American Air Power" Civil Air Patrol Coastal Patrol Operations, 1942-1943 Air University Press, Frank A Blazich, Jr, 2020-12-16 Author Frank Blazich has spent years researching and compiling disparate records of Civil Air Patrol's short-lived--but influential--coastal patrol operations of World War II, which he synthesizes into the first scholarly monograph that cements the legacy of this unique and vital wartime civil-military cooperative effort. This volume relates the proud history of an important organization, the Civil Air Patrol (CAP), and its efforts to use civilian-owned aircraft and volunteer pilots to help combat the U-boat menace that threatened America's shores in World War II. Though that story is not well known, it has been chronicled previously, but not with Frank Blazich's attention to detail and important corrections to CAP's effectiveness during the war. CAP's substantial accomplishments will be familiar to members of that fine organization that does much to inculcate a spirit of air-mindedness, as Billy Mitchell called it, among today's youth and motivate them towards careers in both civil and military aviation. But Blazich has gone far beyond a statistical recounting of sorties and hours flown, of the long tedious hours of patrol, and the sheer terror of engine failure far out at sea or an airfield closed in by weather as the fuel gauge approaches empty. Instead, he uses the successful mobilization of civilian experts (and they certainly knew more about aviation than many members of the general population) to come to their nation's aid in a time of crisis. By doing so, he reminds future commanders and planners to consider the use of civil resources and highlights issues that are likely to emerge in mobilizing these important assets, from the legal status of noncombatants to the importance of logistical support and sustainment. The potential uses of civilian aviation experts in future crises are limited only by the imagination. The Civil Air Patrol, as currently organized and equipped, could easily provide reconnaissance and light logistical support in the event of war. CAP aircraft, manned and unmanned, fixed-wing or rotary, could be used to in real time verify or dispel deep fakes of events, helping combat the information warfare our adversaries are becoming so adept at. These same platforms could provide vital reconnaissance during natural disasters, from delivering life-saving medical supplies to relieving much more expensive and already heavily tasked military assets from the burdens of searching for survivors or compiling imagery of damage. As climate change threatens our globe, CAP orbits equipped with thermal sensors could help monitor forests for wildfires during critical periods so they can be extinguished before they become life-threatening infernos. And aircraft could assist in securing the nation's porous borders, whether on land or at sea. Similarly, civilian cyber specialists could lend their expertise in times of cyberattack to help defend the nation's vital economic and communications infrastructure. Thus Frank Blazich's work is not only an excellent history of events over 75 years ago, but it is also a blueprint for leveraging all aspects of our national power in times of crisis. It will certainly appeal to the membership of the Civil Air Patrol, who will find inspiration from the sacrifices of a previous generation of Airmen, 68 of whom gave their lives in their nation's defense. But it will also help inform current and future commanders, planners, and civilian

leaders on the capabilities of this remarkable organization and provide suggestions for the incorporation of civil assets to support future military and disaster relief operations, whether in air, space, or cyberspace.

Enchanted Wing Ted Spitzmiller,Gwen Sawyer,2009-11 The Civil Air Patrol, like most volunteer organizations, takes on the persona of its people to create a distinct culture. While the cast of characters changes over the years, the enduring qualities of those who have gone before remains a legacy for those who follow. The New Mexico wing has been fortunate to have had people from many walks of life who have contributed to the organization. This is their story.
